The Game Of Life College Sports And Educational Values:

The Game of Life James L. Shulman, William G. Bowen, 2011-08-15 The President of Williams College faces a firestorm for not allowing the women's lacrosse team to postpone exams to attend the playoffs The University of Michigan loses 28 million on athletics despite averaging 110 000 fans at each home football game Schools across the country struggle with the tradeoffs involved with recruiting athletes and updating facilities for dozens of varsity sports Does increasing intensification of college sports support or detract from higher education's core mission James Shulman and William Bowen introduce facts into a terrain overrun by emotions and enduring myths Using the same database that informed *The Shape of the River* the authors analyze data on 90 000 students who attended thirty selective colleges and universities in the 1950s 1970s and 1990s Drawing also on historical research and new information on giving and spending the authors demonstrate how athletics influence the class composition and campus ethos of selective schools as well as the messages that these institutions send to prospective students their parents and society at large Shulman and Bowen show that athletic programs raise even more difficult questions of educational policy for small private colleges and highly selective universities than they do for big time scholarship granting schools They discover that today's athletes more so than their predecessors enter college less academically well prepared and with different goals and values than their classmates differences that lead to different lives They reveal that gender equity efforts have wrought large sometimes unanticipated changes And they show that the alumni appetite for winning teams is not as schools often assume insatiable If a culprit emerges it is the unquestioned spread of a changed athletic culture through the emulation of highly publicized teams by low profile sports of men's programs by women's and of athletic powerhouses by small colleges Shulman and Bowen celebrate the benefits of collegiate sports while identifying the subtle ways in which athletic intensification can pull even prestigious institutions from their missions By examining how athletes and other graduates view *The Game of Life* and how colleges shape society's view of what its rules should be Bowen and Shulman go far beyond sports They tell us about higher education today the ways in which colleges set policies reinforce or neglect their core mission and send signals about what matters

Reclaiming the Game William G. Bowen, Sarah A. Levin, 2011-06-27 In *Reclaiming the Game* William Bowen and Sarah Levin disentangle the admissions and academic experiences of recruited athletes walk on athletes and other students In a field overwhelmed by reliance on anecdotes the factual findings are striking and sobering Anyone seriously concerned about higher education will find it hard to wish away the evidence that athletic recruitment is problematic even at those schools that do not offer athletic scholarships Thanks to an expansion of the College and Beyond database that resulted in the highly influential studies *The Shape of the River* and *The Game of Life* the authors are able to analyze in great detail the backgrounds academic qualifications and college outcomes of athletes and their classmates at thirty three academically selective colleges and universities that do not offer athletic scholarships They show that recruited athletes at these schools are as much as four

times more likely to gain admission than are other applicants with similar academic credentials The data also demonstrate that the typical recruit is substantially more likely to end up in the bottom third of the college class than is either the typical walk on or the student who does not play college sports Even more troubling is the dramatic evidence that recruited athletes underperform they do even less well academically than predicted by their test scores and high school grades Over the last four decades the athletic academic divide on elite campuses has widened substantially This book examines the forces that have been driving this process and presents concrete proposals for reform At its core Reclaiming the Game is an argument for re establishing athletics as a means of fulfilling instead of undermining the educational missions of our colleges and universities

Reclaiming the Game William G. Bowen, Sarah A. Levin, 2003 The authors wade through the sea of anecdotal and ultimately flawed evidence presented in other studies on the subject and offer their own scrupulously researched account of the recruitment process for college athletics serving up a disturbing portrait of young men and women who are played and ultimately failed by the system Education College Sports Eric A. Moyer, John R. Thelin, 2024-11-26

This work is the first comprehensive historical survey of intercollegiate athletics at American universities The Making of Princeton University James Axtell, 2021-03-09 In 1902 Professor Woodrow Wilson took the helm of Princeton University then a small denominational college with few academic pretensions But Wilson had a blueprint for remaking the too cozy college into an intellectual powerhouse The Making of Princeton University tells for the first time the story of how the University adapted and updated Wilson's vision to transform itself into the prestigious institution it is today James Axtell brings the methods and insights from his extensive work in ethnohistory to the collegiate realm focusing especially on one of Princeton's most distinguished features its unrivaled reputation for undergraduate education Addressing admissions the curriculum extracurricular activities and the changing landscape of student culture the book devotes four full chapters to undergraduate life inside and outside the classroom The book is a livelywarts and all rendering of Princeton's rise addressing such themes as discriminatory admission policies the academic underperformance of many varsity athletes and the controversial bicker system through which students have been selected for the University's private eating clubs Written in a delightful and elegant style The Making of Princeton University offers a detailed picture of how the University has dealt with these issues to secure a distinguished position in both higher education and American society For anyone interested in or associated with Princeton past or present this is a book to savor

Changing the Game Nancy Weiss Malkiel, 2023-11-14 How a visionary university and foundation president tackled some of the thorniest problems facing higher education As provost and then president of Princeton University William G Bowen 1933 2016 took on the biggest and most complex challenges confronting higher education cost disease inclusion affirmative action college access and college completion Later as president of the Andrew W Mellon Foundation he took his vision for higher education and the strategies for accomplishing that vision to a larger arena Along the way he wrote a series of influential books including the widely read The Shape of the River

coauthored with Derek Bok which documented the success of policies designed to increase racial diversity at elite institutions In *Changing the Game* drawing on deep archival research and hundreds of interviews Nancy Weiss Malkiel argues that Bowen was the most consequential higher education leader of his generation Bowen who became Princeton's president in 1972 at the age of 38 worked to shore up the university's financial stability implement coeducation and create a more inclusive institution Breaking through the traditional Ivy League demographics of white Protestant and male he embraced equal access in admissions for women and men and actively sought to enroll Black Hispanic and Asian American students To increase the intellectual muscle of the faculty he used targeted recruiting and enforced higher scholarly standards In 1988 Bowen moved on to Mellon where among many other accomplishments he developed digital research tools most notably JSTOR and promoted racial diversity through the Mellon Mays Undergraduate Fellowship Attacking problems with tenacity insight and deep knowledge Bowen showed the world of higher education how a visionary leader can transform an institution
