Government-wide Index to Federal Research & Development Reports ,1966-03 R&d Investment Of Multinational Corporations And China's Independent Innovation Wen Xiao, Jiadong Pan, Gaobang Lin, 2020-09-17 China has attracted a huge amount of investment in R D

internationalization of multi national corporations MNCs which is playing an important role in its economy Constrained by natural resources China has to attach more importance to technological progress and indigenous innovation in order to move beyond the old economic growth model Technology seems inaccessible to outsiders which prevents others from doing research in a comprehensive and systematic manner In this book technology is regarded as a factor of production that is allocated by MNCs across the world to maximize profits Such rational economic behavior serves as our entry point to enhance existing theoretical achievements on R D internationalization

Public Inquiries, Policy Learning, and the Threat of Future Crises Alastair Stark, 2018 In the aftermath of major crises governments turn to public inquiries to learn lessons Inquiries often challenge established authority frame heroes and villains in the public spotlight and deliver courtroom like drama to hungry journalists As such they can become high profile political stories in their own right Inquiries also have a policy learning mandate with big implications because they are ultimately responsible for identifying policy lessons which if implemented should keep us safe from the next big event However despite their high profile nature and their position as the pre eminent means of learning about crises we still know very little about what inquiries produce in terms of learning and what factors influence their effectiveness in this regard In light of this the question that animates this book is as important as it is simple Can post crisis inquiries deliver effective lesson learning which will reduce our vulnerability to future threats

Conventional wisdom suggests that the answer to this question should be an emphatic no Outside of the academy for example inquiries are regularly vilified as costly wastes of time that illuminate very little while inside social scientists echo similar concerns regularly describing inquiries as unhelpful These commentaries however lack robust generalizable evidence to support their claims This volume provides evidence from the first international comparison of post crisis inquiries in Australia Canada New Zealand and the United Kingdom which shows that contrary to conventional wisdom the post crisis inquiry is an effective means of policy learning after crises and that they consistently encourage policy reforms that enhance our resilience to future threats
