Kessler, 2021-04-07 Epidemiology originated during the Middle Ages when science based medicine arose and medical schools were established Clinically trained epidemiologists began to advance knowledge on human disease through intensive observations of their patients over time Modern computing was quickly adopted by epidemiologists as an essential tool of modern medicine Despite its key role in medicine epidemiology based teaching and research is now faltering as professors emphasize the difficulties rather than the advantages of this critical branch of medicine No other medical specialty can accurately track diseases in populations at risk or evaluate the cost and quality of medical care It can create clinical information systems for practising physicians assess health risks in large population groups and evaluate unique subgroups at risk of disease A major lesson from the COVID 19 experience is that enhancing the work of medical epidemiologists is crucial to the future of public health and clinical medicine How this goal can be achieved is the central theme of this volume The Future of the Public's Health in the 21st Century Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee on Assuring the Health of the Public in the 21st Century, 2003-02-01 The anthrax incidents following the 9 11 terrorist attacks put the spotlight on the nation's public health agencies placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010 and outlines a systems approach to assuring the nation's health in practice research and policy This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted strategic way to promote and protect the public's health Focusing on diverse partnerships as the framework for public health the book discusses The need for a shift from an individual to a population based approach in practice research policy and community engagement The status of the governmental public health infrastructure and what needs to be improved including its interface with the health care delivery system The roles nongovernment actors such as academia business local communities and the media can play in creating a healthy nation Providing an accessible analysis this book will be important to public health policy makers and practitioners business and community leaders health advocates educators and journalists *The*
