**Future Of Inequality** William C Miller, 1970-03-21      **The future of inequality** S. M. Miller, 1974      **The Future of Equality** Shlomi Segall, 2025-05-15

Philosophers have been preoccupied with the future from time immemorial But for egalitarians the future of humanity constitutes a relatively new challenge The premise of this book is that a complaint based ideal of egalitarianism faces problems when applied to the future For one thing if we suppose that future people are destined to fare better than us say in terms of overall wellbeing then allowing humanity to flourish would then represent a net increase in terms of egalitarian complaints With respect to equality at least it would be better to refrain from bringing new life into being That seems absurd This is the Anti Natalist objection to egalitarianism Second any policy aimed at reducing future inequalities and indeed any population policy at large will in all likelihood affect the identity of those who will be born This familiar Non Identity problem poses unique problems for egalitarianism especially ones of the complaint model Arguably a person cannot have a complaint about being worse off than another when the only other alternative distribution is one in which she does not exist Put differently such a person lacks a standing to complain about this future inequality This can be referred to as the Non Identity objection or as the Standing objection to egalitarianism This book examines how to evaluate different scenarios for humanity s future from an egalitarian perspective It is argued that planning for the future does require egalitarian considerations but that egalitarianism also needs to be adapted to handle future persons As indicated a key challenge concerns how to evaluate mixed populations containing both necessary and possible persons The book proposes a pluralist approach combining egalitarianism with prioritarianism Prioritarianism itself also suffers unique problems when applied to the future chief among them the Separateness of Persons objection The book attempts to deflect these obstacles and aims to develop a coherent framework that maintains egalitarian principles while appropriately discounting the status of merely possible people Overall the book seeks to advance both our ethical assessment of humanity s future and our understanding of the nature of equality and distributive ethics more generally      The Future of the Safety Net Sheldon Friedman, David C. Jacobs, 2001 Topics covered include public pensions in the OECD social security the state of private pensions prospects for National Health Insurance in the United States medicare contingent workers health and pension security benefits for same sex partners      Restarting the Future Jonathan Haskel, Stian Westlake, 2023-10-03

Restarting the Future argues that the big economic challenges facing the world are the result of our failure to deal with the implications of an economy dependent on knowledge ideas and relationships It examines why making this transition is so hard and looks at ways forward in the fields of public policy business and finance The troubling state of rich world economies low productivity growth high inequality populist instability climate crisis is significantly the result of the troubled and incomplete shift to a new type of economy specifically the move from an economy dependent on tangible capital to one dependent on intangible capital At the heart of the problem is a significant slowdown in the pace of intangible investment

since the financial crisis There were some early signs of this at the time the authors were writing their previous book Capitalism without Capital but new data now makes the severity and persistence of this slowdown clear This slowdown has happened because we lack the right institutions and strategies to encourage intangible investment and channel it effectively What is more there are significant groups with an interest in stopping these new institutions emerging Contrary to the dominant narrative that focuses on the tension between a successful future facing elite and a mass of low status left behinds the authors argue that many of the people and organisations with an interest in holding back the future are affluent and high status including affluent retirees established financial institutions and graduate knowledge workers Haskel Westlake survey attempts to fix these institutional problems explaining how they work in the context of the intangible economy and what the upside to solving them might be They describe interesting and topical policy experiments and business strategies such as Preston s Local Economic Strategy or topical new business models like WeWork and CloudKitchens and set them in a novel economic context Specifically these sections look at city policy business finance and investment public investment competition policy monetary policy mitigating climate change and business strategies for tangible based firms The authors close the book with a political programme for how to get over the teething troubles of the new economy

**Deaths of Despair and the Future of Capitalism** Anne Case, Angus Deaton, 2021-03-02 This book documents the decline of white working class lives over the last half century and examines the social and economic forces that have slowly made these lives more difficult Case and Deaton argue that market and political power in the United States have moved away from labor towards capital as unions have weakened and politics have become more favorable to business corporations have become more powerful Consolidation in some American industries healthcare especially has brought an increase in monopoly power in some product markets so that it is possible for firms to raise prices above what they would be in a freely competitive market This the authors argue is a major cause of wage stagnation among working class Americans and has played a substantial role in the increase in deaths of despair The authors offer a way forward including ideas that even in our current political situation may be feasible and improve lives

Financialization and the Future of the American Economy William K Tabb, 2023-07-14 Financialization is a set of processes which has led to a financially driven and commodified economy with rising inequality tax avoidance and a lack of investment in the physical and social infrastructure Given the influence of money politics and the secular increase in the burden of debt financialization has produced a deeply flawed economic system which mainstream economists are unable to address This book discusses the causes and costs of financial crises how financialization produces inequality and instability and the patterns of value extraction it enables It draws on key theoretical traditions most prominently the writing of Marx Keynes and Minsky that illuminate much that is ignored and rejected in mainstream theorizing including by many who identify as Keynesians After decades of low interest rates and years of quantitative easing QE keeping borrowing costs near zero many borrowers households businesses banks shadow banks and

governments will not be able to finance their debt at the higher interest rates initiated by central banks to address inflation. The resulting stagflation will be global, producing a severe downturn that may be postponed through still greater debt creation but not avoided by conventional means. The book also explores the ways that standard financial criteria contribute to the climate emergency and the manner in which the commodification of nature proceeds from the desire to create new marketable derivative products. It concludes with a discussion of what needs to be done to move away from a harmful regime of accumulation premised on financialization and to adopt a far better one. This book is essential reading for anyone interested in the causes and consequences of financialization and its impact on the economy. Globalisation and the Future of Terrorism Brynjar Lia, 2007-05-07. Globalisation and the Future of Terrorism. Patterns and Predictions is devoted to understanding how international terrorism is shaped, how it evolves over time, and what we are to expect in the future.

