The Future Of The Non Proliferation Treaty:

The Future of the Non-Proliferation Treaty Darryl Howlett, John Simpson, 2016-07-27 In 1995 a Conference is to be convened to review and extend the Treaty on the NonProliferation of Nuclear Weapons NPT The Future of the NPT brings together a distinguished group of individuals including the elected President of the 1995 NPT Conference to analyse four crucial agenda areas relevant to the Conference the preConference activities to be undertaken by both States Parties and the Conference Secretariat those security issues that relate to a review of the treaty such as nuclear disarmament and security assurances peaceful uses and verification questions and regional issues With nuclear nonproliferation currently occupying a prominent position on the international security agenda the 1995 Conference offers a unique opportunity for a constructive discussion on these areas and it is hoped that this volume will provide a contribution to that end **Contending**

Approaches in Disarmament and the Future of Nuclear Non-Proliferation Annabel Hertz, 1993 *The Future of the International Nuclear Non-Proliferation Regime* Marianne van Leeuwen, 2023-10-20 The 1995 conference on the review and extension of the Nuclear Non Proliferation Treaty may well mark an important turning point The treaty itself but also the wider international regime built around it are at stake The Future of the International Nuclear Non Proliferation Regime deals with various aspects of the problems of nuclear proliferation and the international struggle against it Authors from Europe the United States and Australia have contributed to this book which was produced under the auspices of the Netherlands Institute of International Relations Clingendael The reader is first offered regional case studies on North Korea South Asia the Middle East and the former Soviet Union followed by chapters on nuclear safeguards and export controls systems and contributions on a Comprehensive Test Ban Treaty and security guarantees The two concluding chapters evaluate and propose policies to strengthen the non proliferation regime beyond 1995 It will be of interest to policy makers students of international relations and journalists **The Future of NPT** Savita Pande, 1995 *Western Europe and the*

Future of the Nuclear Non-proliferation Treaty Centre for European Policy Studies (Brussels, Belgium), 1989 **The Nuclear Non-proliferation Treaty** Ian Bellany, Coit D. Blacker, Joseph Gallacher, 2014-05-01 This study looks at the interpretations and effects of the Nuclear Non Proliferation Treaty and offers readings of its possible future effects

Negotiating the Nuclear Non-Proliferation Treaty Roland Popp, Livia Horovitz, Andreas Wenger, 2016-10-04 This volume offers a critical historical assessment of the negotiation of the Treaty on the Non Proliferation of Nuclear Weapons NPT and of the origins of the nonproliferation regime The NPT has been signed by 190 states and was indefinitely extended in 1995 rendering it the most successful arms control treaty in history Nevertheless little is known about the motivations and strategic calculi of the various middle and small powers in regard to their ultimate decision to join the treaty despite its discriminatory nature While the NPT continues to be central to current nonproliferation efforts its underlying mechanisms remain under researched Based on newly declassified archival sources and using previously inaccessible evidence the

contributions in this volume examine the underlying rationales of the specific positions taken by various states during the NPT negotiations Starting from a critical appraisal of our current knowledge of the genesis of the nonproliferation regime contributors from diverse national and disciplinary backgrounds focus on both European and non European states in order to enrich our understanding of how the global nuclear order came into being This book will be of much interest to students of nuclear proliferation Cold War history security studies and IR

Reviewing the Nuclear Nonproliferation Treaty (NPT) Henry D. Sokolski, Army War College (U.S.). Strategic Studies Institute, 2010 As currently interpreted it is difficult to see why the Nuclear Nonproliferation Treaty NPT warrants much support as a nonproliferation convention Most foreign ministries including that of Iran and the United States insist that Article IV of the NPT recognizes the inalienable right of all states to develop peaceful nuclear energy This includes money losing activities such as nuclear fuel reprocessing which can bring countries to the very brink of acquiring nuclear weapons If the NPT is intended to ensure that states share peaceful benefits of nuclear energy and to prevent the spread of nuclear bomb making technologies it is difficult to see how it can accomplish either if the interpretation identified above is correct Some argue however that the NPT clearly proscribes proliferation by requiring international nuclear safeguards against military diversions of fissile material Unfortunately these procedures which are required of all non nuclear weapons state members of the NPT under Article III are rickety at best Each chapter of this book is dedicated to clarifying the NPT's key ambiguities and the chapters are roughly structured to trace the NPT's text article by article The analysis set forth here was mostly written or commissioned by the Nonproliferation Policy Education Center Much more of course could have been included in this book But rather than seeking to be comprehensive the aim throughout is to provide a guide for both policymakers and security analysts This guide should assist in navigating the most important debates over how best to read and implement the NPT and in the process spotlighting alternative views of the NPT that are sound and supportable Related products Treaties in Force A List of Treaties and Other International Agreements of the United States in Force on January 1 2016 can be found here <https://bookstore.gpo.gov/products/sku/044-000-02684-8> The Warsaw Pact Treaty of Friendship Cooperation and Mutual Assistance Soviet East European Military Relations in Historical Perspective Sources and Reassessments can be found here <https://bookstore.gpo.gov/products/sku/041-015-00306-2> Moving Beyond Pretense Nuclear Power and Nonproliferation can be found here <https://bookstore.gpo.gov/products/sku/008-000-01098-6>

