The French Budgetary Process:

The French Budgetary Process Guy Lord, 2023-04-28 Budget Processes and Commitment to Fiscal Discipline International Monetary Fund, 1996-07-01 This paper develops a political economy model of the budget process focusing on the common pool problem of the public budget We show that the externality arising from the fact that public spending tends to be targeted at individual groups in society while the tax burden is widely dispersed creates a bias towards excessive expenditures and debt This bias can be reduced by introducing elements of centralization in the budget process that is institutional structures that strengthen a comprehensive view of the budget over the particularistic view of the spending ministers and the members of parliament Using examples from EC countries we show how budget processes lack or possess such elements We then present empirical evidence supporting the claim that centralizing elements reduce the deficit bias The last section concludes with models for reform of the budget process Budgeting Aaron B. Wildavsky, 1986-01-01 In this completely revised edition of his classic work Aaron Wildavsky collects in one place the existing knowledge on budgeting Realistic budgets are an expression of practical politics Budgeting is so basic it reveals the norms by which men live in a particular political culture In dealing directly with the universe of governmental activity Wildavsky uses reliable accounts of how budgeting is carried on to capture a great deal of national political life The focus is explicitly comparative After developing a general theory of budgeting he analyzes four rich countries Britain France Japan and the United States followed by poor countries American cities and American states Wildavsky uses this analysis to develop and apply a cultural theory of budgeting explaining the degree of balance between revenue and expenditure why government grows in all industrial democracies and why there are still different rates of growth in spending He offers a critical evaluation of the first edition linking the ability of nations to make history and the various strategies of change they adopt to explain a wider range of budgetary processes **The Role of the Prime Minister in France, 1981-91** R. Elgie, 1993-10-06 The institution of the Prime Minister in France remains remarkably understudied There are many personalised accounts of the work of individual Prime Ministers and their relations with Presidents and government ministers However there has been no rigorous attempt to analyse the Prime Minister's overall influence in the decision making process The aim of this book is to examine the contemporary role of the Prime Minister in the French political system By so doing it provides a systematic analysis of the Prime Minister's influence over the policy making process from 1981 to 1991 **Contemporary Japanese Budget Politics** John Creighton Campbell, 1977 *Domestic Budgets in a United Europe* Mark Hallerberg, 2004 Under European Monetary Union member states lose the ability to steer their economies by manipulating monetary policy Domestic Budgets in a United Europe which explains the content evolution and effectiveness of fiscal institutions will be the definitive account of European budget reform in the late twentieth century Mark Hallerberg examines the making of budgets in EU countries from 1973 to 2000 and explores why those countries introduced fiscal rules when they did In 1993 when the fiscal policy criteria for

monetary union were first announced only Luxembourg and the Republic of Ireland would have qualified In 1997 only Greece failed Various explanations have been advanced for this rapid turnaround including luck a favorable economic climate reduced pressures on local budgets accounting tricks and the increasing pressures caused by international capital mobility Underlying these various explanations is a basic skepticism about whether countries in the European Union actively worked to reform their national budgeting procedures In rich case studies Hallerberg shows that the member states did indeed reform their budget institutions Many of them he finds had started that process long before the formal signing of the Maastricht Treaty of 1991 making domestic changes that allowed them to qualify individually under EMU criteria

Government Donald J. Savoie, 2022-05-22 Citizens have lost trust in their institutions of public governance In trying to fix the problem presidents and prime ministers have misdiagnosed the patient failing to recognize that government bureaucracies are inseparable from political institutions As a result career officials have become adroit at managing the blame game but much less so at embracing change Donald Savoie looks to the United States Great Britain France and Canada to assess two of the most important challenges confronting governments throughout the Western world the concentration of political power and the changing role of government bureaucracy The four countries have distinct institutions shaped by distinct histories but what they have in common is a professional non partisan civil service When presidents and prime ministers decide to expand their personal authority national institutions must adjust while bureaucracies grow to fill the gap paradoxically further constricting government efficacy The side effects are universal political power is increasingly centralized Parliament Congress and the National Assembly have been weakened Cabinet has lost standing political parties have been debased and civil services have been knocked off their moorings Reduced responsibility and increased transparency make civil servants

slow to take risks and politicians quick to point fingers Government astutely diagnoses the problem of declining trust in government presidents and prime ministers have failed to see that efficacy in government is tied to well performing institutions

Foreign Policy and Interdependence in Gaullist France Edward Morse, 2015-03-08 French foreign policy in the 1960 s seemed unique because it was dominated by the anachronistic ideals of Charles de Gaulle Edward L Morse argues that in fact the foreign policies of all highly modernized states are so similar that they can be described and explained by a general theory of interdependence He uses France as a case study of his theory and shows that what makes French foreign policy in this period so fascinating is the way in which the behavior of the President brought into sharp focus the problems interdependence poses for nation states The book is divided into two parts The first develops the theory of the conduct of foreign policy in any highly modernized society The second part tests the theory by examining such characteristics of French foreign policy as the erosion of the distinction between foreign and domestic affairs the constraints put on foreign policy by the growth of international economic interdependence which has also affected the autonomy of decision making in a purely national context the increased importance of foreign economic policy the questioning of governmental priorities in foreign affairs and the emergence of crisis management and manipulation as part of the routine procedures of foreign policy operations Edward L Morse s work is valuable both for the theory it offers and because it gives a balanced view of foreign
