Stained Glass ,2019-06-07 With many excellent books on medieval stained glass available the reader of this anthology may well ask what is the contribution of this collection In this book we have chosen to step away from national chronological and regional models Instead we started with scholars doing interesting work in stained glass and called upon colleagues to contribute studies that represent the diversity of approaches to the medium as well as up to date bibliographies for work in the field Contributors are Wojciech Balus Karine Boulanger Sarah Brown Elizabeth Carson Pastan Madeline H Caviness Michael W Cothren Francesca Dell Acqua Uwe Gast Fran oise Gatouillat Anne Granboulan Anne F Harris Christine Hediger Michel H rold Timothy B Husband Alyce A Jordan Herbert L Kessler David King Brigitte Kurmann Schwarz Claudine Lautier Ashley J Laverock Meredith P Lillich Isabelle Pallot Frossard Hartmut Scholz Mary B Shepard Ellen M Shortell Nancy M Thompson *The Cistercian Order in Medieval Europe* Emilia Jamroziak,2015-06-22 The Cistercian Order in Medieval Europe offers an accessible and engaging history of the Order from its beginnings in the twelfth century through to the early sixteenth century Unlike most other existing volumes on this subject it gives a nuanced analysis of the late medieval Cistercian experience as well as the early years of the Order Jamroziak argues that the story of the Cistercian Order in the Middle Ages was not one of a Golden Age followed by decline nor was the true Cistercian spirit exclusively embedded in the

early texts to remain unchanged for centuries Instead she shows how the Order functioned and changed over time as an international organisation held together by a novel management system from Estonia in the east to Portugal in the west and from Norway to Italy The ability to adapt and respond to these very different social and economic conditions is what made the Cistercians so successful This book draws upon a wide range of primary sources as well as scholarly literature in several languages to explore the following key areas the degree of centralisation versus local specificity how much the contact between monastic communities and lay people changed over time how the concept of reform was central to the Medieval history of the Cistercian Order This book will appeal to anyone interested in Medieval history and the Medieval Church more generally as well as those with a particular interest in monasticism

Reconstructing Past Monastic Life: Volume 1: Bioarchaeology, Life and Death Lluís Lloveras, Carme Rissech, Jordi Nadal, Philip Banks, 2025-07-30 Explores health and lifeways in monastic communities focusing on palaeopathological insights into well being disabilities and burial practices across various periods Monasticism is a form of religious life in which participants renounce worldly activities to dedicate themselves primarily to spiritual matters living in small communities subject to a set of rules and isolated from the secular world Christian monasticism which originated at the end of the 3rd century in Egypt and North Africa spread to different parts of Europe in the 6th century However it was not until the Middle Ages that monastic communities became one of the most powerful institutions in Europe Monasteries and convents played a very important role not only as centers of spirituality but also as focal points of economic technological and cultural activity This multiplicity of activities carried out alongside their religious social and political roles make monasteries spaces that can be studied from very different perspectives and that unfailingly provide essential information about our history This first of two titles originates from an international conference that took place in Barcelona in January 2024 which sought to examine different aspects related to monastic life in the past and to promote and disseminate the results obtained in the latest studies undertaken within the framework of monastic complexes and their environments These include contributions and multidisciplinary studies from archaeological bioanthropological and or documentary perspectives Specialists from different disciplines present developments on the topic of monasticism from different fields of study such as zooarchaeology bioanthropology palaeopathology archaeology history documentary disciplines archives cultural heritage etc Volume 1 concentrates on health and lifeways within monastic communities focusing on palaeopathological information providing insights into physical well being and in particular the presence and significance of disabled individuals and evidence for long term health and dental issues A variety of scientific methods of analysis are applied to cemetery populations from monasteries and nunneries of different periods to examine both causes of and contributions to the death of individuals the composition of communities and the treatment of the dead Studies of assemblages of faunal remains from monastic complexes consider how faunal analysis can help interpret the role of domestic species

Monastic Archaeology Graham Keevill, Mick Aston, Teresa Hall, 2017-01-31 The study of monasteries has

come a long way since late the late 19th century The emphasis has shifted away from reconstructing the layouts of monastic buildings to a better understanding of the wider monastic environment The papers in this volume partly based on a conference held in Oxford in 1994 are written by some of today s foremost scholars and reflect the diversity of research now being carried out
