**The Fragile Contract** David H. Guston,Kenneth Keniston,1994 Is there a crisis in the relations between research universities and the federal government Is our system which has been the most successful in the world breaking down The Fragile Contract brings together essays by scientists university leaders scholars and seasoned science watchers from government agencies and nonprofit groups to address this issue Neither advocacy nor polemic it explores the social contexts for and influences on research in the university setting to encourage greater understanding of core issues by both politicians and scientists The contributors offer concrete suggestions for building the foundation of a firmer contract that reflects current realities The Fragile Contract appears at a time when congressional committees have openly questioned whether scientists are capable of policing fraud in their own ranks and when fundamental agreements that have covered reimbursements to the universities throughout the post World War II period have been called into question It also addresses the problems of finding science after the Cold War and as well as the problems faced by universities in an international context The Fragile Contract reveals that we are seeing not so much a crisis as a reflection of changing times Neither science nor government is the same institution that it was when the modern social contract between the two was forged in the late 1940s The authors agree that all parties must make major adjustments to the new environment and research universities must become more active in promoting links to the local and national community Contents The Fragile Contract David H Guston and Kenneth Keniston Universities the Public and the Government Charles M Vest Doing One s Damndest The Evolution of Trust in Scientific Findings Gerald Holton Integrity and Accountability in Research Patricia Woolf The Public Faces of Science Dorothy Nelkin How Large an R D Enterprise Reinventing the Government University Compact Daryl E Chubin Views from the Benches Funding Biomedical Research and Funding the Physical Sciences Phillip A Sharp and Daniel Kleppner Financing Science after the Cold War Harvey M Sapolsky Indirect Costs and the Government University Partnership Peter Likins and Albert H

audits often have unintended and dysfunctional consequences for the audited organization

The Politics of Expertise in Congress Bruce Bimber,1996-08-08 CHOICE 1997 Outstanding Academic Books Nowhere in the U S government is the marriage between expertise and politics more normatively troublesome and empirically obscure than in Congress The legislature is asked to be both expert and representative to act on the best available information and judgment about policy problems while being responsive to and reflective of constituents demands This book examines the relationship between technical experts and elected officials challenging the prevailing view about how experts become politicized by the policy process Bimber presents a theory about the connections between institutional structure and the strategies of experts who participate in politics He tests this theory by tracing the interaction between Congress and the Office of Technology Assessment OTA a recently abolished legislative branch agency created in 1972 to estimate the consequences of new technologies and free Congress from complete dependence on the executive branch for information and policy analysis In addition he provides comparative portraits of Congress's remaining support agencies the Congressional Budget Office the Congressional Research Office and the General Accounting Office and argues that the legislative context for the politics of expertise reveals patterns that have been overlooked in studies of expert knowledge and executive branch policymaking
