Study Skills and Dyslexia in the Secondary School Marion Griffiths, 2012-10-12 This book is aimed at those who encounter secondary school students with dyslexia on a daily basis. It takes a practical approach by breaking down the whole process of assessing the issues involved and then suggesting ways for teaching staff and students to implement a suitable program of study skills. It is well structured, clear, useful, and written with the needs of busy teachers and students very much in mind. Included are assessment approaches, checklists, photocopiable activities, and suggestions for useful resources. Results from qualitative research are included to provide an additional practical insight into study skills and dyslexia in the secondary school. Theoretical knowledge has been used to underpin and inform practice. Teachers of students with dyslexia who are not specialists should find this a useful guide. It will also be of great use to SENCOs and Teaching Assistants.

Further, it includes case studies and practical tasks to build readers' confidence in supporting Specific Learning Difficulties, as well as a range of coping strategies and practical advice based upon the authors' experience of working with dyslexic learners in different contexts over many years.

Dyslexia and Learning Style Tilly Mortimore, 2008-04-30 The first section of this research-based but practical book has been updated to examine the most recent research in two key areas: dyslexia and the dyslexic experience, and the major cognitive and learning styles. In the light of increased controversy around the use of learning style theory in the educational arena, suggestions are made as to ways in which these theories can be utilized to inform teaching and learning and maximize success for vulnerable learners. The second section provides a range of ways in which to enable learners to understand and utilize their individual styles along with techniques to help students to absorb, process, and create responses to information across the curriculum. Practical strategies to help teachers to adapt material to suit differing ways of learning and activities to help students to become more flexible and successful in their approach.
