The Freshman Sampler:

The Freshman Sampler Peggy B. Jolly, 1988-03-01 Narcissism and Entitlement David R. Champion, 2003 Champion's research relates narcissism Machiavellianism and entitlement to sexual aggression and explores the implications for criminology Champion examines the premise that sexually aggressive men possess distinct cognitively structured belief systems and sexual aggressors tend to be more narcissistic Machiavellian and sexually experienced than other men Champion postulates that entitling personality structures are associated with sexual aggression and speculates on the implications of this for future criminological study Moral Development in the Professions James R. Rest, Darcia Narvaez, 1994-11 Every year in this country some 10 000 college and university courses are taught in applied ethics And many professional organizations now have their own codes of ethics Yet social science has had little impact upon applied ethics This book promises to change that trend by illustrating how social science can make a contribution to applied ethics The text reports psychological studies relevant to applied ethics for many professionals including accountants college students and teachers counselors dentists doctors journalists nurses school teachers athletes and veterinarians Each chapter begins with the research base of the cognitive developmental approach especially linked to Kohlberg and Rest's Defining Issues Test Finally the book summarizes recent research on the following issues moral judgment scores within and between professions pre and post test evaluations of ethics education programs moral judgment and moral behavior models of professional ethics education and models for developing new assessment tools Researchers in different professional fields investigate different questions develop different research strategies and report different findings Typically researchers of one professional field are not aware of research in other fields An important aim of the present book is to bring this diverse research together so that cross fertilization can occur and ideas from one field can transfer to another College in Black and White Walter R. Althoen,1994-08-26 Statistics Concepts and Applications is a classical general statistics text written with a modern approach The authors bring mathematical theoretical and conceptual integrity to a body of topics and techniques that is appropriate to a first course in statistics and do so in a way that is accessible to students whose mathematical preparation does not go beyond the standard curriculum for college algebra An Instructor s Manual for Statistics Concepts and Applications is available directly from the publisher ISBN 0 521 46599 0 **The Essentials of Political Analysis** Philip H Pollock,Philip

H. Pollock III,Barry C. Edwards,2025-01-28 The Essentials of Political Analysis empowers students to conduct political research and interpret statistical results fostering important skills such as data analysis critical thinking and effective communication In this Seventh Edition bestselling authors Philip H Pollock III and Barry C Edwards not only make political analysis more accessible but also demonstrate its relevance and applicability *The Case Against the SAT* James

Crouse,Dale Trusheim,1988-03-31 The College Entrance Examination Board and the Educational Testing Service claim that the SAT helps colleges select students helps college bound students select appropriate institutions and furthers equality of opportunity But does it really Drawing on three national surveys and on hundreds of studies conducted by colleges the authors refute the justifications the College Board and the ETS give for requiring high school students to take the SAT They show that the test neither helps colleges and universities improve their admissions decisions nor helps applicants choose schools at which they will be successful They outline the adverse effect the SAT has on students from nonwhite and low income backgrounds They also question the ability of the College Board and the ETS to monitor themselves adequately The authors do not however recommend abolishing either college admissions testing or the College Board and the ETS Rather they propose dropping the SAT and relying on such already available measures as students high school coursework and grades and they raise the possibility that new achievement tests that measure the mastery of high school courses could be developed to replace the SAT **The Diversity Challenge** James Sidanius,Shana Levin,Colette Van Laar,David O.

Sears,2008-11-14 College campuses provide ideal natural settings for studying diversity they allow us to see what happens when students of all different backgrounds sit side by side in classrooms live together in residence halls and interact in one social space By opening a window onto the experiences and evolving identities of individuals in these exceptionally diverse environments we can gain a better understanding of the possibilities and challenges we face as a multicultural nation The Diversity Challenge the largest and most comprehensive study to date on college campus diversity synthesizes over five years worth of research by an interdisciplinary team of experts to explore how a highly diverse environment and policies that promote cultural diversity affect social relations identity formation and a variety of racial and political attitudes The result is a fascinating case study of the ways in which individuals grow and groups interact in a world where ethnic and racial difference is the norm The authors of The Diversity Challenge followed 2 000 UCLA students for five years in order to see how diversity affects identities attitudes and group conflicts over time They found that racial prejudice generally decreased

with exposure to the ethnically diverse college environment Students who were randomly assigned to roommates of a different ethnicity developed more favorable attitudes toward students of different backgrounds and the same associations held for friendship and dating patterns By contrast students who interacted mainly with others of similar backgrounds were more likely to exhibit bias toward others and perceive discrimination against their group Likewise the authors found that involvement in ethnically segregated student organizations sharpened perceptions of discrimination and aggravated conflict between groups The Diversity Challenge also reports compelling new evidence that a strong ethnic identity can coexist with a larger community identity students from all ethnic groups were equally likely to identify themselves as a part of the broader UCLA community Overall the authors note that on many measures the racial and political attitudes of the students were remarkably consistent throughout the five year study But the transformations that did take place provide us with a wealth of information on how diversity affects individuals groups and the cohesion of a community Theoretically informed and empirically grounded The Diversity Challenge is an illuminating and provocative portrait of one of the most diverse college campuses in the nation The story of multicultural UCLA has significant and far reaching implications for our nation as we face similar challenges and opportunities on a much larger scale
