Studies In Islamic Science And Polity:

Studies in Islamic Science and Polity Masudul Alam Choudhury, 1998 There has been a great revival of interest in recent years in the concerns of Islamic political economy after several hundred years of hiatus in its long history The independence of Muslim countries and the revival of Islamic movements around the world have been among the factors encouraging new interest among the Muslims and others in how economies and economic theory can be brought into line with the Islamic vision of a just society This text attempts to show that the contribution which Islamic political economy can make requires a study first of epistemological principles about the purpose and sources of knowledge the role of reason and the relationship between self and social interest in human affairs The conclusions which arise from this analysis about the role and limits of markets the goal of combining efficiency and equity and the means of doing so with state provision of welfare everywhere in crisis will prove illuminating all of those interested in Islamic studies and political economy as well as to other observers and analysts of contemporary society

Tawhidi Epistemology and its Applications Masudu Alam Choudhury, 2014-03-17 This journal has been discontinued Any issues are available to purchase separately

Islamic Epistemics and Socioeconomics Masudul Alam Choudhury, 2025-06-16 This book presents selected essays on the epistemological foundation of the Islamic world system in the light of the exegesis of the Qur'an to develop existing understandings of Islamic economics A selection of key contributions by one of the world's leading figures working at the nexus of Islamic social sciences Islamic philosophy and Islamic economics the book integrates applied foundations of Islamic economics and Islamic philosophy presenting a critical outlook on the existing state of Islamic economics and Islamic finance within a broader framework of socio-scientific enquiry philosophical perspectives on Islam and philosophy of science The author confronts the absence of epistemic groundwork upon which any fresh social and scientific enquiry is developing in Islamic economics casting the discussion within an explanatory framework of the unity of knowledge as bestowed by Islamic monotheistic law which substantively characterizes the generalization and details of everything The present work unravels

this objective methodology and its application with reference to a limited number of issues and problems in global economics. Complex and multidisciplinary in its treatment, this book presents the key arguments on mathematical, philosophical, and socio-scientific modes of inquiry in deriving, developing, and empirically applying the Qur'anic methodology of the unity of knowledge to economic problems. It is relevant to scholars and advanced students in social scientific studies of Islam, Islamic theology, and philosophy, and Islamic economics and finance.

Islamic Economics and Finance Masudul Alam Choudhury, 2011-01-27. This volume is a scholarly work on the foundations of the role that the moral and ethical law plays on human enterprise comprising economics, finance, society, and science. Divided into three parts: theoretical, empirical, and application, the study covers a vast area of socio-scientific investigation and is extensively comparative in perspective.

Learning Models for Innovation in Organizations: Examining Roles of Knowledge Transfer and Human Resources Management Soliman, Fawzy, 2013-12-31. In order to strive for a competitive advantage in their industry, organizations have begun achieving innovation through knowledge-driven learning models to ensure that organizational activities are efficient and effective. *Learning Models for Innovation in Organizations: Examining Roles of Knowledge Transfer and Human Resources Management* provides relevant theoretical frameworks and empirical research findings to enhance knowledge management and learning competencies for organizational activities. This book offers assistance and guidance to managers and professionals of innovation firms, learning organizations, and other work communities through tools, techniques, and strategic suggestions for improvement.

Socio-Cybernetic Study of God and the World-System Choudhury, Masudul Alam, 2013-10-31. In any field, whether scientific, business, or social, ethics plays a critical role in determining what is acceptable in a particular community and what is considered taboo. The source of these preconditions is often a complex interweaving of tradition and rational thought. *Socio-Cybernetic Study of God and the World-System* investigates morality in a socio-scientific worldview, examining the epistemology of existence in conjunction with Islamic monotheistic law to generate a world system that governs action and reaction in the context of a variety of cognitive and social environments. Readers with backgrounds in finance and economics can utilize this book to construct a more thorough theoretical understanding of their societal and professional associations.

Comparative Economic Theory Masudul Alam Choudhury, 2013-03-14. *Comparative Economic Theory: Occidental and Islamic Perspectives* seeks first to elucidate the nature and methodology of Islamic political economy as a process-oriented social economy guided by its cardinal epistemology of Oneness of God, Divine Unity. From this premise is then derived the episteme of unification of knowledge upon which is developed the methodological content of an extremely interactive, integrative, and revolutionary world view of political economy and a meta-theory of the socio-scientific order. Secondly, while laying out the building blocks of Islamic political economy and its much wider methodological implication for the socio-scientific order, this book offers a comparative study of Occidental thought in the same areas. Thirdly, topics of microeconomics and macroeconomic theory are covered. This book concludes with chapters on methodology and an

analytical postscript to show how the interactive integrative and evolutionary world view of knowledge induced systems described by the Islamic political economy presents new visions of scientific thinking

Studies on Ottoman Science and Culture Ekmeleddin İhsanoğlu, 2020-12-29 Studies on Ottoman Science and Culture brings together eleven articles by distinguished historian Ekmeleddin İhsanoğlu. The book addresses multiple issues related to the histories of science and culture during the Ottoman era. Most of the articles contained in this volume were the first contributions to their respective topics and they continue to provoke discussion and debate amongst academics to this day. The first volume of the author's collected papers that appeared in the Variorum Collected Studies 2004 dispelled the negative opinions towards Ottoman science asserted by scholars of the previous generation. In this new volume the author continues to explore and develop the paradigm of scientific activities and cultural interactions both within and beyond the Ottoman Empire. One of the topics examined is the attitude of Islamic scholars towards revolutionary notions in Western science including Copernican heliocentrism and Darwin's theory of evolution. This book will appeal to scholars and students of Ottoman history as well as those interested in the history of science and cultural history. CS1098

Islam, Postmodernism and Other Futures Sohail Inayatullah, Gail Boxwell, 2003-02-20 As one of our most high profile Muslim intellectuals he has also become an increasingly important voice in the media since the events of September 11th 2001. This is the first collection of his writings of one of our most high profile Muslim intellectuals offering a comprehensive introduction to his thought. Starting with his analysis of his own position as a British Muslim and a writer it goes on to explore issues of Islam and cultural change, education, identity, post modernism and the future. Drawn from a broad range of his work in scholarly journals as well as from his many books on aspects of culture and society it includes his most frequently cited papers and makes an ideal introduction to the immense scope of his work in cultural studies.
