The Gaia Syndrome:

The Gaia Syndrome V. Merle Ricardo,2016-05-12 Before the pantheon of gods led by Zeus on Mount Olympus there was the yawning void of Chaos From this chaos there emerged Gaia the Earth goddess Gaia watches over Earth and with the passing of time becomes concerned She fears that human beings have become greedy and destructive She engages her chief of staff Solon to harvest teenagers from various places on Earth They are to be subjected to ever increasing degrees of endurance The survivors are then to be released in pods to save the Earth from a return to Chaos but will any of them survive this Spartan existence

The Gaia Syndrome Chris Wills,2002-01-01 When deadly epidemics rise up all over Earth and threaten to make humans extinct scientists develop a theory they call the Gaia Syndrome Mother Nature has had enough of mankind and is fighting back To save humanity another planet must be found to support life

The Boiled Frog Syndrome Thomas Saunders,2003-04-28 The Boiled Frog Syndrome presents compelling evidence to show that the source of the majority of the Western diseases of civilisation that have multiplied over the past 100 years ranging from cancers to debilitating sicknesses and allergies can be traced to the modern built environment our increasing exposure to electromagnetic radiation and the indiscriminate use of untested advanced technology It is also due in part to the 20th century s repudiation of perennial wisdom

Landscapes and Societies I. Peter Martini, Ward Chesworth, 2010-11-09 This book contains case histories intended to show how societies and landscapes interact The range of interest stretches from the small groups of the earliest Neolithic through Bronze and Iron Age civilizations to modern nation states The coexistence is of its very nature reciprocal resulting in changes in both society and landscape In some instances the adaptations may be judged successful in terms of human needs but failure is common and even the successful cases are ephemeral when judged in the light of history Comparisons and contrasts between the various cases can be made at various scales from global through inter regional to regional and smaller scales At the global scale all societies deal with major problems of climate change sea level rise and with ubiquitous problems such as soil erosion and landscape degradation Inter regional differences bring out significant detail with one region suffering from drought when another suffers from widespread flooding For example desertification in North Africa and the Near East contrasts with the temperate countries of southern Europe where the landscape effects of deforestation are more obvious And China and Japan offer an interesting comparison from the standpoint of geological hazards to society large unpredictable and massively erosive rivers in the former case volcanoes and accompanying earthquakes in the latter Within the North African region localized climatic changes led to abandonment of some desertified areas with successful adjustments in others with the ultimate evolution into the formative civilization of Egypt the Gift of the Nile At a smaller scale it is instructive to compare the city states of the Medieval and early Renaissance times that developed in the watershed of a single river the Arno in Tuscany and how Pisa Siena and Florence developed and reached their golden periods at different times depending on their location with regard to proximity to the sea to the main trunk of the river or in the adjacent hills Also noteworthy is the role of technology in opening up opportunities for a society Consider the Netherlands and how its history has been formed by the technical problem of a populous society dealing with too much water as an inexorably rising sea threatens their landscape or the case of communities in Colorado trying to deal with too little water for farmers and domestic users by bringing their supply over a mountain chain These and others cases included in the book provide evidence of the successes near misses and outright failures that mark our ongoing relationship with landscape throughout the history of Homo sapiens The hope is that compilations such as this will lead to a better understanding of the issue and provide us with knowledge valuable in planning a sustainable modus vivendi between humanity and landscape for as long as possible Audience The book will interest geomorphologists geologists geographers archaeologists anthropologists ecologists environmentalists historians and others in the academic world Practically planners and managers interested in landscape environmental conditions will find interest in these pages and more generally the increasingly large body of opinion in the general public with concerns

about Planet Earth will find much to inform their opinions Extra material The color plate section is available at <http://extras.springer.com>

Science Fact and Science Fiction Brian Stableford, 2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed

Gaia's Quantum Leap Marko Pogačnik, 2011 Like the bestselling Waldorf Kindergarten Snack Book and the Waldorf School Book of Soups this cookbook in the series provides yet another a rich resource for spending time in the kitchen with young children this time baking bread What child doesn't like to feel and knead bread dough watch it rise and then taste it fresh from the oven Not only is such hands on sensory experience fun for everyone it is also invaluable to young children as they continue to incarnate into our world These recipes have been handed down by grandmothers mothers aunts and friends They are easy to follow and encourage the baker young and older alike to use the best possible ingredients making bread once again the healthy staff of life it once was The Waldorf Book of Breads includes tasty breads for the daily table and specialty breads for the seasons and special occasions And like the Waldorf snack book and the book of soups The Waldorf Book of Breads is spiral bound so it lies flat to make life in the kitchen a little easier Artist Jo Valens provides delightful illustrations to accompany the many recipes for delicious breads

Earth Jurisprudence Peter D. Burdon, 2014-09-19 The idea of human dominion over nature has become entrenched by the dominant rights based interpretation of private property Accordingly nature is not attributed any inherent value and becomes merely the matter of a human property relationship *Earth Jurisprudence Private Property and the Environment* explores how an alternative conception of property might be instead grounded in the ecocentric concept of an Earth community Recognising that human beings are deeply interconnected with and dependent on nature this concept is proposed as a standard and measure for human law This book argues that the anthropocentric institution of private property needs to be reconceived drawing on international case law indigenous views of property and the land use practices of agrarian communities Peter Burdon considers how private property can be reformulated in a way that fosters duties towards nature Using the theory of earth jurisprudence as a guide he outlines an alternative ecocentric description of private property as a relationship between and among members of the Earth community This book will appeal to those researching in law justice and ecology as well as anyone pursuing an interest more particularly in earth jurisprudence
