We walked miles to school in the sun and the rain. It's mind-boggling to think how far we've come technologically. Objects in mirror are closer than they appear. That familiar warning applies to the windshield, not the rear view mirror, when it comes to technology. And in case of exponential technologies, almost everything is closer than it appears. Today's students will be graduating in and around 2030. Over 65% of the jobs of that time have not been invented yet. What knowledge, skills, and dispositions will our learners need for a successful future? How will exponential changes in technology influence them? How can they shape the future instead of being shaped by it? There is an urgent need to be aware of exponential technologies which will usher in singularity, a point in
