## **The Gaia Peace Atlas Survival Into The Third Millennium:**

**The Gaia Peace Atlas** Frank Barnaby,1988      *The Gaia Peace Atlas* Frank Barnaby,1988 Alberta Authorized resource for grade 10 12 1990 1998      **Redeeming the Time** Stephen Bede Scharper,1998-06-01 This is an examination of environmental theology from 4 major viewpoints Scharper explores the viewpoints of process theology the new cosmology of Thomas Berry ecofeminism and liberation theologians      **Collected Essays 3** John Scales Avery,2015-11-22 This book contains a collection of essays and articles by John Scales Avery discussing the severe problems and challenges which the world faces during the 21st century Human civilization and the biosphere are threatened by catastrophic climate change Unless rapid steps are taken to replace fossil fuels by 100% renewable energy we risk passing a tipping point beyond which uncontrollable feedback loops could produce a 6th extinction event comparable to those observed in the geological record Another serious threat to human civilization and the biosphere is the danger of a catastrophic thermonuclear war Over a long period of time there is an ever increasing risk that such a war will occur by accident or miscalculation Thirdly there is threat of an extremely serious and widespread famine produced by the climate change rapidly growing populations and the end of the fossil fuel era We must urgently address all three challenges      **The Empathic Civilization** Jeremy Rifkin,2009-12-31 One of the leading big picture thinkers of our day Utne Reader delivers his boldest work in this erudite tough minded and far reaching manifesto Never has the world seemed so completely united in the form of communication commerce and culture and so savagely torn apart in the form of war financial meltdown global warming and even the migration of diseases No matter how much we put our minds to the task of meeting the challenges of a rapidly globalizing world the human race seems to continually come up short unable to muster the collective mental resources to truly think globally and act locally In his most ambitious book to date bestselling social critic Jeremy Rifkin shows that this disconnect between our vision for the world and our ability to realize that vision lies in the current state of human consciousness The very way our brains are structured disposes us to a way of feeling thinking and acting in the world that is no longer entirely relevant to the new environments we have created for ourselves The human made environment is rapidly morphing into a global space yet our existing modes of consciousness are structured for earlier eras of history which are just as quickly fading away Humanity Rifkin argues finds itself on the cusp of its greatest experiment to date refashioning human consciousness so that human beings can mutually live and flourish in the new globalizing society In essence this shift in consciousness is based upon reaching out to others But to resist this change in human relations and modes of thinking Rifkin contends would spell ineptness and disaster in facing the new challenges around us As the forces of globalization accelerate deepen and become ever more complex the older faith based and rational forms of consciousness are likely to become stressed and even dangerous as they attempt to navigate a world increasingly beyond their reach and control Indeed the emergence of this empathetic consciousness has implications for the future that will likely be as profound and far reaching as when

Enlightenment philosophers upended faith based consciousness with the canon of reason      A Natural History of Peace Thomas Gregor,1996 A stimulating and innovative consideration of the concept causes and practice of peace in societies both ancient and modern human and primate We know a great deal about aggression conflict and war but relatively little about peace partially because it has been such a scarce phenomenon throughout history and in our own times Peace is more than the absence of war Peace requires special relationships structures and attitudes to promote and protect it A Natural History of Peace provides the first broadly interdisciplinary examination of peace as viewed from the perspectives of social anthropology primatology archeology psychology political science and economics Among other notable features this volume offers a major theory concerning the evolution of peace and violence through human history an in depth comparative study of peaceful cultures with the goal of discovering what it is that makes them peaceful one of the earliest reports of a new theory of the organization and collapse of ancient Maya civilization a comparative examination of peace from the perspective of change including the transition of one of the world s most violent societies to a relatively peaceful culture and the decision making process of terrorists who abandon violence and a theory of political change that sees the conclusion of wars as uniquely creative periods in the evolution of peace among modern nations      **The Illusion of Progress** Alexander Gillespie,2014-05-14 Is sustainable development a charade sold to an increasingly misled public This book presents a wide ranging penetrating critique of sustainability and what it actually means The author argues that despite the rhetoric of socially and environmentally sustainable development and the ever increasing number of legislative environmental policies the real issues such as consumption population growth and equity are either sidestepped or manipulated in international policy and law Analyzing the main areas of concern economic growth market structure trade aid debt security and sovereignty he shows that the entire development structure and the underpinnings of the debate are leading down quite a different path to that intended by sustainability      **The Rise Of The Antichrist** Kamran Faqir,2019-04-02 The Rise of The Antichrist carefully investigates the measurable effects of politics religion science and technology on the human psyche All mainstream religions traditionally share similar perspectives regarding the Antichrist and his developing systems which have been foretold by all prophets or messengers dutifully sent to every nation over time This book carefully explores the much debated topic of the Antichrist regarding his future emergence Will he lead humanity to eternal darkness or enlightenment Although modern science and human history popularly refer to the last 5 000 15 000 years of development in reality there are signs and evidence that human development is considerably older with possibilities of supernatural or otherworldly intervention This book explores stories such as the Nimrod who meticulously researched into longevity and occult magic with a possibility of alien or supernatural influence which was captured on stone glyphs Throughout history there have been developed mighty empires whose chosen kings proclaimed to be Gods But were they actually inter dimensional beings This book will ideally suit readers with an active interest in religion historical events and those interested in a thought provoking