*Imagining the Future of Global Education* Yong Zhao, Brian Gearin, 2017-10-17. Imagining the Future of Global Education examines the Grand Educational Narrative (GEN) and the major institutions that shape and disseminate it. The book focuses on national visions of education and the imaginary futures that nations seek to make reality. It critiques how the GEN policy implementation process frequently turns dreams of upward mobility into nightmares. In this way, the book takes a distinctly different approach than most comparative and international education studies. Rather than being oriented toward the past and asking how education systems around the world ended up where they are, chapters in this volume seek an understanding of how various educational visions from around the world inform the present and shape the future. Following an introductory summary of important concepts from scholarship on imaginary futures and global education reform, the book is organized around three themes: What Dreams are Made Of (illustrating through three case studies what the GEN looks like at the national level and how it operates across national boundaries), A Dream within a Dream (considering some of the more novel trends in international education reform in order to provide insight into how dreams seem to function), and Keeping Dreams from becoming Nightmares (comprising three thematic essays that describe trends in education policy in one or more countries). The book concludes with lessons for scholars and policymakers. The Future of Work in the United States Natalie Rauscher, 2021-09-03. This book presents and analyzes how restructuring processes due to technological change are reflected and processed in political and public discourses in the United States in the most recent past. More specifically, this work examines how the themes of automation, digitization, and the platform economy and their impact on the future of work are reflected in public discourse through the analysis of journalistic articles and political discourse through the analysis of congressional hearings. Public and political discourses as well as economic narratives shape our understanding of certain developments such as technological change, our behavior more generally, and societal support of said developments. Therefore, it is vital to investigate and analyze these discourses in order to show how technological change is perceived and evaluated today. This work draws from concepts and methods of several different disciplines, most notably using a combination of corpus

linguistic methods and exemplary textual analysis This way this work stands as truly interdisciplinary with a unique approach to the quantitative and qualitative examination of discourses      The Future of Families to 2030 OECD,2011-12-22 This report explores likely future changes in family and household structures in OECD countries identifies the main forces shaping the family landscape to 2030 discusses the longer term challenges and suggests policy options for managing the challenges

**The Future of the Public's Health in the 21st Century** Institute of Medicine,Board on Health Promotion and Disease Prevention,Committee on Assuring the Health of the Public in the 21st Century,2003-02-01 The anthrax incidents following the 9 11 terrorist attacks put the spotlight on the nation s public health agencies placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report The Future of the Public s Health in the 21st Century reaffirms the vision of Healthy People 2010 and outlines a systems approach to assuring the nation s health in practice research and policy This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted strategic way to promote and protect the public s health Focusing on diverse partnerships as the framework for public health the book discusses The need for a shift from an individual to a population based approach in practice research policy and community engagement The status of the governmental public health infrastructure and what needs to be improved including its interface with the health care delivery system The roles nongovernment actors such as academia business local communities and the media can play in creating a healthy nation Providing an accessible analysis this book will be important to public health policy makers and practitioners business and community leaders health advocates educators and journalists      **Campaign Finance Reform and the**

**Future of the Democratic Party** Jerrold E. Schneider,2002 This volume is a comprehensive collection of critical essays on The Taming of the Shrew and includes extensive discussions of the play s various printed versions and its theatrical productions Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play The issues discussed include gender authority female autonomy and unruliness courtship and marriage language and speech and performance and theatricality      *Collapsing Gracefully: Making a Built Environment that is Fit for the Future* Emilio Garcia,Brenda Vale,Robert Vale,2021-07-24 This innovative book investigates the concept of collapse in terms of our built environment exploring the future transition of modern cities towards scenarios very different from the current promises of progress and development This is not a book about the end of the world and hopeless apocalyptic scenarios It is about understanding change in how and where we live Collapse is inevitable but in the built environment collapse could imply a manageable situation an opportunity for change or a devastating reality Collapsing gracefully means that there might be better ways to coexist with collapse if we learn more about it and commit to rebuild our civilisations in ways that avoid its worst effects This book uses a wide range of practical examples to study critical changes in the built environment to contextualise and visualise what collapse looks like to see if it is possible to buffer its effects in places already collapsing and

to propose ways to develop greater resilience The book challenges all agents and institutions in modern cities their designers and planners as well as their residents and users to think differently about built environment so as to ease our coexistence with collapse and not contribute to its causes