Diplomacy and the Future of World Order Chester A. Crocker, Fen Osler Hampson, Pamela Aall, 2021-05-03 An international group of experts confront challenges to peace and conflict diplomacy by considering three potential scenarios for world order evaluated through regional perspectives from around the world where key states decide to go it alone return to a liberal order or collaborate on a case by case basis

Routledge Handbook of Nuclear Proliferation and Policy Joseph Pilat, Nathan Busch, 2015-05-15 This new Handbook is a comprehensive examination of the rich and complex issues of nuclear proliferation in the early 21st century The future of the decades long effort to prevent the further

spread of weapons of mass destruction is at a crossroads today. If international nonproliferation efforts are to be successful, an integrated multi-tiered response will almost certainly be necessary. A serious, thorough and clear-eyed examination of the range of threats, challenges and opportunities facing the international community is a necessary first step. This Handbook, which presents the most up-to-date analysis and policy recommendations on these critical issues by recognized leading scholars in the field, intends to provide such an examination. The volume is divided into three major parts. Part I presents detailed threat assessments of proliferation risks across the globe, including specific regions and countries. Part II explains the various tools developed by the international community to address these proliferation threats. Part III addresses the proliferation risks and political challenges arising from nuclear energy production, including potential proliferation by aspiring states and nonstate groups. This Handbook will be of great interest to students and practitioners of nuclear proliferation, arms control, global governance, diplomacy and global security and IR generally.

The future of the UK's strategic nuclear deterrent Great Britain: Parliament: House of Commons: Defence Committee, 2007-03-07. The Government white paper Cm 6994 ISBN 9780101699426 recommended the renewal of the Trident system and wanted a decision made in 2007 as delay would imperil the UK's security. This report analyses the white paper's findings and conclusions and explores the key issues and questions which should be addressed in the debate on the future of the deterrent. The Committee reports some disagreement with the Government's timetable for procurement of new submarines. The reduction in the total number of warheads is welcomed but as the number deployed on submarines is not to change the Committee is uncertain of the operational significance of this measure. The Committee would also like clarification of the nature and geographical scope of what the Government considers the UK's vital interests for which the nuclear deterrent exists. There appears to be no legal consensus that the proposals are consistent with all of the UK's international obligations, in particular the Nuclear Non-proliferation Treaty, so political considerations will govern the renewal decision. Detailed estimates of the costs are vital to inform the debate. The Committee acknowledges the Government's efforts at openness on this matter.

Tuning Priorities in

Nuclear Arms Control and Non-proliferation A. I. Nikitin, Morten Bremer Mærli, 2008 This publication contributes to the discussion about better understanding and mutual tuning of Russian and Western approaches to strengthening the nuclear non proliferation regime responding to situations like those in Iran and North Korea synchronizing priorities in the elimination of excessive fissile materials and most of all in the preservation of existing and the development of new agreements in nuclear arms control and nuclear disarmament An important aspect of this is raising awareness of the current crisis in nuclear arms control Such international inter agency and cross cultural dialogue provides an opportunity for maintaining the wide ranging dialogue required for strengthening arms control arrangements and for establishing new ones with clearly defined and measurable scopes and verification systems *Energy Abstracts for Policy Analysis* ,1987-07

The United Kingdom and the Future of Nuclear Weapons Andrew Futter, 2016-06-16 Since 1969 the United Kingdom always has always had one submarine armed with nuclear tipped ballistic missiles underwater undetected in constant communication ready at a set notice to fire at targets anywhere in the world This is part of its Trident Programme which includes the development procurement and operation of the current generation of British nuclear weapons as well as the means to deliver them Operated by the Royal Navy and based at Clyde Naval Base on Scotland's west coast it is the most expensive and most powerful capability of the British military forces In 2016 the United Kingdom had to decide on whether to go ahead and build the next generation of nuclear submarines that will allow the UK to remain in the nuclear business well into the second half of this century The book presents the political cultural technical and strategic aspects of Trident to provide a thoughtful overview of the UK's complex relationship with nuclear weapons The authors both scholars and practitioners bring together diverse perspectives on the issue discussing the importance of UK nuclear history as well as the political legal and diplomatic aspects of UK nuclear weapons internationally and domestically Also addressed are the new technical military and strategic challenges to the UK nuclear thinking and strategy

Joining the Non-Proliferation Treaty John Baylis, Yoko Iwama, 2018-07-11 What were the calculations made by the US and its major allies in the 1960s when they faced the signing of the Non Proliferation Treaty NPT These were all states with the technological and financial capabilities to develop and possess nuclear weapons should they wish to do so In the end only the United Kingdom and France became nuclear weapon states Eventually all of them joined the non proliferation regime Leading American British Canadian French German and Japanese scholars consider key questions that faced the signatories to the NPT How imperative was nuclear deterrence in facing the perceived threat to their country How reliable did they think the US extended deterrence was and how costly would an independent deterrent be both financially and politically Was there a regional option How much future was there in the civilian nuclear energy sector for their country and what role would the NPT play in this area What capabilities needed to be preserved for the country's future and how could this be made compatible with the NPT What were the determining factors of deciding whether to join the NPT *Previewing the Nuclear Non-proliferation Treaty Review Conference* United