read *Gandhian Alternative (vol. 1 : Gandhian Worldview)* Suresh Misra,2005 *Breathing: Violence In, Peace Out* Ivana Milojevic,2013-10-01 An investigation into the long term impact of transgenerational trauma and the possibilities for healing this book explores the links between personal histories and world events and helps us to understand life's dualities violence and peace self and other stability and change slavery and freedom Author Ivana Milojevic asks How does violence change us Is it possible to change the inner landscape of one's thinking in the midst of pain and suffering and If this is our past how might our future be different Oscillating between two voices Milojevic journeys between the personal breathing in which describes her experience of violence while the second academic voice breathing out tries to make sense of it The rhythm created by inhaling and exhaling reflects not only what we take from the world but also what we give back to it Breathing is an inquiry into alternative futures as Milojevic explores a range of possibilities both for each of us personally and for the world **Peace** Antony Adolf,2013-05-08 How peace has been made and maintained experienced and imagined is not only a matter of historical interest but also of pressing concern Peace A World History is the first study to explore the full spectrum of peace and peacemaking from prehistoric to contemporary times in a single volume aimed at improving their prospects By focusing on key periods events people ideas and texts Antony Adolf shows how the inspiring possibilities and pragmatic limits of peace and peacemaking were shaped by their cultural contexts and in turn shaped local and global histories Diplomatic pacifist legal transformative non violent and anti war movements are just a few prominent examples Proposed and performed in socio economic political religious philosophical and other ways Adolf's presentation of the diversity of peace and peacemaking challenges the notions that peace is solely the absence of war that this negation is the only task of peacemakers and that history is exclusively written by military victors Without the victories of peacemakers and the resourcefulness of the peaceful he contends there would be no history to write This book is essential reading for students scholars policy shapers activists and general readers involved with how present forms of peace and peacemaking have been influenced by those of the past and how future forms can benefit by taking these into account The Need for a New Economic System John Scales Avery,2016-02-07 It is clear that our present economic system is unsustainable Never ending exponential industrial growth on a finite planet is a logical absurdity We are already using resources at a rate which it would take 1.6 planet earths to replace We are already undermining the ecological systems which support all of life Our present economic system has led to an unbelievable degree of economic inequality To maintain this inequality both between nations and within nations military force is used and democracy is replaced by oligarchy The future of human civilization is endangered both by the threat of thermonuclear war and by the threat of catastrophic climate change and both of the twin threats are results of our present economic system This book documents in detail the serious economic problems of today's world and it also proposes sustainable solutions A Cultural Theory of International Relations Richard Ned Lebow,2008-12-11 An original theory of politics and international relations based on ancient Greek ideas of human motivation **Space-Age Science and**

**Stone-Age Politics** John Scales Avery, 2016-02-07 Space age science and stone age politics make an extraordinarily dangerous mixture. It seems probable that in the future the rapidity of scientific and technological change will produce ethical dilemmas and social tensions even more acute than those we experience today. It is likely that the fate of our species and the fate of the biosphere will be made precarious by the astonishing speed of scientific and technological change unless this progress is matched by the achievement of far greater ethical and political maturity than we have yet attained.

**World Christian Trends Ad30-ad2200 (hb)**, 2001

**Promoting Health Through Creativity** Therese Schmid, 2006-06-14 This book is about redefining the value to health of creativity. Creativity derives from biological changes during human evolution as a tool that is needed for survival. The successful use of creativity generates feelings of pleasure and self-esteem that are beneficial to health. In particular, it can help depression. Current values do not give adequate importance to creativity, and the author challenges these values in this book. The book contains contributed chapters on a theory of creativity as an innate capacity, the therapeutic benefits of creativity, factors that encourage or inhibit creativity, and current research on these and accounts of creativity both as individual projects and as groupwork.

**A Core Bibliography on Global Issues Related to Environment, Resources, Population, and Sustainable Development**, 1991

**Land Circle** Linda M. Hasselstrom, 2010-05 A new kind of rancher and a new kind of environmentalist. Linda M. Hasselstrom speaks with an eloquent simplicity in *Land Circle* while exploring her visceral connection with the land and the people of the Great Plains. A true voice from the heartland, Hasselstrom urges the preservation of a vanishing way of life and declares in unequivocal terms the intrinsic value of the plains. She vividly portrays both the landscape and the local sensibilities, exploring *Where Neighbor Is a Verb* but also *Why One Peaceful Woman Carries a Pistol*. These essays, well balanced by her award-winning poems, touch on elemental themes such as grief, loss, and respect for nature with a universality that is relevant to all of our lives.

[Third World Struggle for Peace with Justice](#) Thomas P. Fenton, Mary J. Heffron, 1990

[Remapping Global Politics](#) Yale H. Ferguson, Richard W. Mansbach, 2004-11-11 This book seeks to redraw our mental maps of global politics and to explain the shifting and accelerating forces that are shaping those maps. The authors build on the concept of post internationalism, focusing primarily on political space and political identity, which they argue are the new frontiers of global political theory. They suggest that the state is losing capacity, legitimacy, and authority to remain the primary actor in world affairs and is giving way to a more complex post international universe characterized by diverse and overlapping polities. This book is the result of the authors' long standing joint research into the nature and dynamics of global politics, a collaboration that has spanned over three decades. It makes an important contribution to the literatures on globalization and the future of international relations theory.
