Sleep in the Military Wendy M. Troxel, 2015-04-30 Sleep problems can have long term consequences for servicemembers health and for force readiness and resiliency This first ever comprehensive review of sleep related policies and programs led to recommendations for improving sleep across the force **Can't Sleep? Issues of Being an Insomniac** Saddichha Sahoo, 2012-03-14 The word insomnia originates from the Latin in no and somnus sleep It is a disorder characterized by an inability to sleep or a complete lack of sleep Various studies have noted insomnia to be quite a common condition with symptoms present in about 33 50% of the adult population This book provides a comprehensive state of the art review on the diagnosis and management of the current knowledge of insomnia and is divided into several sections each detailing different issues related to this problem including epidemiology diagnosis management quality of life and psychopharmacology In order to present a balanced medical view this book was edited by a clinical psychiatrist **Sleep Research** ,1995 Flight Stress Alan F. Stokes, Kirsten Kite, 2017-03-02 While stress and fatigue are often dealt with in other books on aviation performance and human factors these realities of human vulnerability are now increasingly seen as central to the effective conduct of flight operations Flight Stress provides a comprehensive treatment and a better understanding of stress and fatigue as they relate to aviation It clarifies and distinguishes the concepts of stress and fatigue as they apply to flight and expounds sufficient theory to provide a principled basis for the consideration and amelioration of stress effects in aviation The authors examine what is known of the effects of stress from both laboratory and operational studies and detail the aspects of this knowledge to which aviation professionals should pay most attention They go on to discuss the implications of stress and fatigue for performance in a range of aviation contexts from air traffic control to aerial combat Physiological cognitive and medical sequel are explored The book locates aviation related work in its broader research context critically reviewing and illustrating the work with examples from accident and incident reports It is substantive but accessible since it both sets out the research base and provides plenty of real world examples to leaven and illustrate the narrative It thus provides an authoritative handbook for aviation professionals and a comprehensive source book and reference work for researchers The readership includes aviation professionals and researchers including medical personnel and registered Aviation Medical Examiners psychologists and Human Factors specialists training captains senior pilots and engineers air traffic controllers dispatchers and operations staff Biomedical Research and Computer Application in Manned Space Flight United States. National Aeronautics and Space Administration. Technology Utilization Office, 1971 Technology Utilization Program designed to transfer technological developments that may have useful commereial applications From NASA laboratories and contractors aeronautics and space related technology is gathered and evaluated Items which have potential industrial use are made generally available This survey of computer uses in the field of medicine is one of a series of NASA publications that presents information of direct or indirect interest to the non aerospace

community This report summarizes the areas of medicine in which computers can be employed and examines in detail several cases where computers have been applied in connection with the medical aspects of NASA's manned space flight program Treated are such problems as those of automated medical data storage and retrieval systems continuous monitoring and interpretation of electrocardiograms and computer aided medical diagnosis The approach is cautious throughout with the emphasis almost constantly on ways to permit the computer to perform various clerical functions while leaving critical decisions to a human monitor

