

Accelerating Customer Relationship Management with Sun™ ONE

An iForce CRM Network Technical White Paper

Sun One Services

**Gustavo Alonso, Fabio Casati, Harumi
Kuno, Vijay Machiraju**

Sun One Services:

Getting Started with Sun ONE Stacy Thurston, 2003 A step by step guide to delivering high value solutions Getting Started with Sun ONE covers planning designing configuring integrating and implementing Sun ONE Internet infrastructures Drawing on his first hand experience supporting Sun ONE customers Thurston describes the Sun ONE Application Server Directory Server and Web Server and provides expert guidance on building business applications with Sun ONE Studio 4 Book jacket **InfoWorld** ,2002-04-15 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects Developing Java Web Services Ramesh Nagappan, Robert Skoczylas, Rima Patel Sriganesh, 2003-02-17 One of the first books to cover Sun Microsystems's new Java Web Services Developer Pack Written by top Sun consultants with hands on experience in creating Web services with a foreword from Simon Phipps Chief Evangelist at Sun Case studies demonstrate how to create Web services with the tools most used by Java developers including BEA WebLogic Apache Axis Systinet WASP and Verisign

Network World ,2002-04-22 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce

Computerworld ,2002-04-22 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network

Mastering E-Business Infrastructure Veljko Milutinovic, Frédéric Patricelli, 2012-12-06 As a foreword here we publish an email letter of Late Professor Herb Simon Nobel Laureate that he wrote on the occasion of the death of the father of a friend This letter of condolence more than any other wisdom tells about the essence of the process of scientific creation which is so important for both the specific subject being covered by this book and for the general science When asked to address an SSRR conference in Italy prior to his death Professor Herb Simon agreed that these lines be presented to all those who are interested in understanding the real essence of their own scientific struggle Dear Professor Milutinovic I want to extend my deepest sympathy to you and your family on the death of your father His career was a very distinguished one and his life spanned a most complex and difficult sequence of epochs in your country's history Our generation I am just a year younger than he was like all its predecessors leaves many tasks hopefully no more than it inherited for the next generation to take up but even knowing that it must be so does not remove one's sense of loss in the parting Web Portals Arthur Tatnall, 2005-01-01 A Web Portal is a special web site designed to act as a gateway giving convenient access to other related sites This book investigates the various types of portals and describes how they can be used in business applications After

considering the nature of portals the book describes the first general portals like Yahoo and how they came into being Portals are used in businesses of all types and sizes and this book discusses how portals can be used in large business corporations as well as small to medium enterprises Web portals have increasing importance to marketers as by their nature they retain their users who must return to them frequently They also provide a useful means of making information and knowledge readily available in a convenient form to authorised users This book covers a wide range of issues relating to the use of portals in business

Web Services Gustavo Alonso,Fabio Casati,Harumi Kuno,Vijay Machiraju,2003-09-04 Like many other incipient technologies Web services are still surrounded by a substantial level of noise This noise results from the always dangerous combination of wishful thinking on the part of research and industry and of a lack of clear understanding of how Web services came to be On the one hand multiple contradictory interpretations are created by the many attempts to realign existing technology and strategies with Web services On the other hand the emphasis on what could be done with Web services in the future often makes us lose track of what can be really done with Web services today and in the short term These factors make it extremely difficult to get a coherent picture of what Web services are what they contribute and where they will be applied Alonso and his co authors deliberately take a step back Based on their academic and industrial experience with middleware and enterprise application integration systems they describe the fundamental concepts behind the notion of Web services and present them as the natural evolution of conventional middleware necessary to meet the challenges of the Web and of B2B application integration Rather than providing a reference guide or a how to write your first Web service kind of book they discuss the main objectives of Web services the challenges that must be faced to achieve them

and the opportunities that this novel technology provides Established as well as recently proposed standards and techniques e g WSDL UDDI SOAP WS Coordination WS Transactions and BPEL are then examined in the context of this discussion in order to emphasize their scope benefits and shortcomings Thus the book is ideally suited both for professionals considering the development of application integration solutions and for research and students interesting in understanding and contributing to the evolution of enterprise application technologies
