Krishnamurti, 1991 In this volume Krishnamurti takes great care to elucidate this necessity of a revolution within our consciousness where the problem lies before we expect any kind of revolutionary change outside of ourselves Krishnamurti posits that if the politicians and scientists wanted to end starvation in the world it could be done It could be done but they are not going to do it as long as their thinking is based on nationalism on motives of their own personal profit And even if this far reaching outward change were brought about it seems to me that the problem is much deeper The problem is not merely starvation war the brutality of man to man it is the crisis in our own consciousness Fundamentally the problem lies within p 295

**The Concept of Service Quality in Commercial Practice** Amelikeh Confidence E. N., 2020-07-30 Commercial Practice is the work done for the earning acquisition and ownership of existence and within existence What one acquires the one is said to own resulting in the application of ownership to anything at all acquirable including the slave however the slave is held in possession disowned and hence cannot be said to be owned We cannot accurately say that one owns a slave nor that a slave has owner when the slave is held disowned The disowned thing has no owner The application of ownership to the slave has brought difficulty in telling the relationship between parent and child husband and wife employer and employee and citizen and state for instance as a person being owned sounds as the person being a slave We have redeemed the reality of ownership There are things one can own and things one cannot own although acquirable therefore there are things one has the Right to acquire and things one has no Right to acquire If you cannot own it and you acquire it then you have stolen it rendering you a criminal as theft is a crime Learn Commercial Practice it is the legitimate method of acquiring and

Haith,1994 Following Marshall Haith s seminal studies on early infant anticipation this collection begins with a survey of current knowledge about the early development of expectations      **The Future Echo** Gino Chance,2013-07-09 We travel parallel with mankind s greatest discovery and all we have to show for it is a partial view distorted by our own participation Yes in our daily lives the decisions we make we are all influenced by this view whether or not you are aware believe or follow this phenomena In this book I attempt to unravel alternative views reintroduce God in its more magnificent glory and to do that I share my own life experiences and events that have contributed towards shaping me into the person I am today I talk about sensitive subjects with religious themes straight to the point and with as much understanding as I could possibly add to situations that makes us loose our identities experience energy crisis and face condemnation      *The Philosophy of Time* Roger McLure,2015-04-29 The question of the existence and the properties of time has been subject to debate for thousands of years This considered and complete study offers a contrastive analysis of phenomenologies of time from the perspective of the problematics of the visibility of time Is time perceptible only through the veil of change Or is there a naked presence of time itself Or has time always effaced itself McClure s new work also stages confrontations between phenomenology of time and analytical philosophy of time By doing so he explores ancient issues from a fresh perspective such as whether time passes whether experimental time is real time and whether the very concept of time is contradictory      **The Future of Bioethics** Howard Brody,2009-02-25 Bioethics born in the 1960s and 1970s has achieved great success but also has experienced recent growing pains as illustrated by the case of Terri Schiavo In *The Future of Bioethics* Howard Brody a physician and scholar who dates his entry into the field in 1972 sifts through the various issues that bioethics is now addressing and some that it is largely ignoring to chart a course for the future Traditional bioethical concerns such as medical care at the end of life and research on human subjects will continue to demand attention Brody chooses to focus instead on less obvious issues that will promise to stimulate new ways of thinking He argues for a bioethics grounded in interdisciplinary medical humanities including

literature history religion and the social sciences Drawing on his previous work Brody argues that most of the issues concerned involve power disparities Bioethics response ought to combine new concepts that take power relationships seriously with new practical activities that give those now lacking power a greater voice A chapter on community dialogue outlines a role for the general public in bioethics deliberations Lessons about power initially learned from feminist bioethics need to be expanded into new areas cross cultural racial and ethnic and global and environmental issues as well as the concerns of persons with disabilities Bioethics has neglected important ethical controversies that are most often discussed in primary care such as patient centered care evidence based medicine and pay for performance Brody concludes by considering the tension between bioethics as contemplative scholarship and bioethics as activism He urges a more activist approach insisting that activism need not cause a premature end to ongoing conversations among bioethicists defending widely divergent views and theories
