The Future Of Religion:

The Future of Religion Rodney Stark, William Sims Bainbridge, 1985 Religion is alive and well in the modern world and the social scientific study of religion is undergoing a renaissance For much of this century respected social theorists predicted the death of religion as inevitable consequence of science education and modern economics But they were wrong Stark and Bainbridge set out to explain the survival of religion Using information derived from numerous surveys censuses historical case studies and ethnographic field expeditions they chart the full sweep of contemporary religion from the traditional denominations to the most fervent cults This wealth of information is located within a coherent theoretical framework that examines religion as a social response to human needs both the general needs shared by all and the desires specific to those who are denied the economic rewards or prestige enjoyed by the privileged By explaining the forms taken by religions today Stark and Bainbridge allow us to understand its persistence in a secular age and its prospects for the future

The Future of Religion and the Religion of the Future Theodore John Rivers, 2011-11-25 In The Future of Religion and the Religion of the Future Theodore John Rivers explores the changing relationship between technology and religion Rivers draws upon his expertise in the fields of medieval and religious history to discuss how the promotion of Christianity and monasticism in the Middle Ages began a process that has lent religious undertones to the way in which we interact with modern technology Rivers ultimately suggests that the growing presence of technology makes it a likely candidate for the next religious form competing with all the major religions in place today

After God Don Cupitt, 1997-04-18 Considers the fate of religion the evolution of religious belief from the dawn of the gods to their twilight and tomorrow Challenges us to see religion less as an ideology and more as a tool kit a set of techniques perhaps an art form enhancing our lives the way that literature and art do

The Future of Religion Richard Rorty, Gianni Vattimo, 2005-02-02 Though coming from different and distinct intellectual traditions Richard Rorty and Gianni Vattimo are united in their criticism of the metaphysical tradition The challenges they put forward extend beyond philosophy and entail a reconsideration of the foundations of belief in God

and the religious life They urge that the rejection of metaphysical truth does not necessitate the death of religion instead it opens new ways of imagining what it is to be religious ways that emphasize charity solidarity and irony This unique collaboration which includes a dialogue between the two philosophers is notable not only for its fusion of pragmatism Rorty and hermeneutics Vattimo but also for its recognition of the limits of both traditional religious belief and modern secularism In Anticlericalism and Atheism Rorty discusses Vattimo's work Belief and argues that the end of metaphysics paves the way for an anti essentialist religion Rorty's conception of religion determined by private motives is designed to produce the gospel's promise that henceforth God will not consider humanity as a servant but as a friend In The Age of Interpretation Vattimo who is both a devout Catholic and a frequent critic of the church explores the surprising congruence between Christianity and hermeneutics in light of the dissolution of metaphysical truth As in hermeneutics interpretation is central to Christianity which introduced the world to the principle of interiority dissolving the experience of objective reality into listening to and interpreting messages The lively dialogue that concludes this volume moderated and edited by Santiago Zabala analyzes the future of religion together with the political social and historical aspects that characterize our contemporary postmodern postmetaphysical and post Christian world

The Future of Religion Michael R. Ethics and the Future of Religion W. Royce Clark, 2022-02-03 W Royce Clark observes that humanity appears to be jeopardizing our own future in a chaos of mutual antagonism and hypocrisy Religions have traditionally provided ethical guidance but because their absolutized metaphysics are incompatible with each other we cannot rely on any one of them in a religiously pluralistic culture The ethics of various religions are also built on theocratic or authoritarian foundations which are incompatible with any democratic society Finally many of their premises are very ancient so not relevant or appropriate in our modern scientific world The Western Enlightenment brought challenges against religion's singularity exclusivity heteronomy and anti scientific assumptions all of which disrupted their ethics and the Absolute metaphysical grounds upon which those ethics rested raising the question of whether a freestanding

