Where Nation-States Come From Philip G. Roeder,2012-01-09 To date the world can lay claim to little more than 190 sovereign independent entities recognized as nation states while by some estimates there may be up to eight hundred more nation state projects underway and seven to eight thousand potential projects Why do a few such endeavors come to fruition while most fail Standard explanations have pointed to national awakenings nationalist mobilizations economic efficiency military prowess or intervention by the great powers *Where Nation States Come From* provides a compelling alternative account one that incorporates an in depth examination of the Russian Empire the Soviet Union and their successor states Philip Roeder argues that almost all successful nation state projects have been associated with a particular political institution prior to independence the segment state a jurisdiction defined by both human and territorial boundaries Independence represents an administrative upgrade of a segment state Before independence segmental institutions shape politics on the periphery of an existing sovereign state Leaders of segment states are thus better positioned than other proponents of nation state endeavors to forge locally hegemonic national identities Before independence segmental institutions also shape the politics between the periphery and center of existing states Leaders of segment states are hence also more able to challenge the status quo and to induce the leaders of the existing state to concede independence Roeder clarifies the mechanisms that link such institutions to outcomes and demonstrates that these relationships have prevailed around the world through most of the age of nationalism Nomads and Soviet Rule Alun Thomas,2018-06-14 The nomads of Central Asia were already well accustomed to life under the power of a distant capital when the Bolsheviks fomented revolution on the streets of Petrograd Yet after the fall of the Tsar the nature ambition and potency of that power would change dramatically ultimately resulting in the near eradication of Central Asian nomadism Based on extensive primary source work in Almaty Bishkek and Moscow *Nomads and Soviet Rule* charts the development of this volatile and brutal relationship and challenges the often repeated view that events followed a linear path of gradually escalating violence Rather than the sedentarisation campaign being an inevitability born of deep rooted Marxist hatred of the nomadic lifestyle Thomas demonstrates the Soviet state s treatment of nomads to be far more complex and pragmatic He shows how Soviet policy was informed by both an anti colonial spirit and an imperialist impulse by nationalism as well as communism and above all by a lethal self confidence in the Communist Party s ability to transform the lives of nomads and harness the agricultural potential of their landscape This is the first book to look closely at the period between the revolution and the collectivisation drive and offers fresh insight into a little known aspect of early Soviet history In doing so the book offers a path to refining conceptions of the broader history and dynamics of the Soviet project in this key period **Social and Cultural Change in Central Asia** Sevkett Akyildiz,Richard Carlson,2013-10-15 Focusing on Soviet culture and its social ramifications both during the

Soviet period and in the post Soviet era this book addresses important themes associated with Sovietisation and socialisation in the Central Asian states of Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan The book contains contributions from scholars in a variety of disciplines and looks at topics that have been somewhat marginalised in contemporary studies of Central Asia including education anthropology music literature and poetry film history and state identity construction and social transformation It examines how the Soviet legacy affected the development of the republics in Central Asia and how it continues to affect the society culture and polity of the region Although each state in Central Asia has increasingly developed its own way the book shows that the states have in varying degrees retained the influence of the Soviet past or else are busily establishing new political identities in reaction to their Soviet legacy and in doing so laying claim to re defining and reinventing pre Soviet and Soviet images and narratives Throwing new light and presenting alternate points of view on the question of the Soviet legacy in the Soviet Central Asian successor states the book is of interest to academics in the field of Russian and Central Asian Studies **Soviet Nation-Building in Central Asia** Grigol Ubiria,2015-09-16 The demise of the Soviet Union in 1991 resulted in new state led nation building projects in Central Asia The emergence of independent republics spawned a renewed Western scholarly interest in the region s nationality issues Presenting a detailed study this book examines the state led nation building projects in the Soviet republics of Kazakhstan and Uzbekistan Exploring the degree forms and ways of the Soviet state involvement in creating Kazakh and Uzbek nations this book places the discussion within the theoretical literature on nationalism The author argues that both Kazakh and Uzbek nations are artificial constructs of Moscow based Soviet policy makers of the 1920s and 1930s This book challenges existing arguments in current scholarship by bringing some new and alternative insights into the role of indigenous Central Asian and Soviet officials in these nation building projects It goes on to critically examine post Soviet official Kazakh and Uzbek historiographies according to which Kazakh and Uzbek peoples had developed national collective identities and loyalties long before the Soviet era This book will be a useful contribution to Central Asian History and Politics as well as studies of Nationalism and Soviet Politics *Central Asia and the Caucasus* Touraj Atabaki,Sanjyot Mehendale,2004-11-10 Since the collapse of the Soviet Union a number of linkages have been established between newly independent Central Asian states or populations within them and diaspora ethnic groups This book explores the roles that diaspora communities play in the recent and ongoing emergence of national identities in Central Asia and the Caucasus The loyalties of these communities are divided between their countries of residence and those states that serve as homeland of their particular ethno cultural nation and are further complicated by connections with contested transnational notions of common cultures and peoples Written by highly respected experts in the field the book addresses issues such as nationalism conflict population movement global civil society Muslim communities in China and relations between the new nation states and Russia This innovative book will interest students and researchers of transnationalism and Central Asian studies **Censorship** Derek

