Information Technology and Socialist Construction Daniel E. Saros, 2014-05-09 The failure of command central planning in the twentieth century has led to a general disillusionment within the socialist movement worldwide Some alternatives to capitalism have been proposed since the end of the Cold War but none has offered an alternative form of economic calculation This book explains how modern information technology may be used to implement a new method of economic calculation that could bring an end to capitalism and make socialism possible In this book the author critically examines a number of socialist proposals that have been put forward since the end of the Cold War It is shown that although these proposals have many merits their inability effectively to incorporate the benefits of information technology into their models has limited their ability to solve the problem of socialist construction The final section of the book proposes an entirely new model of socialist development based on a needs profile that makes it possible to convert the needs of large numbers of people into data that can be used as a guide for resource allocation This analysis makes it possible to rethink and carefully specify the conditions necessary for the abolition of capital and consequently the requirements for socialist revolution and ultimately communist society Information Technology and Socialist Construction will be of interest to students and scholars of political economy the history of economic thought labour economics and industrial economics **The Philosophy of the Austrian School** Raimondo Cubeddu, 2005-08-18 Philosophically grounded account of the School s methodological political and economic ideas acknowledging differences between key figures and trends in common **A Search for Synthesis in Economic Theory** Ching-Yao Hsieh, S.L. Magnum, Stephen L. Mangum, 2019-09-25 First published in 1986 Since the late 1960s the seeming inability of traditional monetary and fiscal policies to combat stagflation and address other macroeconomic issues has accelerated the erosion of confidence in the prevailing economic paradigm the neoclassical synthesis Dissensions among the members of the economics profession on both sides of the Atlantic have grown in number By the 1970s a majority of economists had recognized a crisis in economic theory Parallel to this development a crisis has also emerged in the Marxian camp This volume is a discussion from the various schools of thought around three of the salient common grounds follows the theory of a monetary economy the disequilibrium foundations of a general equilibrium theory and a rekindled interest in institutional factors Evolution of Austrian Economics Sandye Gloria-Palermo, 2002-01-04 This book argues against the dominant orthodoxy in the history of economic thought for the originality of Carl Menger s contribution to the development of the Austrian school of economics Situating the evolution of

Menger's thought in the tradition of classical political economy the author documents the emergence of a Mengerian logic and its contribution to the formation of a distinctly Austrian tradition of economics In its bold elucidation of the shaping of a tradition in economic thought Tradition and Innovation in Austrian Economics provides a fresh and challenging perspective on the Austrian school which will be of interest to researchers in Austrian economics and the history of economic thought

The Meaning of the Market Process Israel M Kirzner, 2002-09-11 Israel Kirzner is the foremost proponent of the modern Austrian theory of the market process This book offers substantive insights in support of this theory and a new historical interpretation of how the ideas of modern Austrians emerged *Bettering Humanomics* Deirdre Nansen McCloskey, 2021-05-06 Deirdre Nansen McCloskey's latest meticulous work examines how economics can become a more human science Economic historian Deirdre Nansen McCloskey has distinguished herself through her writing on the Great Enrichment and the betterment of the poor not just materially but spiritually In *Bettering Humanomics* she continues her intellectually playful yet rigorous analysis with a focus on humans rather than the institutions Going against the grain of contemporary neo institutional and behavioral economics which privilege observation over understanding she asserts her vision of humanomics which draws on the work of Bart Wilson Vernon Smith and most prominently Adam Smith She argues for an economics that uses a comprehensive understanding of human action beyond behaviorism McCloskey clearly articulates her points of contention with believers in imperfections from Samuelson to Stiglitz claiming that they have neglected scientific analysis in their haste to diagnose the ills of the system In an engaging and erudite manner she reaffirms the global successes of market tested betterment and calls for empirical investigation that advances from material incentives to an awareness of the human within historical and ethical frameworks *Bettering Humanomics* offers a critique of contemporary economics and a proposal for an economics as a better human science *Man, Economy, and Liberty: Essays in Honor of Murray N. Rothbard*, **A Research Annual** Warren J. Samuels, Jeff E. Biddle, Ross B. Emmett, 2008-06-16 Includes refereed articles on topics in economic methodology and the history of economics including Austrian economic methodology and Wesley Mitchell This collection covers such topics as Adam Smith John Kenneth Galbraith Friedrich Nietzsche Joseph Schumpeter Janos Kornai the Chicago School French econometrics and financial economics

