The Future Of Urban Form The Impact Of New Technology

Michael Marien

The Future Of Urban Form The Impact Of New Technology:

The Future of Urban Form John Brotchie, Peter Newton, Peter Hall, Peter Nijkamp, 2017-10-12 This book first published in 1985 explores the ways in which the editors and contributors predicted the urban system shaped by emerging technologies would look like both nationally and internationally The technological changes covered include automation in the secondary sector the effects of energy price rises and threats of shortage and substitution effects in the energy and vehicle technology areas Social and economic factors discussed include unemployment patterns urban activities and lifestyles and their interactions This title will be of interest to students of urban studies The Planning Imagination Mark

Tewdwr-Jones, Nicholas Phelps, Robert Freestone, 2013-10-01 Knighted in 1998 for services to the Town and Country Planning Association and in 2003 named by Her Majesty Queen Elizabeth II as a Pioneer in the Life of the Nation Peter Hall is internationally renowned for the breadth and depth of his studies and writings on urban and regional planning For the last 50 years he has captured and helped to create the planning imagination Here the editors have brought together in five themes a series of critical reflections on Peter's vast and diverse contributions Those reflections are provided by colleagues familiar with his work The five parts are devoted to Peter Hall's breadth of academic work covering the history of cities and planning London spatial planning connectivity and mobility and urban globalization Finally as a sixth part the editors have asked Peter Hall himself to reflect on his career and the sources of his imagination The story this book tells is not one of a singular totally consistent theoretical and philosophical view elaborated over several decades Rather it covers a set of views that necessarily admits signs of Peter's inconsistency and imperfection over the years the insights and imperfections that inevitably accompany the exercise of a nonetheless remarkably fertile restless and inspiring planning imagination The Uncertain Future of the Urban Core Christopher M. Law, 2017-10-12 Originally published in 1988 Inner city problems in advanced countries are being exacerbated by the decentralisation of economic activities and higher income groups Only offices and tourism offer some prospects of growth but these vary in their potential from one city to another This book assesses changes in the structure of urban areas concentrating on the process of decentralisation and the consequences for the inner city and city centre It examines and evaluates policies and makes suggestions for the future management of the city

International Handbook of Urban Policy H. S. Geyer, 2011 This important Handbook reveals that most urban growth takes place in the less developed world and much of it represents over urbanization that is urbanization in which most migrants cannot effectively compete for employment cannot find adequate shelter and do not have the means to feed themselves properly Yet compared to rural poverty urban poverty is widely regarded as the lesser of the two evils H S Geyer and his contributors highlight the enormous challenges posed by urbanization to decision makers at all levels of government This final volume in a series of three original reference works covers four broad themes including urban growth patterns spatial issues policy issues and urban growth determinants The chapters have been written not only for the advanced student

and academics but also with undergraduate students in mind The Handbook will appeal to scholars and researchers interested in international urban development issues

Technological Change, Employment and Spatial Dynamics

Peter Nijkamp, 2012-12-06

East West Perspectives on 21st Century Urban Development John Brotchie, Peter

Newton, Peter Hall, John Dickey, 2019-01-15 Published in 1999 Analyzing and chronicling the continued development of key information communication and fast transport networks at a global and regional level this book looks at the transition to an information based economy and its urban impacts at a global regional and city level The book outlines the change by defining it as the third great societal transition in the history of human settlement and points to key factors that have fuelled progress These include the growth of global telecommunications and fast transport networks the coming together of information and communication technologies and their links to transport and land use the shift to information and knowledge as a resource base for new industries the increasing movement of people and information the emergence of cities as economic entities network nodes and centres for generating exchanging and processing information and most significantly the competition among cities for these new key elements of the urban economy

