Buckley, 1990 Fresh fruit and vegetable prices, 1958 **Marketing Fresh Fruits and Vegetables** Richard B. How, 2012-12-06 This book has evolved out of experience gained during 15 years of teaching a course on fruit and vegetable marketing to Cornell University undergraduates Initially it was difficult to assemble written material that would introduce the students to the industry and provide examples to illustrate marketing principles Apart from a few major studies like the U S Department of Agriculture's survey of wholesale markets that came out in 1964 or the report of the National Commission on Food Marketing published in 1966 there was little research to turn to in the early 1970s Trade association meetings trade papers and personal contacts with members of the industry were the major sources of information It became necessary to collect information from many different sources to fill the need for a descriptive base Now there are many good research reports and articles being published on various phases of the industry There still remains a pressing need however to consolidate and interpret this information so that it provides an understanding of the total system and its various parts Fresh fruit and vegetable marketing is different in many respects from the marketing of other agricultural and nonagricultural products Hundreds of individual commodities comprise the total group Each product has its own special requirements for growing and handling with its own quality attributes merchandising methods and standards of consumer acceptance Fresh Fruit and Vegetable Grading, 1992 **Los Angeles, Fresh Fruit and Vegetable Wholesale Market**
