Bioceramics and Biocomposites Iulian Antoniac,2019-04-04 Provides comprehensive coverage of the

research into and clinical uses of bioceramics and biocomposites. Developments related to bioceramics and biocomposites appear to be one of the most dynamic areas in the field of biomaterials with multiple applications in tissue engineering and medical devices. This book covers the basic science and engineering of bioceramics and biocomposites for applications in dentistry and orthopedics as well as the state of the art aspects of biofabrication techniques, tissue engineering, remodeling and regeneration of bone tissue. It also provides insight into the use of bionanomaterials to create new functionalities when interfaced with biological molecules or structures. Featuring contributions from leading experts in the field, *Bioceramics and Biocomposites: From Research to Use in Clinical Practice* offers complete coverage of everything from extending the concept of hemopoietic and stromal niches to the evolution of bioceramic based scaffolds. It looks at perspectives on and trends in bioceramics in endodontics and discusses the influence of newer biomaterials use on the structuring of the clinician's attitude in dental practice or in orthopedic surgery. The book also covers such topics as biofabrication techniques for bioceramics and biocomposites, glass ceramics, calcium phosphate coatings, brain drug delivery, bone substitutes and much more. Presents the biggest trends in bioceramics and biocomposites relating to medical devices and tissue engineering products. Systematically presents new information about bioceramics and biocomposites, developing diagnostics and improving treatments and their influence on the clinicians' approaches. Describes how to use these biomaterials to create new functionalities when interfaced with biological molecules or structures. Offers a range of applications in clinical practice including bone tissue engineering, remodeling and regeneration. Delineates essential requirements for resorbable bioceramics. Discusses clinical results obtained in dental and orthopedic applications. *Bioceramics and Biocomposites: From Research to Use in Clinical Practice* is an excellent resource for biomaterials scientists and engineers, bioengineers, materials scientists and engineers. It will also benefit mechanical engineers and biochemists who work with biomaterials scientists.

Women's Fiction Rebecca Vnuk, Nanette Donohue, 2013-09-17. Offering a fresh perspective on women's fiction for a broad reading audience, fans as well as librarians, this book defines and maps the genre and describes hundreds of relevant titles. *Women's Fiction: A Guide to Popular Reading Interests* celebrates the books in this broad genre, titles that explore the lives of female protagonists with a focus on their relationships with family, friends and lovers. After a brief introductory history and a chapter that defines the characteristics of women's fiction, the author showcases annotations and suggestions of approximately 300 titles by more than 100 authors. She explains how women's fiction differs from romance fiction, enabling readers to appreciate this rich body of literature that encompasses titles as diverse as Meg Cabot's lighthearted chick lit to the more serious novels of Elizabeth Berg and Maeve Binchy. The book identifies some of the most popular and enduring women's fiction authors and titles and provides invaluable reading lists and read-alike suggestions that will be appreciated by both librarians and general readers.

Study on the Enterprise Growth Under the Transformation Economy Environment Wendong Shi, 2009-11. Since the end of the 1970s and the beginning of the 1980s, with the political and economic system changes in the world, some

enterprises being operated on the basis of market mechanism have emerged in the economy which once implemented the planning resource allocation such as former Soviet Union countries in eastern Europe and Mainland China countries in Southeast Asia such as Vietnam. As the operation mode which complies with the market mechanism is adopted early in terms of the property right and operation mechanism, these enterprises grow rapidly under the loose regulation of the government and in the rapid development of the domestic market. However, with the competition intensified and the internationalization degree increased in the domestic market of the transitional economy, a large number of enterprises have suffered declined business, insolvency, bankruptcy or even winding up since the 1990s. Some enterprises which grow rapidly in the 1980s are deep in the business operation crisis or even go bankrupt in the middle and later stage of 1990s. This is best demonstrated by the companies which are listed at Shenzhen Stock Exchange Mainland China in the early stage. According to the report in International Finance News, March 6, 2002, 9 local listed companies in Shenzhen suffered losses in 2000, accounting for 9.38% of the total loss incurring listed companies in the country in that year. Afterwards, the number of loss incurring enterprises in 2001 increases to 12, accounting for 11.88% of the total listed companies in the country. In addition, according to the statistics of Shenzhen Stock Exchange, of the 9 loss incurring local listed companies in Shenzhen in 2000, 6 of them undergo the system reform and are listed before 1993, and of the 12 loss incurring local listed companies in Shenzhen in 2001, 7 of them undergo the system reform and are listed before 1993. In 2002, of the 67 A share listed companies in Shenzhen, there are 8 ST companies accounting for 11.94%.
