The Basic Environmental

History Mauro Agnoletti, Simone Neri Serneri, 2014-10-15 This book is an introductory instrument to the main themes of environmental history illustrating its development over time methodological implications results achieved and those still under discussion But the overriding aspiration is to show that the doubts methods and knowledge elaborated by environmental history have a heuristic value that is far from negligible precisely in its attitude to the most consolidated major historiography For this reason this book gives an overview of environmental history as it is an essential component of the basic knowledge of global history At the same time it introduces specific aspects which are useful both for anyone wanting to deepen his her studies of environmental historiography and for those interested in one of the many disciplinary areas from rural history to urban history from the history of technology to the history of public health etc with which environmental history develops a dialogue **The Collected Works of W.B. Yeats Volume XIII: A Vision** William Butler

Yeats, 2013-02-12 The Collected Works of W B Yeats Volume XIII A Vision is part of a fourteen volume series under the general editorship of eminent Yeats scholar George Bornstein and formerly the late Richard J Finneran and George Mills Harper One of the strangest works of literary modernism A Vision is Yeats s greatest occult work Edited by Yeats scholars Catherine E Paul and Margaret Mills Harper the volume presents the system of philosophy psychology history and the life of the soul that Yeats and his wife George n e Hyde Lees received and created by means of mediumistic experiments from 1917 through the early 1920s Yeats obsessively revised the book and the revised 1937 version is much more widely available than its predecessor The original 1925 version of A Vision poetic unpolished masked in fiction and close to the excitement of the automatic writing that the Yeatses believed to be its supernatural origin is presented here in a scholarly edition for the first time The text minimally corrected to retain the sense of the original is extensively annotated with particular attention paid to the relationship between the published book and its complex genetic materials Indispensable to an understanding of the poet s late work and entrancing on its own merit A Vision aims to be all at once a work of theoretical history an esoteric philosophy an aesthetic symbology a psychological schema and a sacred book It is as difficult as it is essential reading for any student of Yeats *Water Technology in the Middle Ages* Roberta J. Magnusson, 2003-04-01 Focusing attention on gravity

fed water flow systems in medieval cities and monasteries Water Technology in the Middle Ages Cities Monasteries and Waterworks after the Roman Empire challenges the view that hydraulic engineering died with the Romans and remained moribund until the Renaissance Roberta Magnusson explores the systems technologies how they worked what uses the water served and also the social rifts that created struggles over access to this basic necessity Mindful of theoretical questions about what hastens technological change and how society and technology mutually influence one another the author supplies a thoughtful and instructive study Archeological historical and literary evidence vividly depicts those who designed constructed and used medieval water systems and demonstrates a shift from a public administrative to a private innovative framework one that argues for the importance of local initiatives The following chapters attempt to chart a course between the Scylla and Charybdis of technological and social determinism While writing them I have tried to strike a balance between the technical and human aspects of medieval hydraulic systems and to remember that beneath the welter of documents and diffusion patterns configurations and components ordinances and expenditures lie the perceptions the choices and often the plain hard work of individual men and women from the Preface

My Ancestors Horst H. Geerken,2025-07-08 Letters diaries and documents from many centuries in the past provided the details for this enthralling read but it is no ordinary collection of dry as dust facts It is a chronicle stretching back into the Middle Ages the history of a fascinating influential and many branched family with exciting life stories to relate The authors grandfather was the artist Johann Hinrich Geerken and his aunt was housekeeper to Albert Einstein This richly illustrated volume tells the tales of farmers and inventors artists and artisans but also of courageous women who had to see their families through difficult times alone Among the ancestors described are the famous master tower clock maker Johann Michael Mannhardt whose clocks continue to tell the correct time and Wilhelm Emmanuel Johann Mannhardt an academic and Mennonite whose works are still published today The book takes us to Meiji period Japan where Carl August Schenk the scientist taught at the University of Tokyo and is still honoured as the father of Japanese mineralogy to Indonesia where the author lived and worked for many years and on to Australia America and Greece where many of the family live today Many interesting historical anecdotes and illustrations make the book well worth reading not just for the family It is a document of modern and contemporary history
