The Foundation Of Hope Turning Dreams Into Reality:

The Foundation of Hope John R. Elford, 2003-07-01 The Foundation of Hope is both a celebration and an analysis of the creation of Liverpool Hope University College in 1996 and of some of its achievements to date during an exciting period in British higher education The central focus is the student experience at Hope University College Contributors also examine the way that teaching and research in theology have developed over the years and the important community regeneration work Hope University College carries out in various areas of Liverpool

The Serendipity of Hope Simon Lee, Ian S. Markham, 2023-07-07 Institutions are very precious If any idea is going to persist into the future then it needs an institution to keep it going Each of us comes to understand often only gradually over the decades how some influences from our earlier life have affected us Some will have been inspiring Some will have given us direct models of how to behave or how not to behave Indeed it is often the case that the deeper an influence turns out to have been in the long run the less likely it is that we noticed it at the time it was happening For this reason it has become necessary to find the time to reflect on and express gratitude for the institutions that helped form who we are and the work that we do This collection of essays explores the impact of one institution on twenty five participants twenty five years after we worked together The Institution was Liverpool Hope University College and is now Liverpool Hope University By telling and reflecting on our stories we aim to encourage others to think about their own experiences and ultimately our earnest hope is that a greater awareness of this aspect of university life will help to transform our collective understanding of the nature of universities in particular and of communities institutions or societies in general But there was something special about belonging to a community called Hope

Faith in Higher Education Hirpo Kumbi, 2024-11-06 The higher education sector currently faces a series of challenges from internationalisation inclusivity financial cost and quality assurance This book examines the church founded model of higher education and argues that this is a promising approach for establishing greater levels of provision in the future especially in developing countries This book contains three case studies undertaken at church founded universities in the UK Kenya and Nigeria founded by church organisations but operating without denominational bias These reveal that this model emphasises the wellbeing of their students over the pursuit of profit and the delivery of relevant courses over easily marketed but unapplicable subjects These studies culminate in a set of recommendations for good practice which will be of use to church leaders policy makers and anyone concerned with widening participation in higher education Ultimately this book encourages co operation between churches and governments when establishing future institutions of higher education for the benefit of all
