The Galactic Whirlpool David Gerrold,1980 **The Fifty-Year Mission: The Complete, Uncensored, Unauthorized Oral History of Star Trek: The First 25 Years** Edward Gross,Mark A. Altman,2016-06-28 Volume one of a fifty year oral history of Star Trek by the people who were there in their own words sharing never before told stories **The Big Book of Science** Joel Levy,2018-02-15 The well known a bee in a cathedral analogy describes the size of an atom and its nucleus in understandable terms The analogy goes that if an atom were expanded to the size of a cathedral the nucleus would be only about the size of a bee The Big Book of Science uses analogies to demonstrate 100 basic scientific truths and principles in new and exciting ways describing the unbelievably massive the inconceivably tiny and the unfathomably complex in everyday terms Readers will be drawn to the book by its combination of intuitive reasoning and a highly visual presentation style It s bursting with facts figures diagrams charts and illustrations Each page helps readers understand fundamental scientific principles and theories by using analogies that describe abstract ideas using everyday objects Each analogy is explained in direct terms and clearly illustrated A range of facts and figures presented in uniquely accessible infographics complements the analogies The book covers a wide array of scientific topics physics chemistry astronomy biology earth sciences anatomy and technology The analogies include If an atomic nucleus expanded to the size of a marble it would weigh about 100 million tons or roughly the equivalent of 16 Great Pyramids of Egypt It would take a human heart less than 18 days to fill an Olympic sized swimming pool The volcanic blast of Mount St Helens released thermal energy 1 600 times the size of Hiroshima Krakatoa s 1883 eruption was roughly 13 000 times as powerful as that same bomb Informative and engaging The Big Book of Science gives readers a deeper appreciation of the forces and facts that govern the universe and everything in it **My Super Pretty Wife** Wen Ding,2020-07-26 Mercenary King Chen Yang returned to the city to protect his comrade s sister the goddess In the bustling city Chen Yang was like a fish in water carefree and at ease And to see how the previous generation s soldiers would use their iron fists and wits to build a business empire *Fuzzy Logic* Vladimir Dimitrov,Victor Korotkich,2013-12-06 At the beginning of the new millennium fuzzy logic opens a new challenging perspective in information processing This perspective emerges out of the ideas of the founder of fuzzy logic Lotfi Zadeh to develop soft tools for direct computing with human perceptions The enigmatic nature of human perceptions manifests in their unique capacity to generalize extract patterns and capture both the essence and the integrity of the events and phenomena in human life This capacity goes together with an intrinsic imprecision of the perception based information According to Zadeh it is because of the imprecision of the human imprecision that they do not lend themselves to meaning representation through the use of precise methods based on predicate logic This is the principal reason why existing scientific theories do not have the capability to operate on perception based information We are at the eve of the emergence of a theory with such a capability Its applicative effectiveness has been already demonstrated through the industrial

implementation of the soft computing a powerful intelligent technology centred in fuzzy logic At the focus of the papers included in this book is the knowledge and experience of the researchers in relation both to the engineering applications of soft computing and to its social and philosophical implications at the dawn of the third millennium The papers clearly demonstrate that Fuzzy Logic revolutionizes general approaches for solving applied problems and reveals deep connections between them and their solutions

The Universe Byron Preiss,2010-09-02 In this book we gather together the scientists the intellectuals and the artists to learn about and speculate upon the cosmos The world right now desperately needs both the physicist and the dreamer G d has blessed us with the most magnificent world imaginable We have barely made the first steps in seeing all the light in the darkness Perhaps it is the dreamer who will find out the nature of dark matter perhaps it is the scientist who will find solutions to needless hunger and mindless war For them both the bounty of the Earth and the cosmos is the currency of hope Humanity must use what it has been blessed with to survive Then as in Paul Simon s phrase we all might be dancing together with diamonds on the soles of our shoes They will be the diamonds of the stars and it will be a dance of peace

Mysteries of the Universe-Unveiled Satya Prakash Verma,2015-03-21 In spite of the fact that the story of Blind Students and the Elephant is merely a story the same has been repeated several times in the history of the mankind right from the primordial times till to date in fact this is the way science has gradually grown on its journey of evolution Scientists have to face similar situations on many occasions they never get full information before devising any theory instead they discover part truths in several steps each of which is discovered after long periods of time This is analogous to concept developed by a blind man who forms an idea about the elephant by touches only one of its body part Scientists can therefore consider only one aspect of a problem at a time they encounter with other aspects of the same problem at a much later point of time At times such a situation might lead to misconceptions Sometimes such misconceptions conceived by some renowned personalities are even considered to be very brilliant ideas and valuable achievements As a result heritage of falsified knowledge had been transferred several times in the past to at least next 3 4 generations This becomes possible because common man blindly follows renowned persons who are considered to be wise normally no one even bothers to verify the truth this is the greatest misfortune of the human kind Misjudging or regarding such misconceptions as valuable discoveries might cause science to divagate from its path to find out absolute truth a very long and valuable time might also be lost in elimination of such misconceptions
