The Invention of the White Race, Volume 2 Theodore W. Allen,2014-06-03 On the steps of the Lincoln Memorial in 1963 Martin Luther King outlined a dream of an America where people would not be judged by the color of their skin That dream has yet to be realized but some three centuries ago it was a reality Back then neither social practice nor law recognized any special privileges in connection with being white But by the early decades of the eighteenth century that had all changed Racial oppression became the norm in the plantation colonies and African Americans suffered under its yoke for more than two hundred years In Volume II of *The Invention of the White Race* Theodore Allen explores the transformation that turned African bond laborers into slaves and segregated them from their fellow proletarians of European origin In

response to labor unrest where solidarities were not determined by skin color the plantation bourgeoisie sought to construct a buffer of poor whites whose new racial identity would protect them from the enslavement visited upon African Americans This was the invention of the white race an act of cruel ingenuity that haunts America to this day Allen s acclaimed study has become indispensable in debates on the origins of racial oppression in America In this updated edition scholar Jeffrey B Perry provides a new introduction a select bibliography and a study guide The Churches of the Crusader Kingdom of Jerusalem: A Corpus: Volume 2, L-Z (excluding Tyre) Denys Pringle,1993 This is the second of a series of four volumes that are intended to present a complete corpus of all the church buildings of both the western and the oriental rites rebuilt or simply in use in the Crusader Kingdom of Jerusalem between the capture of Jerusalem for the First Crusade in 1099 and the loss of Acre in 1291 This volume completes the general topographical coverage begun in volume I and will be followed by a third volume dealing specifically with the major cities of Jerusalem Acre and Tyre which are excluded from the preceding volumes The project of which this series represents the final definitive publication has been sponsored by the British School of Archaeology in Jerusalem On completion the corpus will contain a topographical listing of all the 400 or more church buildings of the Kingdom that are attested by documentary or surviving archaeological evidence and individual descriptions and discussion of them in terms of their identification building history and architecture Some of the buildings have been published before but many others are published here for the first time **British Books** ,1910 **The Yale Review**
