Christensen, 1995 Guidelines for clinical practice sometimes also termed practice policies receive increasing attention from
clinicians and health services as means for applying best current knowledge to maximise the quality and efficiency of
delivered care Earlier studies confirm the growing and widespread importance of this trend within medicine and the widely
recognised potential for healthcare telematics as a means to enable the use of clinical guidelines to deliver fullest benefits to
patients This book explores the scope and needs for further work in this area Listed by Biological Abstracts RRM BIOSIS
volume 47 issue 4 April 1994 the papers presented are wide ranging such that anyone with an interest in any aspect of
guideline development or application is likely to find something worthwhile It is therefore a book to dip into according to the
reader s interest Even clinicians with little knowledge of telematics will find several chapters on the principles of clinical
guidelines and protocols of interest while those from the field of telematics will find plenty of material regarding the
complexities of representation of clinical knowledge L Boydell S E Belfast Health and Social Services Trust Belfast UK

Interactive Technology and the New Paradigm for Healthcare Richard M. Satava, Karen Morgan, Hans B. Sieburg, 1995 This work contains the state of the art in Virtual Reality as applied to Medicine Interactive technology used in many research and development programs can be applied to health care by involving robotics computer vision simulation artificial intelligence image manipulation and storage data gloves man machine interfaces etc The Health Telematics Application Program for example is advancing virtual reality and enabling technologies simulation visualization and robotics in health care services for patients the elderly and persons with disabilities This book addresses the following items from the end user s perspective technology transfer telerobotics telemedicine education and training and virtual reality the book would be useful for those researching interactive technologies in health care especially virtual reality It would be also of interest to people who want to keep abreast of the latest developments in techno medical research Rod Elford Telemedicine Centre Memorial University St John s Newfoundland Canada Journal of Telemedicine and Telecare volume 2 no 3 1996 p 178 Covered by Current Contents Life Sciences ISI volume 38 no 34 August 1995 p 11 13

Systolic and Diastolic Function of the Heart Neil B. Ingels, George T. Daughters, Jan Baan, James W. Covell, Robert S.

Reneman, Frank C.P. Yin, 2006-12-15 The book addresses the meaning of the systolic function and diastolic function how these can best be measured and interpreted both now and in the future It also covers topics such as cardiac mechanics flow dynamics vascular properties neural control of cardiovascular systems and pharmacological interventions The book is of particular interest to biophysicists bioengineers cardiovascular physiologists and clinicians Health in the New Communications Age Maria Fernanda Laires, Maria Júlia Ladeira, Jens Pihlkjær Christensen, 1995 This book presents the state of the art and trends in Health Care Telematics the valuable results of the research and development work carried out by more than 50 projects during the AIM programme 1991 94 Project information regarding the dissemination and validation of the project results is elaborated and in the annex a full list of the participants in each project including contact details can be found The second part of the book focuses on the shift of paradigm in the Health Care sector within the Information Society This shift is characterised by a general turn from informatics towards multimedia telematics including the Health Care Telematics The new Telematics Application Programme under the Fourth Framework Programme for Research and Technological Development is user driven and focuses on the need for industry and users to collaborate and develop common solutions to secure validation and exploitation of the research results The book gives an insight into the state of the art in a world wide context and helps the reader to understand the trends in Health Telematics The target groups for reading the book are besides experts researchers and industry in the area as well as decision makers and potential users of Health Telematics Covered by Current Contents Life Sciences ISI volume 39 no 9 Februari 1996 p 15 18 The book gives insight into the state of the art in a worldwide context and helps the reader to understand current trends in European health telematics Health Informatics Europe volume 4 no 1 March 1996 p 14 **Healthcare Card Systems** A. Pernice, H. Doare, O. Rienhoff, 1995 This document includes reports and summaries of the deliverables produced by the different working groups in the context of the Eurocards Concerted Action The Eurocards Concerted Action is an Advanced Informatics in Medicine AIM Concerted Action on Patient Data Cards created in late 1993 and due to report early in 1995 An extension of Eurocards including two new working groups has been agreed upon to take into account the cooperation between the E U and Canada All of these documents have been consolidated and validated during a workshop gathering 25 experts from 11 countries The present document was issued during the Lisbon Health Telematics Conference as a background document of the IV Framework Programme It is composed of three main sections 1 A series of reports compiling the conclusions reached by the working groups of the EUROCARDS Concerted Action and their recommendations concerning the applications of data cards to healthcare systems 2 A collection of six booklets aimed at decision makers each of which is a summary of important aspects that need addressing when considering a data card implementation in healthcare 3 The final section comprises summaries of other questions largely developed in the deliverables a list of which is annexed or which consist of the work plan of the more recent working group A glossary giving the definitions of the different terms and concepts used throughout

the whole document is included *Data Security for Health Care* SEISMED Consortium, 1996 The efficiency of modern health care relies more and more upon a computerised infrastructure Open distributed information systems have started to bring professionals together from all over the world On the one hand easy processing and communication of images sound and texts will help to visualize and therefore treat illnesses and diseases efficiently on the other hand the very ease of access and use can threaten patient privacy accountability and health care professional secrecy Developments in community care are responsible for the fact that many aspects of patient care are delivered outside the closed walls of a hospital and hence patient records must also be accessible and updated throughout the community Therefore the introduction of information technology should focus primarily on the improvement of the health of patients or at least not putting patients health at risk This means that the right data has to be available to the right person at the right time availability Information technology deeply affects the confidential relationship between patient and doctor since it increasingly surrounds and mediates it Information systems in health care establishments are increasingly developing towards an integrated system where various users can interact and communicate The process of integration will cross the borders of local health care establishments and it will progressively expand e g into patients homes into a European health care community in order to support the mobility of patients the exchange of medical and administrative data transfer of bills and money
