in cultural research Alan Jabbour former director of the American Folklore Society Library of Congress Prior to the 1960s quilting thrived in the Tennessee Delta as a crucial source of warm bedcovers among cash poor yet self sufficient farm households As agriculture mechanized rural workers switched to factory jobs and could afford nicer houses and blankets Quilting survived because women both black and white reinvented it as a hobby that met personal and social needs Though scholars have studied quilt styles with rural southern roots few have considered black and white quilters together or as part of a shared regional culture In Tennessee Delta Quilting Teri Klassen traces how mid twentieth century common quilts developed from nineteenth century styles Through interviews with people from rural households Klassen uncovers the ways in which designs and labor were shared and the ways in which quilting was part of the small farm culture that was common to blacks and whites While quilting was a creative form passed down in families limited means and accessible materials made it both a necessity and a highly evolved custom in southwestern Tennessee s upper Delta region For families in this region the quilt symbolized homemaker competence and self reliance a trait especially valued by sharecroppers and tenant farmers who owned no land The culture of quilting reflected living conditions and values of these folk and Klassen details numerous changes in this culture from how it contributed to small farm stability to how industrialization affected the practice By considering quilting s practical aesthetic and social aspects in a historical mixed race context Tennessee Delta Quilting makes a unique contribution to the study of the Tennessee Delta and the understanding of common quilt design TERI KLASSEN is a postdoctoral research associate at the Mathers Museum of World Cultures at Indiana University Her articles have appeared in Journal of American Folklore Midwestern Folklore and Journalism Quarterly