ethic was possible Inasmuch as the primary claim of most religions was regarded as beyond challenge but was a conflation of history and myth modern historical method created more doubt than certainty about such allegedly certain doctrines as Jesus is the Son of God By the end of the 20th century the impossibility of validating such primary Christological claims from a historical approach became evident despite the articulate attempts at credibility in the brilliant works of John Dominic Crossan and Wolfhart Pannenberg which remained unconvincing in important ways Between 1832 and 2014 innovative Christian theologians such as Schleiermacher Hegel Tillich and Scharlemann took a detour from the futility of historical verification This study examines their remarkable attempts at a form of corroboration of the basic Christological claim even if their primary interests were more in Christology than ethics The question Clark takes up here is whether or not these figures have thereby provided a base for a universal ethic or the only answer is for principles freestanding from any religion *The Future of the Study of Religion* Slavica Jakelic, Lori Pearson, 2018-08-14 This volume brings together diverse voices from various fields within religious and theological studies for a conversation about the proper objects goals and methods for the study of religion in the twenty first century It approaches these questions by way of the most recent contemporary challenges debates and developments in the field and provides a forum in which contending perspectives are tested and contested by their proponents and opponents Contributors address topics such as the connection between the normative and the scientific approaches to the study of religion the meaning of religion in a context of globalization the relation between religious studies and religious traditions the viability of comparative and cultural studies of religious phenomena and the future of gender studies in religion **The Religion of the Future** Roberto Mangabeira Unger, 2014-04-08 A book about religion and a religious work in its own right it proposes the content of a religion that can survive faith in a transcendent God and in life after death According to this religion the religion of the future human beings can be more human by becoming more godlike not just later in another life or another time but right now on Earth and in their own lives Publishers website *The Future of Christianity* John Stenhouse, Brett Knowles, Antony Wood, 2004 This book written by a group of New Zealand scholars theologians historians and lawyers examines the question of New Zealand s Western culture and Christianity The contributors explore recent debates over secularisation exploring its merits and explanatory power while also showing its limitations **The Future of Religion** Kathleen Bliss, 1972 **Crimes of the Future** Jean-Michel Rabat, 2014-04-24 Crimes of the Future sees one of the world s leading literary theorists exploring the past present and potential future of Theory **The World's Best Poetry: Love; introductory essay: The future of poetry, by J.V. Cheney** John Vance Cheney, Sir Charles George Douglas Roberts, Francis Hovey Stoddard, Charles Francis Richardson, John Raymond Howard, 1904 **The Non-religion of the Future: A Sociological Study** Jean-Marie Guyau, 2015-01-09 Example in this ebook I Sociality the basis of religion Its definition I We shall meet in the course of this work many different definitions that have at one time or another been given to religion Some were assigned from the point of view of physics others from that of

metaphysics others from that of morals almost none from that of sociology And yet upon closer scrutiny the notion of a social bond between man and the powers superior to him but resembling him is precisely the point in which all religious conceptions are at one Man becomes truly religious in our judgment only when above the human society in which he lives he superimposes in his scheme of the world another society more powerful and more cultured a universal and so to speak a cosmic society The sphere of sociality which is one of the characteristics of humanity must be enlarged till it reaches to the stars Sociality is the firm foundation of the religious sentiment and a religious being might be defined as a being disposed to be sociable not only with all living creatures with whom experience makes him acquainted but also with the creatures of thought with whom he peoples the world That religion consists essentially in the establishment of a bond at first mythical and subsequently mystic in the first instance between man and the forces of the universe then between man and the universe itself and ultimately between man and the elements of the universe is distinctly the outcome of every study of religion but what we wish especially here to consider is the precise way in which this bond has been conceived Well it may appear more clearly at the close of this inquiry the religious bond has been conceived ex analogia societatis human the relations amicable and inimical of men to each other were employed first for the explanation of physical phenomena and natural forces then for the metaphysical explanation of the world of its creation conservation and government in short sociological laws were universalized and the state of war or peace which existed among men families tribes and nations was conceived as existing also among the volitions which were fancied to exist beneath or beyond the forces of nature A mythic or mystic sociology conceived as containing the secret of all things lies at the basis of all religions Religion is not simply the expression of an anthropomorphism animals and fantastic beings of various sorts have played no inconsiderable r le in different cults it is an imaginative extension a universalization of all the good or evil relations which exist among conscious beings of war and peace friendship and enmity obedience and rebellion protection and authority submission fear respect devotion love religion is a universal sociomorphism Social relations with animals with the dead intellectual and social relations with good and evil genii with the forces of nature are nothing more nor less than various forms of this universal sociology in which religion has sought to find the reason of things of physical phenomena such as thunder storm sickness death as well as of metaphysical relations the origin and destiny of things and of moral relations virtue vice law and sanction To be continue in this ebook
