 Wyatt, 2018-10-10 Far from heralding their demise digital technologies have led to a dramatic transformation of the public  
 library Around the world libraries have reinvented themselves as networked hubs community centres innovation labs and  
 makerspaces Coupling striking architectural design with attention to ambience and comfort libraries have signaled their  
 desire to be seen as both engines of innovation and creative production and hearts of community life This book argues that  
 the library's transformation is deeply connected to a broader project of urban redevelopment and the transition to a  
 knowledge economy In particular libraries have become entangled in visions of the smart city where densely networked  
 ubiquitous connectivity promises urban prosperity built on efficiency innovation and new avenues for civic participation  
 Drawing on theoretical analysis and interviews with library professionals policymakers and users this book examines the  
 inevitable tensions emerging when a public institution dedicated to universal access to knowledge and a shared public  
 culture intersects with the technology driven entrepreneurialist ideals of the smart city **Smart, Resilient and**

 overview of current large scale and urban strategies to counterbalance climate change so far undertaken in different  
 geographical contexts Europe United States China Africa and Australia shedding light on the different approaches on the  
 different weights assigned to mitigation and adaptation issues as well as on the main barriers hindering their effectiveness  
 and translation into measurable outcomes Opportunities and criticalities arising from the rich sprawled and blurred  
 landscape of current strategies and initiatives in the face of climate change pave the way to a discussion on the lessons learnt  
 from current initiatives and provide new hints for developing integrated climate strategies capable to guide planners and  
 decision makers towards a climate sensitive urban development *Smart Resilient and Transition Cities Emerging Approaches*  
*and Tools for Climate Sensitive Urban Development* merges a scientific approach with a pragmatic one Through a case study  
 approach the Authors explore strengths and weaknesses of institutional and informal practices to foreshadow innovative  
 paths for an adaptive process of urban governance in the face of climate change The book guides the reader along new  
 governance paths characterized by continuous learning and close cooperation and communication among different actors  
 and stakeholders and in so doing helps them to overcome current siloed approaches to climate issues Links resilience smart
