The Four Little Dragons:

The Four Little Dragons Ezra F. Vogel, 1991 Vogel brings masterly insight to the underlying question of why Japan and the little dragons Taiwan South Korea Hong Kong and Singapore have been so extraordinarily successful in industrializing while other developing countries have not *The Four Little Dragons* Brian Kelly, 1990-11 **Four Little Dragons the Spread of Industrialization in East Asia** Ezra F. Vogel, 1991 A new wave of industrialization Taiwan South Korea Hong Kong and Singapore Toward and explanation *Four Little Dragons* Brian Kelly, 1991 Market Liberalism Gordon Cheung, 2019-01-22 This study analyzes the overseas effect of the market force of US foreign policy toward China Gordon Cheung puts forward the idea of augmented market liberalism arguing that the US was instrumental in making China a market economy *The China Miracle* Justin Yifu Lin, Fang Cai, Zhou Li, 2004-03-15 The tremendous success of China's economic reform in contrast with the vast difficulties encountered by the former Soviet Union and Eastern European countries in their transition has attracted worldwide attention Using a historical comparative and analytic approach grounded in mainstream economics the authors develop a consistent and rational framework of state owned enterprises and individual agents to analyze the internal logic of the traditional planning system They also explain why the Chinese economy grew slowly before the market oriented reform in 1979 but became one of the fastest growing economies afterwards and why the vigour chaos cycle became part of China's reform process The book also addresses the questions that whether China can continue its trend of reform and development and become the largest economy in the world in the early 21st century and what the general implications of China's experience of development and reform are for other developing and transition economies The first edition has been well received and is the standard textbook or reference for students and researchers of China studies In this thoroughly revised edition the authors have updated the data and information in the book and include a new chapter on the impact of China's WTO accession on its economic reforms and causes of the current deflation *The George Hicks Collection* Eunice Low, 2016-07-18 The George Hicks Collection at the National Library Singapore comprises about 6 900 books and materials donated between 200 and 2015 by Mr George Lyndon Hicks The Collection focuses on four main subject areas Southeast Asia China Japan and overseas Chinese spanning the disciplines of history sociology economics political science and anthropology The body of works in the Collection reveals Mr Hicks profound interest in Asia and his scholarly pursuits over the decades This volume written and compiled by Eunice Low presents an annotated bibliography of selected works from the Collection and highlights significant titles Also included are an overview of the life and career of Mr Hicks a list of his authored and edited works as well as essays introducing the chapters *The Bear Watches the Dragon* Alexander Lukin, 2003 China and Russia two giants dominating the Eurasian landmass share a history of understanding and misunderstanding whose nuances are not well appreciated by outsiders In his interpretation of this relationship from the Russian point of view Alexander Lukin shows how over the course of three centuries China has seemed alternately to

threaten mystify imitate mirror and rival its northern neighbor Lukin traces not only the changing dynamics of Russian Chinese relations but the ways in which Russia's images of China more profoundly reflected Russia's self perception and its perceptions of the West as well As both Russia and China take distinctive approaches to political and economic development and integration in the twenty first century global economy this reinterpretation of their relationship is timely and valuable not only to historians but to all students of international affairs

Kueh, 2012-10-01 The book confronts the popular conjecture of a Pax Sinica emerging to replace Pax Americana in the wake of global financial crisis It argues that by virtue of its overwhelming economic technological and military clout US hegemony will continue to prevail though increasingly less coherently as China's ascendancy as a global power accelerates The argument is underpinned with analysis of different junctures in China's trajectory towards the status of economic giant from the tacit creation of the Greater China growth triangle and ordeal of the Asian Financial Crisis through the breakthrough with China's membership in the WTO and the subsequent large scale realignment of productive forces in the Asia Pacific region A chronological approach is combined with topical analysis focusing in particular on the interplay between economic imperatives and geopolitical dynamics Taken together the book provides a highly refreshing and coherent perspective for looking at China arising as a dominant Asia Pacific power with significant global implications As an interdisciplinary study it will appeal to scholars and academics as well as businessmen and government policy makers interested in Asian and global affairs and especially to students of economics politics international business and globalization studies Y Y Kueh is a Hong Kong based China expert He taught at The Chinese University of Hong Kong for over two decades served as Founding Director of Centre for Chinese Political Economy at Macquarie University Sydney and retired from Lingnan University Hong Kong as Chair Professor of Economics and Dean of Social Science Currently he is Senior College Tutor Honorary New Asia College The Chinese University of Hong Kong