Jones,2001-12-01 First published in 2002 Routledge is an imprint of Taylor Francis an informa company The Archaeology of Power and Politics in Eurasia Charles W. Hartley,G. Bike Yazicioğlu,Adam T. Smith,2012-11-19 For thousands of years the geography of Eurasia has facilitated travel conquest and colonization by various groups from the Huns in ancient times to the Union of Soviet Socialist Republics in the past century This book brings together archaeological investigations of Eurasian regimes and revolutions ranging from the Bronze Age to the modern day from Eastern Europe and the Caucasus in the west to the Mongolian steppe and the Korean Peninsula in the east The authors examine a wide ranging series of archaeological studies in order to better understand the role of politics in the history and prehistory of the region This book re evaluates the significance of power authority and ideology in the emergence and transformation of ancient and modern societies in this vast continent Humanization of Arms Control Daniel Rietiker,2017-07-06 Despite clear legal rules and political commitments no significant progress has been made in nuclear disarmament for two decades Moreover not even the use of these weapons has been banned to date New ideas and strategies are therefore necessary The author explores an alternative approach to arms control focusing on the human dimension rather than on States security humanization of arms control The book explores the preparatory work on arms control treaties and in particular the role of civil society It analyzes the positive experiences of the movements against chemical weapons anti personnel mines and cluster munitions as well as the recent conclusion of the Arms Trade Treaty The author examines the question of whether civil society will be able to replicate the success strategies that have been used in particular in the field of anti personnel mines Ottawa Convention and cluster munitions Oslo Convention in the nuclear weapons field Is there any reason why the most destructive weapons should not be outlawed by a legally binding instrument The book also explains the effects of weapons especially nuclear weapons on human beings the environment and global development thereby focusing on vulnerable groups such as indigenous peoples women and children It takes a broad approach to human rights including economic social and cultural rights The author concludes that the use of nuclear weapons is illegal under international humanitarian and human rights law and moreover constitutes international crimes under the Rome Statute of the International Criminal Court In his general conclusions the author makes concrete proposals for the progress toward a world without nuclear weapons *The Headless State* David Sneath,2007-12-21 In this groundbreaking work social anthropologist David Sneath aggressively dispels the myths surrounding the history of steppe societies and proposes a new understanding of the nature and formation of the state Since the colonial era representations of Inner Asia have been dominated by images of fierce nomads organized into clans and tribes but as Sneath reveals these representations have no sound basis in historical fact Rather they are the product of nineteenth century evolutionist social theory which saw kinship as the organizing principle in a nonstate society Sneath argues that aristocratic power and statelike processes of administration were the true organizers of life on the steppe Rethinking the traditional dichotomy between state and nonstate societies Sneath conceives of a headless state in which a

configuration of statelike power was formed by the horizontal relations among power holders and was reproduced with or without an overarching ruler or central head In other words almost all of the operations of state power existed at the local level virtually independent of central bureaucratic authority Sneath s research gives rise to an alternative picture of steppe life in which aristocrats determined the size scale and degree of centralization of political power His history of the region shows no clear distinction between a highly centralized stratified state society and an egalitarian kin based tribal society Drawing on his extensive anthropological fieldwork in the region Sneath persuasively challenges the legitimacy of the tribal model which continues to distort scholarship on the history of Inner Asia *National Identities in Soviet Historiography* Harun Yilmaz,2015-02-20 Under Stalin s totalitarian leadership of the USSR Soviet national identities with historical narratives were constructed These constructions envisaged how nationalities should see their imaginary common past and millions of people defined themselves according to them This book explains how and by whom these national histories were constructed and focuses on the crucial episode in the construction of national identities of Ukraine Azerbaijan and Kazakhstan from 1936 and 1945 A unique comparative study of three different case studies this book reveals different aims and methods of nation construction despite the existence of one party rule and a single overarching official ideology The study is based on work in the often overlooked archives in the Ukraine Azerbaijan and Kazakhstan By looking at different examples within the Soviet context the author contributes to and often challenges current scholarship on Soviet nationality policies and Stalinist nation building projects He also brings a new viewpoint to the debate on whether the Soviet period was a project of developmentalist modernization or merely a renewed Russian empire The book concludes that the local agents in the countries concerned had a sincere belief in socialism especially as a project of modernism and development and at the same time were strongly attached to their national identities Claiming that local communist party officials and historians played a leading role in the construction of national narratives this book will be of interest to historians and political scientists interested in the history of the Soviet Union and contemporary Eastern Europe the Caucasus and Central Asia

