Doing Text Pete Bennett, Julian McDougall, 2017-02-14 This collection reimagines the study of English and media in a way that decentralises the text e.g. romantic poetry or film noir or media formats platforms e.g. broadcast media new media Instead the authors work across boundaries in meaningful thematic contexts that reflect the ways in which people engage with reading watching making and listening in their textual lives In so doing this project recasts both subjects as combined in a more reflexive critical space for the study of our everyday social and cultural interactions Across the chapters the authors present applicable learning and teaching strategies that weave together art works films social practices creativity viral media theater TV social media videogames and literature The culmination of this range of strategies is a reclaimed blue skies approach to progressive textual education free from constraining shackles of outdated ideas about textual categories and value that have hitherto alienated generations of students and both English and media from themselves
