Studies in Ancient Greek Topography W. Kendrick Pritchett, 1989-04-25 Professor Pritchett continues his study of topographical data to test the veracity of Greek historians This sixth volume focuses on Pansanias's account of the sites in the Thyreatis on the historical record on the use of the Thermopylai pass and on Polybios's accounts of Philip V's march across the Peloponnesos in 219 B C and on Thermon in 218 B C with new identifications proposed for sites in Arkadia and Aitolia

Topography and History of Ancient Epicnemidian Locris José Pascual, Maria-Foteini Papakonstantinou, 2013-09-26 This book presents the results of a major project carried out by a team from the Universidad Autónoma de Madrid and the 14th Ephorate of Prehistoric and Classical Antiquities at Lamia The book gives a full picture of a extensive area of Greece known as Epicnemidian Locris on which very little has been studied and published in the past Its relevance in historical times was due to its natural environment and mainly on the pass at Thermopylae which marked the physical boundary between central northern Greece and the south being the scene of repeated conflicts The book offers a complete picture of what Epicnemidian Locris was like in the past its geography topography frontiers and the ancient settlements of the region

Polybius, Rome and the Hellenistic World Frank W. Walbank, 2002-09-05 This volume contains nineteen of the more important of Frank Walbank's essays on Polybius and is prefaced by a critical discussion of the main aspects of work done on that author Several of these essays deal with specific historical problems for which Polybius is a major source Five deal with Polybius as an historian and three with his attitude towards Rome one of these raises the question of treason in relation to Polybius and Josephus Finally two papers discuss Polybius later fortunes in England up to the time of John Dryden and in twentieth century Italy in the work of Gaetano de Sanctis Several of these essays originally appeared in journals and collections not always easily accessible and all students of the ancient Mediterranean world will welcome their assembly within a single volume

Xenophon's Spartan Constitution Michael Lipka, 2012-08-09 This work presents a new critical edition of The Spartan Constitution a treatise in state philosophy attributed to the historian Xenophon c 430 c 355 B C The Greek text reconstructed on the basis of extant manuscript sources is prefaced by an introduction and supplemented by a critical commentary and an English translation The introduction discusses the problem of the text's authenticity and dating and provides a comprehensive account of its sources reception language style and structure as well as an analysis of the manuscript sources and the textual tradition The commentary addresses linguistic as well as historical problems

Studies in the Topography of Sikyonia George John Lolos, 1998 Even More Studies in the Ancient Greek Polis Thomas Heine Nielsen, 2002 A series of new Papers from the Copenhagen Polis Centre Among other things these important papers discuss the role and function of theatres in the Greek world the nature of early Cretan laws how Greeks and indigenous peoples interacted on Sicily and in Magna Graecia and whether or not the modern concept of Aethere stateless society applies to the ancient Greek polis Contents Mogens Herman Hansen The Game Called Polis Mogens Herman Hansen Was the Polis a State

 Inscriptions and Papyri General Index *The Fortifications of Arkadian City States in the Classical and Hellenistic Periods*
 Matthew Maher, 2017 This illustrated study comprises a comprehensive and detailed account of the historical development of
 Greek military architecture and defensive planning specifically in Arkadia in the Classical and Hellenistic periods Employing
 data gathered from the published literature and collected during the field reconnaissance of every site the fortification circuit
 of each Arkadian polis is explored In this way the book provides an accurate chronology for the walls in question an
 understanding of the relationship between the fortifications and the local topography a detailed inventory of all the fortified
 poleis of Arkadia a regional synthesis based on this inventory and the probable historical reasons behind the patterns
 observed through the regional synthesis Maher argues that there is no evidence for fortified poleis in Arkadia during the
 Archaic period However when the poleis were eventually fortified in the Classical period the fact that most appeared in the
 early fourth century BC strategically distributed in limited geographic areas suggests that the larger defensive concerns of
 the Arkadian League were a factor Although the defensive responses to innovations in siege warfare and offensive artillery of
 the Arkadian fortifications follow the same general developments observable in the circuits found throughout the Greek
 world there does exist a number of interesting and noteworthy regionally specific patterns Such discoveries validate the
 methodology employed and clearly demonstrate the value of an exclusively regional focus for shedding light on a number of
 architectural topographical and historic issues **Excursions in Epichoric History** Thomas J. Figueira, 1993 In a test case
 for the study of epichoric Greek history that not centered on Athens and Sparta Thomas Figueira deploys a range of
 disciplinary methodologies to explore the political history of the ancient island city state of Aigina down to the Roman
 conquest of Greece Excursions in Epichoric History combines previously published articles revised and updated and new
 essays to provide a set of alternative perspectives on the course of Greek foreign policy and institutional history **The
 Politics of Plunder** Joseph B. Scholten, 2000-05-08 Between 279 and 229 B C the Aitolian koinon a federation of mountain
 cantons in west central Greece expanded to incorporate many of the neighboring lands and peoples lying between the
 Adriatic and Aegean Seas This new political configuration contributed to the development of modern systems of federal
 democracy based on proportional representation Despite these institutional advances the Aitolians and their polity are
 reviled in the ancient historical tradition which views them as backward semi barbarous brigands The Politics of Plunder is
 the first English language book in over a century to examine the political history of the Aitolian koinon in its era of expansion

Joseph Scholten presents a chronological reconstruction of the koinon's course of expansion synthesizing a number of recent studies covering Aitolian topography epigraphy and institutional development that help to compensate for deficiencies in the ancient narrative record His study is the first to ask how a people and a polity so detested by their contemporaries succeeded in making such fundamental contributions to their regional political culture Scholten's careful investigation charts a middle course that neither whitewashes the Aitolians nor credulously accepts the biased ancient tradition This balanced approach provides a much needed fresh perspective on the Aitolians and their koinon Discussing the history of the ancient Aegean Greek world and the political economic and social history of the Hellenistic Era this book will interest anyone concerned with those subjects or fascinated by the development of ancient Greek political institutions and theories particularly federalism
