**Theory** Robert Alan Manners, David Kaplan, Anthropological theory has been much discussed in recent years yet the crucial questions still remain how can it be defined how is it developed how is it to be applied and how can one confirm it The editors of Anthropological Theory answer these questions by presenting essays relating to various aspects of anthropological theory Their selections from widely scattered and often difficult to obtain sources present a comprehensive set of writings that describe the current position and issues involved in theory The development of field work in anthropology generated a tremendous emphasis on empirical data and research The plethora of information awaiting collection and the enthusiasm with which the field embraced it so immersed anthropologists that they were unable to relate this new information to the field as a whole Manners and Kaplan believe that this lack of generalization had a profoundly negative effect upon the discipline Therefore they look closely into the relationship between field work and theory in an opening essay and go on to present material that demonstrates the value and the necessity of theory in anthropology Essays by anthropologists and other social scientists deal with explanation evolution ecology ideology structuralism and a number of other issues reflecting throughout the editors conviction that anthropology is a science the goal of which is to produce generalizations about sociocultural phenomena The book provides necessary perspective for examining and evaluating the crucial intellectual concerns of modern anthropology and will therefore be important for the work of every anthropologist Robert A Manners 1913 1996 received his Ph D from Columbia University and carried on field work in the Caribbean among American Indians in the Southwest and in East Africa He wrote numerous articles and reviews for anthropological journals as well as many

books He was professor of anthropology Brandeis University where he started up the department David Kaplan is professor emeritus of anthropology at Brandeis University He has contributed articles and reviews to various journals He has also done field work in Mexico and his areas of specialty include economic anthropology method and theory and peasant culture of Mesoamerica *Readings for a History of Anthropological Theory, Fifth Edition* Liam D. Smelser, Seymour Martin Lipset, The foundation of this volume is the notion that the several processes of change constituting economic and social development are systematically interrelated The essence of development is the appearance of rapid rates of increases in many different indices output per capita political participation literacy and the like These quantitative changes are however commonly accompanied by vast changes in the social structure markets emerge political bureaucracies arise and new educational systems appear Written by the leading authorities on the subject this group of papers tackles the causes and consequences of social mobility Each author brings his particular skills to bear on various aspects of the problem in studies of persons moving from rural to urban settings from one kind of industry to another and from one prestige level to another Several of the papers review the theoretical and methodological issues involved in comparative research on social mobility while others compare and contrast traditional and modern stratification systems Various papers explore the economic religious and psychological basis of social mobility concluding with enquiry into the consequences of rapid mobility especially in terms of the political stability of developing nations Because social mobility is a central consideration in any study of economic and social change every student of change will use this pioneering reference source as a text for all future research Contributors include Otis Dudley Duncan Harold L Wilensky Michael G Smith Bert F Hoselitz Wilbert E Moore Natalie Rogoff Ramsy Gideon Sjoberg Reinhard
