

## BOOK REVIEW

THE FOREST SERVICE: A STUDY IN PUBLIC LAND MANAGEMENT. By Glen O. Robinson. Johns Hopkins University Press, 1975. Pp. xv, 337. \$16.95.

*Reviewed by A. Dan Tarlock\**

The Forest Service is charged with managing our nation's public timber resources. To accomplish this, the agency must balance competing demands from industry for increased timber sales, from the recreation industry for more intense development of outdoor recreation areas, and from environmentalists for more wilderness and wildlife protection areas. This balancing is done through the statutory authority to classify public lands under its jurisdiction for various uses and to adopt management plans.<sup>1</sup> In this manner the Forest Service determines the allocation of a substantial part of our forest resources. This broad power has long been acknowledged, but until recently it has not been subjected to careful legal analysis, let alone judicial scrutiny. Heir to a long and proud tradition stemming from the progressive conservation era, the Service is the classic example of the expert management agency. It has developed a strong concept of non-political resource management in the public interest. This professionalism combined with the vagueness of the agency's organic legislation has helped to shield the Service from legal scrutiny.

Today the Forest Service no longer enjoys a broad immunity from criticism. In recent years the Service has become embroiled in a series of bitter environmental controversies over the use of the lands it manages. Decisions to allow ski resorts in scenic areas,<sup>2</sup> to harvest timber

*From the Forest to the Sea - Public Lands Management and Marine Spatial Planning* Morgan Gopnik, 2015-01-09 The management of common pool resources and publicly owned areas is fraught with difficulty This book explores the long complex and frequently contentious history of public lands management in the United States in order to draw lessons for the emerging field of marine spatial planning MSP The author first establishes that these two seemingly different settings are in fact remarkably similar drawing on established theories of policy analysis The work then examines

the management of US National Forests over the past 120 years including three place based case studies to discover recurring themes The analysis shows how different management approaches evolved over time in response to changing laws and cultural norms producing outcomes favored by different constituencies This history also reveals the ambiguities and contradictions inherent in multiple use management of any public space Next the book analyzes recent efforts to advance MSP both in the US and globally showing how they mirror past experiences in National Forest management including similar disagreements among stakeholders In conclusion the author suggests how those within ocean related sectors government academia industry and environmental groups might achieve their individual and collective goals more effectively based on lessons from the public lands setting
