Environmental History and the American South Paul Sutter,Christopher J. Manganiello,2009 This

reader gathers fifteen of the most important essays written in the field of southern environmental history over the past decade. Ideal for course use, the volume provides a convenient entrance into the recent literature on the region as it indicates the variety of directions in which the field is growing. As coeditor Paul S. Sutter writes in his introduction, recent trends in environmental historiography—a renewed emphasis on agricultural landscapes and their hybridity, attention to the social and racial histories of environmental thought and practice, and connections between health and the environment among them—have made the South newly attractive terrain. This volume suggests then that southern environmental history has not only arrived but also that it may prove an important space for the growth of the larger environmental history enterprise. The writings, which range in setting from the Texas plains to the Carolina Lowcountry, address a multiplicity of topics such as husbandry practices in the Chesapeake colonies and the aftermath of Hurricane Andrew. The contributors' varied disciplinary perspectives, including agricultural history, geography, the history of science, the history of technology, military history, colonial American history, urban and regional planning history, and ethnohistory, also point to the field's vitality. Conveying the breadth, diversity, and liveliness of this maturing area of study, *Environmental History and the American South* affirms the critical importance of human environmental interactions to the history and culture of the region. Contributors: Virginia DeJohn Anderson, William Boyd, Lisa Brady, Joshua Blu-Buhs, Judith Carney, James Taylor, Carson Craig E. Colten, S. Max Edelson, Jack Temple Kirby, Ralph H. Lutts, Eileen Maura McGurty, Ted Steinberg, Mart Stewart, Claire Strom, Paul Sutter, Harry Watson, Albert G. Way.

Regional Planning for a Sustainable America Carleton K. Montgomery, 2011-10-19. *Regional Planning for a Sustainable America* is the first book to represent the great variety of today's effective regional planning programs, analyzing dozens of regional initiatives across North America. The American landscape is being transformed by poorly designed, sprawling development. This sprawl and its wasteful resource use, traffic, and pollution do not respect arbitrary political boundaries like city limits and state borders. Yet for most of the nation, the patterns of development and conservation are shaped by fragmented parochial local governments and property developers focused on short-term economic gain. Regional planning provides a solution—a means to manage human impacts on a large geographic scale that better matches the natural and economic forces at work. By bringing together the expertise of forty-two practitioners and academics, this book provides a practical guide to the key strategies that regional planners are using to achieve truly sustainable growth.
