ars_sms@rediffmail.com

ABSTRACT

Education is one of the significant factors instrumental to the development of a country. It should be transformed to the needs of the time and changing scenario of the world. In particular, the higher education and the mode of its delivery should be tuned time and again for greater development and changes to cope with such challenges. In this backdrop, given the present scenario of Indian higher education, there needs a paradigm shift in the higher education system. The higher education in India is, in general, seemed to be bleak since post-independence and raises several questions still unanswered. The unplanned expansion of higher education opportunities, spiraling trend of the educated unemployed, commercialization of education, the imbalance of quantity with quality, ignorance equity and excellence, are some of the pertinent cases in point which pose continuous threats to higher education of India. In this light, the new reforms in education to come must address all the above concerns in higher education and involve innovative modalities of how to classify and reclassify information, how to look at problems from new and different directions and at last how to bring about new future society to meet the challenges to come. To meet the futuristic prospects of Indian higher education, teachers should not be spared in such meaningful reforms since teachers provide with the best trained manpower for a nation such as technologists, scientists, doctors, engineers, policy makers, businessmen etc. It is therefore teachers too should be empowered as a part of reforms for Indian higher education meeting the growing demands of liberalization and globalization going on in the world. Hence, the emerging Indian society needs to make the system of their higher education must innovative and futuristic to face the changing demands of the modern Indian Society.

Field of Research: Scenario, Higher Education, prospects.

Introduction

Higher education in India has experienced phenomenal expansion since independence. India has produced scientists, engineers, technologists, doctors, teachers and managers who are in great demand all over the world. Now it is one of the top ten countries in our industrial and technological capacity, because of the significant contribution of manpower and tools provided by higher education, especially, technical education.

Methods of higher education also have to be appropriate to the needs of four pillars of education, learning to learn, learning to do, learning to be and learning to become. (Ganihar &Bhat 2006) Student centered education and the employment of dynamic method of education will require from teachers new attitudes and skills (Saravanakumar &Mohan 2008)

Methods of teaching through lectures will have to be supplemented with the methods that will lay stress on self study, personal consultation between teachers and students and informative sessions of seminars and workshops. In engineering Indian society, knowledge creation, exchange, networking and highest utilization have become most vital for the advancement of nature. India needs to make the
