Ramps in the Folded Appalachians and in Overthrust Belts Worldwide Howard A. Pohn, 2000 *Local Features in Natural Images via Singularity Theory* James Damon, Peter Giblin, Gareth Haslinger, 2016-09-30 This monograph considers a basic problem in the computer analysis of natural images which are images of scenes involving multiple objects that are obtained by a camera lens or a viewer's eye The goal is to detect geometric features of objects in the image and to separate regions of the objects with distinct visual properties When the scene is illuminated by a single principal light source we further include the visual clues resulting from the interaction of the geometric features of objects the shade shadow regions on the objects and the apparent contours We do so by a mathematical analysis using a repertoire of methods in singularity theory This is

applied for generic light directions of both the stable configurations for these interactions whose features remain unchanged under small viewer movement and the generic changes which occur under changes of view directions These may then be used to differentiate between objects and determine their shapes and positions

Deleuze and World Cinemas David Martin-Jones, 2011-02-17 Shortlisted for the British Association of Film Television and Screen Studies Annual Book Award Deleuze's Cinema books continue to cause controversy Although they offer radical new ways of understanding cinema his conclusions often seem strikingly Eurocentric Deleuze and World Cinemas explores what happens when Deleuze's ideas are brought into contact with the films he did not discuss those from Europe and the USA from Georges Méliès to Michael Mann and a range of world cinemas including Bollywood blockbusters Hong Kong action movies Argentine melodramas and South Korean science fiction movies These emergent encounters demonstrate the need for the constant adaptation and reinterpretation of Deleuze's findings if they are to have continued relevance especially for cinema's contemporary engagement with the aftermath of the Cold War and the global dominance of neoliberal globalization
