## **Suicide Closing The Exits:**

**Suicide** Ronald V. Clarke, 2017-07-12 Suicide prevention is a major goal of the Public Health Service of the US government. This has been the case since the 1960s when the National Institute of Mental Health established a center for the study and prevention of suicide. Since then, however, the knowledge and research gathered has not been brought about the reduction of suicide. *Suicide Closing the Exits* was written to change this trend. This book reports a program of research concerned with preventing suicide by restricting access to lethal agents such as guns, drugs, and carbon monoxide. It may seem implausible that deeply unhappy people could be prevented from killing themselves by closing the exits, but the idea is not a new one and has been discussed widely in the literature. The authors argue that restricting access to lethal agents should be considered a major preventive strategy along with the psychiatric treatment of depressed and suicidal individuals and the establishment of suicide prevention centers to counsel those in crisis. *Suicide* represents a major contribution to the literature. As such, it should be read by all medical practitioners, policy makers, and psychologists. *Suicide* Ronald V. Clarke, David Lester, This book reports a program of research concerned with the possibility of using guns, drugs, preventing suicide by restricting access to lethal agents such as guns, drugs, and carbon monoxide. To many people, it may seem implausible that deeply unhappy people could be prevented from killing themselves by closing the exits, but the suggestion is by no means a new one and has been current in the journals for some time. This book is the first major exposition of the idea, however, with the evidence collected in one place and an examination of the implications for understanding the suicidal person and for preventing suicide. We hope to convince public health officials that although the idea is largely disregarded at present, restricting access to lethal agents should take its place as a major preventive strategy along with the psychiatric treatment of depressed and suicidal individuals and the establishment of suicide prevention centers to counsel those who are suicidal or in crisis. We came to this position by two different routes. Our interest derived from a concern with the role

of opportunity in crime This originated in his doctoral research dealing not with suicide but with another form of escape absconding from training schools for young offenders He found that the variance in absconding was explained more by the opportunities to abscond presented by the school s environment and regime than by the offender s history or personality

*Preventing Suicide* David Lester,2009      **Oxford Textbook of Suicidology and Suicide Prevention** Danuta

Wasserman,2021 Part of the authoritative Oxford Textbooks in Psychiatry series the new edition of the Oxford Textbook of Suicidology and Suicide Prevention remains a key text in the field of suicidology fully updated with new chapters devoted to major psychiatric disorders and their relation to suicide      *THEORIES OF SUICIDE* John F. Gunn,David Lester,2015-06-01

Some researchers in the field of suicidology think that the old theories of suicide are too constraining and impede advances in the understanding of suicide However the book s authors are not quite so critical of past theories In the book they review the classic theories of suicide both psychological and sociological because they are the foundation of our current theories and also propose the skeletons of possible future theories The goal of the text is to present researchers with theories to guide their research encourage them to modify these theories perhaps meld them together in some cases and think how they might propose new theories Presented in three sections the first reviews significant psychological theories including Suicide as Escape Interpersonal Psychological theory The Role of Defeat and Entrapment in Suicidal Behavior Suicide Ethology and Sociobiology Stress Diatheses Cognitive Theories Learning Perspective on Suicide Theories of Personality and Suicide Typological Theories and the Pathophysiology of Suicide The second section of the text addresses Sociological and Economic Theories including Suicide as Deviance Naroll s Thwarting Disorientation Theory three classic sociological theories as well as several minor theories A comprehensive chapter on economic theories is offered by Bijou Yang The final section concentrates on Critical Thoughts About Theories of Suicide a new and growing influence in academia and scholarship      **Suicide as a**

**Dramatic Performance** David Lester,Steven Stack,2015-09-30 Each suicide is as unique as the individuals involved especially if one examines the nature of the act and to what extent these acts can be viewed as a theatrical performance Focusing on the dramatic aspects of suicide may seem tangential to the physical and mental pain experienced by those who try to kill themselves but dramatic aspects often provide important clues for understanding the mental state of suicidal individuals David Lester and Steven Stack investigate what happens in the weeks days and hours before a suicide when the suicidal individual must make decisions and formulate the script for his or her suicidal act The editors argue that these choices may help us understand and prevent other suicides and stimulate new and innovative research in this important area Through twenty five substantive chapters including both quantitative and qualitative analyses this book offers insights into suicide as a dramatic act with chapters on the intended audience the suicide note the location and method chosen and cultural scripts including suicide by cop sati seppuku and duels The contributors to this volume argue that psychological social and cultural factors influence these choices and that the decisions made by the individual are important for

understanding the mental state of the person choosing to die by suicide

**The Politics of Gun Control** Robert J. Spitzer, 2025-08-28 Since its initial publication in 1995 this book has become the classic work on every important element of the tumultuous national gun debate in America This new edition brings together the latest developments and research in gun politics policy law history and criminology to provide a comprehensive and accessible source widely used by scholars journalists and in classrooms In this era of polarized politics this book provides a unique window into how and why that polarization drives our politics Among the new topics covered in this edition are the Supreme Court's new foray into applying history to evaluate modern gun laws the effects of political whipsawing between Democratic and Republican control of government and the consequences of that for gun laws violence and policy New to the Tenth Edition Analysis of the Supreme Court's *Rahimi* decision that for the first time implemented its controversial history based standard for judging the constitutionality of current gun laws Highlights the whiplash between the pro gun policy actions of the Biden administration and the second Trump administration's about face to roll back those initiatives Chronicles the rise and nearly cataclysmic implosion of the once vaunted National Rifle Association as self created problems brought it to the brink of disaster and as legal actions against the NRA finally came to an end Elucidates the scramble of other gun rights groups to replace the NRA as the nation's foremost anti gun law organization Presents new and updated statistical research on gun ownership in America gun related fatalities public opinion support of red flag laws and other gun control measures After a surge in gun violence and gun ownership both have receded to pre pandemic levels and the murder rate continues its decline after a short upsurge Includes new pedagogical features of chapter summaries and discussion questions in each chapter

**Evidence-Based Practice in Suicidology** Maurizio Pompili, Roberto Tatarelli, 2010-12-01 An innovative and long overdue book by the world's leading researchers and practitioners describing what really works in suicide prevention the evidence for particular approaches where the gaps are in our knowledge and how we can fill them Suicide rat

Suicide

David Lester Ph.D., James R. Rogers, 2013-10-29 Intended for the general reader this masterful compilation probes the psychology of suicide revealing the latest research and spotlighting global efforts to reduce the million suicide deaths each year Exceeding previously available studies in both scope and depth the two volume *Suicide A Global Issue* explores and explains both why suicides and suicide attempts occur and what can be done to prevent them The first volume *Understanding* considers factors that may play into the choice to take one's life discussing forces as varied as culture psychology religion and biology The second volume *Prevention* covers steps that can be taken to prevent suicide whether individually or by society as a whole Articles by widely respected experts consider questions such as why people kill themselves why some countries have extremely high suicide rates and whether the treatment of suicidal individuals actually prevents them from taking their lives Each chapter presents incidents research and actions from nations around the globe as well as from the United States
