

MICHELLE STERLING

THE FUTURE OF FUN & MEANINGFUL SCIENCE EDUCATION!!!!

I would be lying if I said I chose a life in the field of Education because, to be honest, I think Education somehow found me. I was never really sure about what I really was passionate in life about - other than God and becoming a housewife who was able to care for her children and cook and clean all day - and Radiology seemed interesting enough with good enough pay to become a career. I was in finals week of my second semester of college, was one of fifteen applicants chosen for the Radiology program to a different school, and something happened that would change my life forever. I'm not exactly sure what happened, or how it happened in fact, but with sky-high blood pressure I had an out of body experience as I somehow found my way to the school's Education department office. I remember looking around the room, seeing people interact, and wonder what I was doing there. "May I help you?" said a woman sitting at a desk who, little did I know, would become my education advisor. The sound of her voice sent a beat in my chest I swear could have knocked me over. "Are

you okay?" she asked me as I sat at her desk. I suppose my exhaustion from studying for finals and stress from what I felt I was about to do made me appear a little rough. "I don't know..." I replied. "I think I want to be a science teacher." There at that desk was the first time I had ever heard those words come out of my mouth, and I find myself not remembering them really being on my mind in the first place. I literally woke up one day feeling funny, and without talking to anyone about it or taking a long time to weigh advantages and disadvantages (which means a lot if you know me) of the switch, I made a life changing decision without even really knowing why.

I never had wanted to be an educator, but I find everything happens for a reason. Somehow God knew what I was passionate about in life before I did, and he led me to the wonderful place I am in my life now. I am now in the process of taking over my seventh grade science class for student teaching. I have never thought I would find something to do with my life that I really enjoy doing every day for a career. I constantly tell people that it's absolutely amazing to have the feeling of knowing that I so enjoy what I have worked so hard for so long to be able to do.

My students will have an interesting, engaging, meaningful time in my science classroom. In my class, we will learn, we will have fun, and we will enjoy learning. Death to worksheets! We will explore science through hands-on activities

Fashion and licensing, that each behave differently, broad-based change is constant, with more than 40 percent of toy products new each year. The U.S. market comprises about 600 publicly and privately held companies valued at about \$22 billion per year at wholesale for traditional toys, which has remained relatively constant since the 1990s. It is also the only industry where success depends on the whims of a child. This book is a concise and in-depth introduction to the structure, practices, and market forces that impact the toy industry, including a short history, a description of the current market landscape, product trends, emerging opportunities and threats, and expectations for the future, as well as aspects of retailing, consumer behavior, and financial markets. It is intended to provide a foundation for understanding the diverse and dynamic nature of the toy industry and many things that make it unique, and to provide an introduction to this fast-paced, always-changing, and fiercely competitive business where success is