Political Islam in Central Asia Emmanuel Karagiannis,2009-12-04 A comprehensive study of one of the most feared but least understood international Islamist organizations in post Soviet Central Asia Hizb ut Tahrir Using primary sources and first hand accounts it analyses its leadership ideology political methodology and party structure and its future relationship to violence in this key region Central Asia in Art Aliya Abykayeva-Tiesenhausen,2016-06-20 In the midst of the space race and nuclear age Soviet Realist artists were producing figurative oil paintings Why How was art produced to control and co opt the peripheries of the Soviet Union particularly Central Asia Presenting the untold story of Soviet Orientalism Aliya Abykayeva Tiesenhausen re evaluates the imperial project of the Soviet state placing the Orientalist undercurrent found within art and propaganda production in the USSR alongside the creation of new art forms in Kazakhstan Kyrgyzstan and Uzbekistan From the turmoil of the 1930s through to the post Stalinist era the author draws on meticulous new research and

rich illustrations to examine the political and social structures in the Soviet Union and particularly Soviet Central Asia to establish vital connections between Socialist Realist visual art the creation of Soviet identity and later nationalist sentiments

Change in Post-Soviet Countries Balihar Sanghera, Sarah Amsler, Tatiana Yarkova, 2007 The book traces three main approaches to the sociology of post Soviet societies studies guided by neoliberal theory and or practice work which may be termed neoconservative in orientation and which is often a response to the first and a third type of work that is considered both critical and reflexive and which seeks to transcend the limitations of the other approaches The book is divided into three parts addressing polity culture and economy In each section authors endeavour to transcend both neoliberalism and neoconservatism and reach for a third approach critical social science This is a broad movement and the authors vary in their own explanatory and normative ideas as they carve out frameworks that will enable them to develop a more rigorous and at the same time more comprehensive and critical understanding of social change *Everyday Belonging in the Post-Soviet*

Borderlands Alina Jašina-Schäfer, 2021-04-28 *Everyday Belonging in the Post Soviet Borderlands* examines the Russophone communities in peripheral cities adjacent to the Russian borders in Estonia and Kazakhstan The research adopts a cross disciplinary space sensitive approach that focuses comparatively on individual memories narratives and performances Based on ethnographic examples this book reconstructs belonging as a complex dialectical relationship between inclusion and exclusion This relationship it is argued manifests itself through a continuous spiral of boundary construction appropriation and transgression among different versions of Estonianness and Kazakhness Europeanness and Cosmopolitanness as well as Russianness *Unity or Separation* Daniel R. Kempton, Terry D. Clark, 2001-11-30 Many analysts initially believed that the process of Soviet disintegration would inevitably open a Pandora s box of ethnic nationalism and regional self determination But despite obvious setbacks such as Chechnya the developments of the last decade have shown that while forces of disintegration remain a very real threat the fifteen successor states have managed to stay largely intact One explanation for

this somewhat unexpected success is the varied strategies of center periphery relations adopted by the post Soviet states tailored to meet the unique of circumstances faced by each former republic of the Soviet Union The contributors to this up to date volume examine the specific cases of success and failure in center periphery relations in the former USSR and offer some provocative overall conclusions about the progress made and the impact on the process of democratization The cases examined in this volume are drawn from Russia Lithuania Ukraine Uzbekistan among others These case studies demonstrate that realtions between national and local governments have been evolving differently in each of the successor states in the but in each case there has been a conscious attempt to create stable center periphery relations which give a degree of autonomy to minority groups while still providing for a stable state and democratic development This book will be of interest to scholars and students of the former Soviet Union and those interested in federalization and center periphery
