**For a Philosophy of Freedom and Strife** Günter Figal,1998-01-01 This first book length work of the prominent German philosopher Gunter Figal to appear in English offers a radical defense of metaphysical philosophy in the era of postmodern thought For Figal metaphysics does not represent an anachronistic and pernicious mode of thought that ought to be overcome but rather is a type of thinking that proceeds from a recognition of the necessary coherence of everything with its opposite It is this agonistic relationship of opposites that Figal following Heraclitus terms strife Rather than regarding the conflict of opposites as necessarily resulting in the dissolution of meaning and sense as many contemporary thinkers maintain Figal contends that sense and meaning can only come into existence metaphysically that is to say as a consequence of strife And the context within which strife occurs is freedom Using these concepts of strife and freedom Figal proposes new and provocative readings of Plato Hegel Nietzsche and Kierkegaard as well as of some of the most controversial figures of twentieth century philosophy

**Postcolonial Theory and Crisis** Paulo de Medeiros,Sandra Ponzanesi,2024-04-01 In the millennial transition the prefix post had come to signify more and more not just the realisation of a coming after but also of the impossibility of not seeing the present as still very much working through the wounds of the past Yet with the appearance of pseudo concepts such as post truth after an equally imaginary death of History the logic of the post itself always already under questioning may appear to have outlived its usefulness How to make sense of postcolonial theory in Europe in the present One way might be to renew its significance as world conflicts have entered a new post imperial phase with the return of ideologies of empire in various parts of the world The essays in this volume address those questions at both a conceptual theoretical level and through the analysis of specific case studies In the Introduction Paulo de Medeiros and Sandra Ponzanesi review the main questions outlined above in relation to the current debates in the Humanities from their respective disciplinary perspectives The volume is organised in four sections each containing four chapters Even though all the chapters present a reflection on Postcolonial Theory and Crisis some focus more specifically on aspects of the crisis in a global perspective such as humanitarian crisis and the role of mediatization of conflicts to issues related to human rights refugees migrancy environmental crisis to questions of memory and postmemory as well as the critique of art and utopian
