

The Method Of Physical Action

- Stanislavski's Method of Physical Action is based on the idea that the physical actions of a performer are just as important as the words they speak. It requires an understanding of how significant these are, and the idea that a person will only ever have control over their own body in their lifetime.
- The rehearsal process gives the director and actor a chance to develop the actions that will affect the actor and give the scene life, considering the emotional and aesthetic aspects of the play at the same time.
- Later in life, Stanislavski thought that the art of performance could only be learned by practice, in performance and observation, not from looking at literature and only reading about the subject.
