digitally via www.bloomsburycollections.com **Managing People and Organizations** Guido Stein, 2010-07-16 Peter Drucker was timely and inopportune at the same time It is clear that from his continual formation there has been born a singular and at the same time multi faceted philosophy which is deliberately difficult to summarize This book shows the lesser known side of Peter Drucker as far as his views on his own ideas are concerned **The World of Work** Robert Dubin, 2017-06-26 This book first published in 1958 concerns American industry and commerce and is devoted to what people do while they are working and reasons for their behaviour This volume should prove valuable as an attempt to make systematic sense out of work in our industrial world The balance of fact and theory is useful to those interested in understanding this complex world of working behaviour and will be of interest to students of human resource management

Firm-Level Innovation In Africa Abiodun Egbetokun, Richmond Atta-Ankomah, Oluseye Jegede, Edward Lorenz, 2020-04-29 The literature on innovation in Africa is rapidly expanding and a recurring thread in the emergent literature is the pervasiveness of systemic weaknesses that inhibit the innovation process Despite these firms are able to innovate in Africa It is then logical to ask how do African firms manage to overcome the prevalent constraints and learn to innovate This book directly tackles this question with a view to improving our understanding of the innovation landscape in Africa The book brings together some of the latest innovation research from across the African continent ranging from Tanzania and Ethiopia in the east to Nigeria in the west The chapters included in the collection adopt different but complementary theoretical and methodological approaches to address a rich mix of interrelated issues These issues include the factors that enhance or inhibit innovation in African firms the sources of knowledge information for innovation policy options for overcoming constraints and facilitating firm level innovation the nature and roles of brokers and intermediaries in dealing with innovation constraints and in facilitating the innovation process and the role of interactive learning and acquisition of embodied technology in the innovation process This book was originally published as a special issue of *Innovation and Development* Business □□□□□□□□□□, 2003 *Progressive Business* Christian Christiansen, 2015 This book offers a new intellectual history of ideas about reforming capitalism from within Tracing the emergence of different value systems in the American context the book offers a fresh perspective on debates about capitalism in the late 19th century and 20th century US *Taylorism Transformed* Stephen P. Waring, 2016-08-01 This intellectual history interprets recent American business management ideas as political theory describing their underlying assumptions about power and value According to Stephen Waring most business management theory descends from either Frederick Taylor's bureaucratic

Making and Selling Cars James M. Rubenstein, 2003-04-01 From the creation of fast food to the design of cities to the character of our landscape the automobile has shaped nearly every aspect of modern American life In fact the U.S. motor vehicle industry is the largest manufacturing industry in the world James Rubenstein documents the story of the automotive industry which despite its power is an industry constantly struggling to redefine itself and assure its success Making and Selling Cars Innovation and Change in the U.S. Automotive Industry shows how this industry made adjustments and fostered innovations in both production and marketing in order to remain a viable force throughout the twentieth century Rubenstein builds his study of the American auto industry with care taking the reader through this quintessentially modern history of production and consumption Avoiding jargon while never over simplifying

Rubenstein gives a detailed and straightforward account of both the production and merchandising of cars. We learn how the industry began and about its methods for building cars and the modern American marketplace. Along the way there were many missteps and challenges: the Edsel, the fuel crisis and the ascendancy of Japanese cars in the 1980s. The industry met these types of problems with new techniques and approaches. To demonstrate this, Rubenstein gives the reader examples of how the auto industry used to work, which he alternates with chapters showing how the industry has reinvented itself. *Making and Selling Cars* explains why the U.S. automotive industry has been and remains a vigorous shaper of the American economy.

Mirrors for Princes Michael Keeley, 2024. *Mirrors for Princes* is a history of the business book predating modern leadership and management literature by thousands of years, common to cultures throughout the world. Mirrors for Princes, as this genre was known, taught kings, queens, sultans, and other rulers how to lead their subjects. Machiavelli's *The Prince* and Aristotle's tips for tyrants in *The Politics* are but the best known examples. Often written for general audiences, this literature also taught readers to copy the virtues of fabled leaders and to follow the lead of their own rulers. After falling out of favor for the last two centuries, the genre found new life in modern mirrors for managers, which are riddled with the same self-serving clichés. This book seeks to familiarize readers with the clichés of mirrors for princes so they can more easily recognize them in both academic and popular literature on leadership. *Modern Corporation and American Political Thought* Scott

Bowman, 2010-11-01. *The Moot Papers* Keith Clements, 2015-02-26. The Moot was the study and discussion group set by J. H. Oldham in 1874-1969 following the 1937 Oxford conference on Church, Community, and State. Its purpose was to continue in an informal but serious way exploration of the relation between church and society and the realization of Christian ethics in the public sphere. The Moot met twice or three times a year from 1938 to 1947, 21 times in all, and was convened by Oldham with the conscious intention of responding to the grave crisis that was felt to be facing western society in Britain, no less than on the continent of Europe. Overall, some 35 people attended the Moot at one time or another, but its core comprised a small number of regular members who were representative of the highest levels in theology, social science, and public affairs. In addition to Oldham himself, they included T. S. Eliot, H. A. Hodges, Eleonora Iredale, Adolf Loew, Karl Mannheim, Walter Moberly, John Middleton Murry, and Alec Vidler. Other participants included Kathleen Bliss, Fred Clarke, Christopher Dawson, H. H. Farmer, Hector Hetherington, Walter Oakshott, and Gilbert Shaw, while notables such as Reinhold Niebuhr, Melville Channing Pearce, Donald McKinnon, Philip Mairet, Leslie Newbiggin, William Paton, Frank Pakenham, later Lord Longford, Michael Polanyi, and Oliver Tomkins made occasional guest appearances. Against the background of impending and then actual war, the discussions in the Moot repeatedly focused on the planned nature of modern society and therewith the roles, if any, within it of moral choice and the Christian community. Thomas Hobbes Robin E. R. Bunce, R.E.R. Bunce, 2009-05-15. Making Global MBAs Andrew Orta, 2019-10-01. A generation of aspiring business managers has been taught to see a world of difference as a world of opportunity. In *Making Global MBAs*, Andrew Orta examines the culture of contemporary business.

education and the ways MBA programs participate in the production of global capitalism through the education of the business subjects who will be managing it Based on extensive field research in several leading US business schools this groundbreaking ethnography exposes what the culture of MBA training says about contemporary understandings of capitalism in the context of globalization Orta details the rituals of MBA life and the ways MBA curricula cultivate both habits of fast paced technical competence and softer qualities and talents thought to be essential to unlocking the value of international cultural difference while managing its risks Making Global MBAs provides an essential critique of neoliberal thinking for students and professionals in a wide variety of fields

The Legitimacy of the Business Corporation in the Law of the United States, 1780-1970 James Willard Hurst, 2004 This study which is based on a series of lectures delivered at the University of Virginia Law School explores the development of corporate law from the 1780s a time when the special charter was the only form of incorporation to the 1960s a time when corporations were established exclusively through general incorporation statutes More than a chronicle Hurst emphasizes how legal institutions actively shaped the central traits of American capitalism