Foreword Novel Aspects on Epilepsy Humberto Foyaca-Sibat, 2011-10-12 This book covers novel aspects of epilepsy without ignoring its foundation and therefore apart from the classic issues that cannot be missing in any book about epilepsy we introduced novel aspects related with epilepsy and neurocysticercosis as a leading cause of epilepsy in developing countries We are looking forward with confidence and pride in the vital role that this book has to play for a new vision and mission Therefore we introduce novel aspects of epilepsy related to its impact on reproductive functions oral health and epilepsy secondary to tuberous sclerosis mitochondrial disorders and lysosomal storage disorders Limbic and Autonomic Nervous Systems Research Leo DiCara, 2012-12-06 The present volume has been written primarily for the advanced student and the mature investigator The book will be of value to the student because it includes representative research problems on a variety of topics and significant for the mature investigator because it can help bring him up to date on specific topics in limbic and autonomic nervous system research an area which has undergone spectacular growth particularly during the last ten years The twelve chapters deal with subject matter that falls loosely into four major subtopics basic sensory and regulatory mechanisms emotional processes cardiovascular processes and learning and low arousal states but each chapter represents recent research in one particular area and stands as a self contained unit I am indebted to the many authors and publishers for their aid in granting permission to reproduce quotations tables and figures from their works Specific acknowledgments are made in the text Leo V DiCara Ann Arbor Contents Basic Sensory and Regulatory Mechanisms Chapter 1 The Olfactory System and Behavior Bernice M Wenzel I Introduction 1 2 Background 2 2 1 Rhinencephalon 2 2 2 The Direct Olfactory System and Its Connections 3 2 3 Olfactory Lesions and Nonolfactory Behavior 7 3 Effects of Lesions in the Direct Olfactory System 8 3 1 Orienting and Habituation 9 3 2 Activity 12 3 3 Avoidance Learning 13 3 4 Appetitive Learning 16 NurtureShock Po Bronson, Ashley Merryman, 2009-09-03 In a world of modern involved caring parents why are so many kids aggressive and cruel Where is intelligence hidden in the brain and why does that matter Why do cross racial friendships decrease in schools that are more integrated If 98% of kids think lying is morally wrong then why do 98% of kids lie What's the single most important thing that helps infants learn language NurtureShock is a groundbreaking collaboration between award winning science journalists Po Bronson and Ashley Merryman They argue that when it comes to children we've mistaken good intentions for good ideas With impeccable storytelling and razor sharp analysis they demonstrate that many of modern society's strategies for nurturing children are in fact backfiring because key twists in the

science have been overlooked Nothing like a parenting manual the authors work is an insightful exploration of themes and issues that transcend children s and adults lives *Taking Care of Our Folks* Deborah Y. Liggan MD, Deborah Y.

Liggan, 2009 With the growing concern over healthcare in America studies show that elderly African Americans often come out on the losing end of the system due to lack of health insurance Because of this growing population taking care of elderly patients in the African American community has become the responsibility of their family If you re facing such a situation your questions may be many and your answers few *Taking Care of Our Folks* is a definitive guide to caring for your elderly relatives Drawing on comprehensive and detailed research this essential resource aims to ensure that elderly African Americans receive culturally competent healthcare and live more productive independent and pain free lives Deborah Y Liggan MD discusses the major health issues and offers case studies of how each illness affects this ethnic group She offers up to date information on nutrition pharmacology technological advances and self help for each disease Topics focus specifically on elderly African Americans and include Neurology of aging Cardiovascular problems Mental health and aging Approach to gastrointestinal problems Prominent cancers With clear and concise language *Taking Care of Our Folks* will serve as an invaluable tool for caregivers and aging patients alike Take the first step to competent and compassionate caregiving today *3rd Kuala Lumpur International Conference on Biomedical Engineering 2006* F. Active Learning for Digital Transformation in Healthcare Education, Training and Research Miltiadis Lytras,Cristina Vaz De Almeida,2023-09-06 Active Learning for Digital Transformation in Healthcare Education Training and Research discusses the potential of advanced training of health professionals as a contributing factor to improve treatment outcomes By reading this book professionals who deal with patients with low health literacy will be prepared to promote better access to digital tools understand the habits of users of health services and empower engagement The book contains a set of techniques and instruments associated with health literacy communication skills and personal development that will enable their application in good daily practices and assist healthcare professionals to promote digital transformation to patients This is a valuable resource for researchers graduate students and healthcare professionals who are interested in learning more about how they can be an effective agent of change in healthcare Discusses the potential of patient education through the training of health professionals to improve patient engagement and adherence to treatment Presents techniques from real world examples to demonstrate the efficacy of better communication between health professionals and patients especially in the digital medicine era Outlines digital tools that can be used to strengthen the healthcare professional patient relationship

