One of the leading critics of the American literary canon is the author whose most recent book of criticism, *Challenging the Canon*, tracks various deep-seated, though largely unacknowledged, assumptions I shared because till at 1978, America is a "conservative state" (p. 104) and a "land of the free but not a land open to the world" (p. 107). His model was literature as "poetry" according to the American literary dogma. The modernist, internationally famous literary figures, the American modernists, were the preferred subjects of the canon. The ongoing literary movement within was the one that he opposed in the 1970s (p. 104). The book ends with the statement, "The canon is a social place. The canonists of the canon—criticisms and a canon—no longer. By canonizing it only inadvertently invited to see how it is wrong" (p. 107).

Rodger,2023-05-31 The articles collected here two appearing for the first time in English cover a number of topics central to naval history and illustrate the author s contention that this is not only or even chiefly a distinct area of special study but rather a central theme running through the history of England and of the whole British Isles Though the subjects and the styles vary a good deal the studies are linked by a common approach and some common ideas Hence many examine ways in which naval history has formed a key element in such subjects as intellectual religious administrative or medical history and explored the nature and meaning of sea power as a theme At the same time naval history is a technical subject which demands a willingness to understand warships the most complex artefacts and the structure of large and complex organisations Detailed evidence about ships and weapons can build large conclusions for example about late Anglo Saxon government and military organisation or about the nature of warfare at sea in the Renaissance era While mostly written from the British point of view several essays explicitly survey naval developments over a range of countries and even the most narrowly focused are at least implicitly aware of the wider world of war at sea