Healthy Cities Namir Khan, Willem H. Vanderburg, 2001 Modern cities can be designed to constitute a more supportive environment for a great many activities provide a more livable habitat and reduce the burden imposed on the biosphere They can be made healthier in terms of the definition by World Health Organization and more sustainable by means of new and emerging preventive approaches Healthy Cities focuses on those preventive approaches that can make cities healthier and more sustainable This book as well as the two companion volumes Sustainable Energy and Sustainable Production is the result of a twelve year research project carried out at the Center for Technology and Social Development at the University of Toronto The research findings led to the development of a new conceptual framework and strategy aimed at converting technological and economic growth into development that would gradually become more sustainable

The Palgrave Encyclopedia of Urban and Regional Futures Robert C. Brears, 2023-01-13 While urban settlements are the drivers of the global economy and centres of learning culture and innovation and nations rely on competitive dynamic regions for their economic social and environmental objectives urban centres and regions face a myriad of challenges that impact the ways in which people live and work create wealth and interact and connect with places Rapid urbanisation is resulting in urban sprawl rising emissions urban poverty and high unemployment rates housing affordability issues lack of urban investment low urban financial and governance capacities rising inequality and urban crimes environmental degradation increasing vulnerability to natural disasters and so forth At the regional level low employment low wage growth scarce financial resources climate change waste and pollution and rising urban peri urban competition etc are impacting the ability of regions to meet socio economic development goals while protecting biodiversity The response to these challenges has typically been the application of inadequate or piecemeal solutions often as a result of fragmented decision making and competing priorities with numerous economic environmental and social consequences In response there is a growing movement towards viewing cities and regions as complex and sociotechnical in nature with people and communities interacting with one another and with objects such as roads buildings transport links etc within a range of urban and regional settings or contexts This comprehensive MRW will provide readers with expert interdisciplinary knowledge on how urban centres and regions in locations of varying climates lifestyles income levels and stages development are creating synergies and reducing trade offs in the development of resilient resource efficient environmentally friendly liveable socially equitable integrated and technology enabled centres and regions

Augmented Urban Spaces Fiorella De Cindio, 2016-04-08 There have been numerous possible scenarios depicted on the impact of the internet on urban spaces Considering ubiquitous pervasive computing mobile wireless connectivity and the acceptance of the Internet as a non extraordinary part of our everyday lives mean that physical urban space is augmented and digital in itself This poses new problems as well as opportunities to those who have to deal with it This book explores the intersection and articulation of physical and digital environments and the ways they can extend and reshape a spirit of place It considers this from three main perspectives the implications for the public sphere and urban public or semi public spaces the implications for community regeneration and empowerment and the dilemmas and challenges which the augmentation of space implies for urbanists Grounded with international real life case studies this is an up to date interdisciplinary and holistic overview of the relationships between cities communities and high technologies

Driverless Urban Futures AnnaLisa Meyboom, 2018-12-07 Since the industrial revolution innovations in transportation technology have continued to re shape the spatial organization and temporal occupation of the built environment Today

autonomous vehicles AVs also referred to as self driving cars represent the next disruptive innovation in mobility with particularly profound impacts for cities At a moment of the fast paced development of AVs by auto making companies around the world policymakers planners and designers need to anticipate and address the many questions concerning the impacts of this new technology on urbanism and society at large Conceived as a speculative atlas a roadmap to unknown territories this book presents a series of drawings and text that unpack the potential impacts of AVs on scales ranging from the metropolis to the street The work is both grounded in a study of the history of urban transportation and current trajectories of technological innovation and informed by an open ended attitude of future envisioning and design Through the drawings and essays Driverless Urban Futures invites readers into a debate of how our future infrastructure could benefit all members of the public and levels of society

Future Forms and Design For Sustainable Cities Mike Jenks,Nicola Dempsey,2006-08-11

Concentrating on the planning and design of cities the three sections take a logical route through the discussion from the broad considerations at regional and city scale to the larger city at high and lower densities through to design considerations on the smaller block scale Key design issues such as access to facilities access for sunlight life cycle analyses and the impact of communications on urban design are tackled and in conclusion the research is compared to large scale design examples that have been proposed and or implemented over the past decade to give a vision for the future that might be achievable