Sleep Mechanisms ,1965-01-01 Sleep Mechanisms *Handbook of Sleep Research* ,2019-06-21 Handbook of Sleep Research Volume 30 provides a comprehensive review of the current status of the

neuroscience of sleep research It begins with an overview of the neural hormonal and genetic mechanisms of sleep and wake regulation before outlining the various proposed functions of sleep and the role it plays in plasticity and in learning and memory Finally the book discusses disorders of sleep and waking covering both lifestyle factors that cause disrupted sleep and psychiatric and neurological conditions that contribute to disorders Emphasizes a comparative and multidisciplinary approach to the topic of sleep Covers the neurobiology and physiology of sleep stages mechanisms of waking and dreaming Discusses in detail the proposed functions of sleep from health and rest to memory consolidation and synaptic plasticity Examines the current state of research in mammalian and non mammalian species ranging from primates to invertebrates

Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1978 **Computational Methods in Neural Modeling** José Mira, José R. Álvarez, 2003-08-03 The two volume set LNCS 2686 and LNCS 2687 constitute the refereed proceedings of the 7th International Work Conference on Artificial and Natural Neural Networks IWANN 2003 held in Ma 3 Menorca Spain in June 2003 The 197 revised papers presented were carefully reviewed and selected for inclusion in the book and address the following topics mathematical and computational methods in neural modelling neurophysiological data analysis and modelling structural and functional models of neurons learning and other plasticity phenomena complex systems dynamics cognitive processes and artificial intelligence methodologies for net design bio inspired systems and engineering and applications in a broad variety of fields **Sensor-Based Sleep Stage Classification Using Deep Learning** Xinyu Huang , 2023-02-23 Sleep is a cyclic physiological phenomenon an important aspect of human life activity which like sport and diet is a nutritional element that ensures the growth and development of the organism Under the influence of various factors such as work and study stress and metabolic disorders more and more people suffer from various types of sleep disorders Sleep has become an important research topic in recent years Sleep stage analysis plays an important role in the early detection and treatment of sleep disorders However different age groups show different symptoms of sleep disorders and different sleep disorders show variability in their different sleep stages The prevalence of sleep disorders is much higher in children than in adults Although the classification of sleep stages in adults has been well studied children show markedly different characteristics of sleep stages Therefore there is an urgent need for sleep stage classification in children With the rapid development of intelligent computing technology artificial intelligence has found wide application in medical research and health sciences in recent years In the field of sleep medicine deep learning approaches can efficiently and automatically learn abstracted relevant sleep features from collected sleep data to accurately interpret children s sleep stages accordingly Compared to traditional sleep data analysis this saves many manual and time resources for data annotation and helps sleep experts reduce the risk of misdiagnosing sleep disorders based on their prior knowledge In this context this book presents several advanced deep learning based approaches for sleep stage classification in children using time series polysomnography recordings acquired from clinical sensor devices Significantly improved

performance in classifying sleep stages in children suffering from sleep disorders demonstrates the great potential of joint research and development between artificial intelligence and the field of sleep medicine *Rest Assured* Louise Herbert, 2025-11-25 A gentle way to get more rest and help your child develop healthy sleep habits *Rest Assured* is thankfully not another sleep training book This is a book for parents who want to help their babies sleep while staying true to the instinctual drive for parent child connection security and attachment Yes it is possible Author Louise Herbert a certified expert in sleep science lactation and perinatal and infant mental health offers a neuroscience backed approach that supports each child s unique needs and biological development to promote safe healthy and restful sleep Inside you ll find practical guidance on trusting yourself and your child to find the middle ground between cry it out and wait it out Learn about the biology of healthy safe biologically normal infant sleep and get a how to guide for supporting natural healthy sleep in a way that results in easier more restful nights for the whole family If you re in need of a way to help your baby sleep well *Rest Assured* will ease your stress and equip you to navigate this pivotal parenting phase Get practical guidance on infant sleep that aligns with our human drive for connection and secure thriving attachments Learn about the latest sleep science what s normal as babies grow and what they need to start consolidating sleep Support your child s emotional resilience regulation and cognitive development If you re struggling with your infant s or toddler s sleep patterns this book gives you a nurture based alternative to cry it out sleep training techniques
