[Rio, Tokyo Paralympic Games and beyond: How to Prepare Athletes with Motor Disabilities for Peaking](#) Pierre-Marie Leprêtre, Victoria L. Goosey-Tolfrey, Thomas W. J. Janssen, Claudio Perret, 2017-05-25. In 1960 the 9th Annual International Stoke Mandeville Games were supported for the first time by the Italian Olympic Committee. Taking place six days after the Closing Ceremony of the XVII Olympic Games, the paralympic games for disabled athletes were born. From Rome in 1960 to London in 2012, the Paralympic Games grew in terms of athletes number from 400 to 4,237 and now brings together more than 164 nations. Perret 2015. The word Paralympic derives from the Greek preposition para, beside or alongside, and the word Olympic. Paralympics want to be the parallel Games to the Olympics and illustrate how the two movements exist side by side. Paralympics History of the Movement 2016. Now taking place after the Olympics Games, the Paralympic Games are the pinnacle of the career of athletes with physical impairments and have become the second largest sport event in the world. Perret 2015. Paralympics History of the Movement 2016. Gold and Gold 2011. The first statement of the vision of the International Paralympic Committee (IPC) is to create the conditions for athlete empowerment through self-determination. Paralympics History of the Movement 2016. International Paralympic Committee 2016 shows the importance of the place of the athlete with an impairment at the heart of the Paralympic Movement. The ultimate aim of the IPC is to enable Paralympic athletes to achieve sporting excellence and inspire and excite the world. International Paralympic Committee 2016. The performance level of athletes with an impairment improved to a point that in the present days sport news and world sport movements focus on the potential advantage of artificial limbs among athletes with amputations and their integration in able-bodied competitions. Burkett 2010. However, they do not represent the totality of athletes with an impairment at the Paralympic Games. Athletes with other physical impairments, visual deficit, spinal cord injury, cerebral palsy, or else, are eligible to compete. These impairments induce typical functional and physiological, e.g., cardiovascular, thermoregulatory responses to exercise. For example, spinal cord injury athletes with tetraplegia or paraplegia causes thermoregulatory impairment. Goosey-Tolfrey et al 2008 and individuals with cerebral palsy have also demonstrated higher thermal and metabolic strain than matched controls during treadmill walking in the heat. Maltais et al 2004. Thus, hyperthermia among these athletes with an impairment alters their performance compared to their Olympic counterparts. Bhambhani 2002. Mechanical performance analysis: the description of physiological responses according to the functional impairment or else the response to training.