Development of Economic Analysis Ingrid H. Rima, 2012-10-12 This is the sixth edition of a textbook that has been instrumental in introducing a generation of students to the history of economic thought It charts the development of economics from its establishment as an analytical discipline in the eighteenth century through to the late twentieth century The book discusses the work of amongst others Ricardo Malthus Marx Walras Marshall and Keynes as well as the institutionalists the Chicago School and the emergence of econometrics This edition has been fully revised and updated and includes chronologies of the key dates in the development of economics extracts from original texts an examination of how the study of the history of economic thought impinges upon modern thinking **The Microfoundations Delusion** John

Edward King, 2012-01-01 This excellent book documents the creation of what has become the first commandment of orthodox macroeconomics that microeconomic theory provides its foundation because this is the most secure form of economic knowledge By contrast John King shows conclusively that microeconomics cannot play such a role when assessed by the criteria of logic or of science or of economics itself Indeed he goes further and demonstrates that the microfoundations dogma detracts from knowledge about how economies actually operate and instead generates patently false conclusions Moreover the dogma is shown to have blinded orthodox economists from even seeing the possibility of typical macroeconomic crises and has disarmed them in formulating policies that would eliminate actual crises The book therefore deals with a topic at the very heart of the present debacle in the world economy _ Michael Howard University of Waterloo Canada A generation ago Dudley Dillard wrote a famous article on the barter illusion in classical and neoclassical economics Now John King has gone a step further and written about the microfoundations delusion The illusion has been with us for a very long time the delusion is of more recent vintage Together they have blocked a basic understanding of macroeconomic and monetary phenomena at a time when they are most urgently needed This is a book that had to be written and we are fortunate that it is John King who has written it Essential reading for our times _ John Smithin York University Canada In this challenging book John King makes a sustained and comprehensive attack on the dogma that macroeconomic theory must have rigorous microfoundations He draws on both the philosophy of science and the history of economic thought to demonstrate the dangers of foundational metaphors and the defects of micro reduction as a methodological principle Strong criticism of the microfoundations dogma is documented in great detail from some mainstream and many heterodox economists and also from economic methodologists social theorists and evolutionary biologists The author argues for the relative autonomy of macroeconomics as a distinct special science cooperating with but most definitely not reducible to microeconomics The Microfoundations Delusion will prove a stimulating and thought provoking read for scholars students and researchers in the fields of economics heterodox economics and history of economic thought **Great Minds in**

Entrepreneurship Research Vishal K. Gupta, 2020-10-31 Awarded every year since 1996 the Global Award for Entrepreneurship Research GAER recognizes outstanding contributions in quality and importance to scientific research in entrepreneurship This book examines the work of GAER award winners 1996 2020 discusses major contributions to the field identifies critiques of their work and highlights directions for future research Students and faculty will find this book to be a rich resource for understanding the impact of leading entrepreneurship scholars **Experts and Epistemic Monopolies**

Roger Koppl, Steven Horwitz, Laurent Dobuzinskis, 2012-10-15 Under what conditions of supply and demand are experts likely to give us good advice When is expert failure more likely Do entrepreneurs challenge existing expertise Are they experts themselves This title brings a heterogeneous collection of thinkers some Austrian and to engage the problem of experts

The Theory of Dynamic Efficiency Jesús Huerta de Soto, 2009 This book gathers a collection of multidisciplinary essays

by Jess Huerta de Soto examining the dynamic processes of social cooperation which characterize the market with particular emphasis on the role of both entrepreneurship and institutions A History of Economic Theory Aiko Ikeo, Heinz D. Kurz, 2009-05-07 Few economists have been as prolific and wide ranging as Takashi Negishi Part of the Hicksian generation of Neo Walrasian general equilibrium theorists Negishi rose to prominence during the early 1960s with his work on the Neo Walrasian system Negishi's signature has been his attempt to extend the multi market Neo Walrasian system in several directions to incorporate concerns such as imperfect competition stability money trade and unemployment and as a consequence helping to discover and delineate the limits of conventional theory This collection in honour of Takashi Negishi analyses his contributions to the history of economic theory Economists paying tribute within this volume include Neri Salvadori Laurence Moss and Joaquim Silvestre Modern Austrian Economics Vol 3 Sandye Gloria-Palermo, Peter J Boettke, Stephan Bohm, 2024-10-28 Examines the post 1970s area of the Austrian economic tradition from its revival to its contemporary directions and development The book comprises texts on the relationship of Austrian economics to Institutionalism Evolution and Post Keynesian economics to present a look at the way forward *On the History of Economic Thought* A. W. Bob Coats, 2005-08-08 Following an introduction to the key ideas of Coats this work focuses on two themes the difference between British and American economics both in content and in the practice of the profession and the interrelationships between economic ideas events or conditions and policy issues
