Signposts to Silence J.S. Krüger,2018-12-01 Signposts to Silence provides a theoretical map of what it terms metaphysical mysticism the search for the furthest most inclusive horizon the domain of silence which underlies the religious and metaphysical urge of humankind in its finest forms Tracing the footsteps of pioneers of this exploration the investigation also documents a number of historical pilgrimages from a variety of cultural and religious backgrounds Such mountaineers of the spirit who created paths trodden by groups of followers over centuries and in some cases millennia include Lao Tzu and Chuang Tzu Siddhattha and Jesus Sankara and Fa tsang Plato and Plotinus Isaac Luria and Ibn Arabi Aquinas and Hegel Such figures teachings and traditions including the religions of Judaism Christianity and Islam Hinduism Buddhism and Taoism are understood as at their most sublime not final destiny and the end of the road but signposts to a horizon of ultimate silence The hermeneutical method employed in tracking such pioneers involves four steps sound historical critical understanding of the context of the various traditions and figures reconstruction of the subjective intentional structure of such persons and their teachings design by the author of a theoretical map of the overall terrain of metaphysical mysticism on which all such journeys of the spirit are to be located while providing a theoretical context for understanding them tendentionally i e taking the ultimate drift of their thinking essentially to transcend their subjective intentions drawing out within the space available some political taken in a wide

sense implications from the above such as religio political stances as well as ecological and gender implications Continuing the general direction of thought within what the author endorses to be the best in metaphysical mysticism in its historical manifestations the book aims to contribute to peace amongst religions in the contemporary global cultural situation It relativizes all claims to exclusive absolute truth that might be proclaimed by any religious or metaphysical mystical position while providing space for not only tolerating but also affirming the unique value and dignity of each This orientation moves beyond the stances of enmity or indifference or syncretism or homogenisation of all as well as that of mere friendly toleration It investigates the seemingly daunting and inhospitable yet immensely significant Antarctica of the Spirit the meta space of silence behind the various forms of wordy inter relationships It affirms *pars pro toto totum pro parte* and *pars pro parte* that each religious mystical and metaphysical orientation in its relative singularity represents or contains the whole and derives value from that and that each represents or contains every other This homoversal solidarity stimulating individual uniqueness is different from and in fact implies criticism of the process of globalisation While not taking part in a scientific argument as such *Signposts to Silence* aims at promoting an understanding of science and metaphysical mysticism as mutual context for each other and it listens to a number of voices from the domain of science that understand this

Freedom, Justice, and Decolonization

Lewis Gordon, 2020-12-30 The eminent scholar Lewis R Gordon offers a probing meditation on freedom justice and decolonization What is there to be understood and done when it is evident that the search for justice which dominates social and political philosophy of the North is an insufficient approach for the achievements of dignity freedom liberation and revolution Gordon takes the reader on a journey as he interrogates a trail from colonized philosophy to re imagining liberation and revolution to critical challenges raised by Afropessimism theodicy and looming catastrophe He offers not forecast and foreclosure but instead an urgent call for dignifying and urgent acts of political commitment Such movements take the form of examining what philosophy means in Africana philosophy liberation in decolonial thought and the decolonization of justice and normative life Gordon issues a critique of the obstacles to cultivating emancipatory politics challenging reductionist forms of thought that

proffer harm and suffering as conditions of political appearance and the valorization of nonhuman being He asserts instead emancipatory considerations for occluded forms of life and the irreplaceability of existence in the face of catastrophe and ruin and he concludes through a discussion with the Circassian philosopher and decolonial theorist Madina Tlostanova with the project of shifting the geography of reason
