Cosmology, Calendars, and Horizon-Based Astronomy in Ancient Mesoamerica Anne S. Dowd, Susan Milbrath, 2015-05-01 Cosmology Calendars and Horizon Based Astronomy in Ancient Mesoamerica is an interdisciplinary tour de force that establishes the critical role astronomy played in the religious and civic lives of the ancient peoples of Mesoamerica Providing extraordinary examples of how Precolumbian peoples merged ideas about the cosmos with those concerning calendar and astronomy the volume showcases the value of detailed examinations of astronomical data for understanding ancient cultures The volume is divided into three sections investigations into Mesoamerican horizon based astronomy the cosmological principles expressed in Mesoamerican religious imagery and rituals related to astronomy and the aspects of Mesoamerican calendars related to archaeoastronomy It also provides cutting edge research on diverse topics such as records of calendar and horizon based astronomical observation like the Dresden and Borgia codices iconography of burial assemblages architectural alignment studies urban planning and counting or measuring devices Contributors who are among the most respected in their fields explore new dimensions in Mesoamerican timekeeping and skywatching in the Olmec Maya Teotihuacano Zapotec and Aztec cultures It will be of great interest to students and scholars of anthropology archaeology art history and astronomy *Maya Calendar Origins* Prudence M. Rice, 2007-12-01 In Maya Political Science Time Astronomy and the Cosmos Prudence M Rice proposed a new model of Maya political organization in which geopolitical seats of power rotated according to a 256 year calendar cycle known as the May This fundamental connection between

timekeeping and Maya political organization sparked Rice's interest in the origins of the two major calendars used by the ancient lowland Maya: one 260 days long and the other having 365 days. In *Maya Calendar Origins*, she presents a provocative new thesis about the origins and development of the calendrical system. Integrating data from anthropology, archaeology, art history, astronomy, ethnohistory, myth, and linguistics, Rice argues that the Maya calendars developed about a millennium earlier than commonly thought, around 1200 BC, as an outgrowth of observations of the natural phenomena that scheduled the movements of late Archaic hunter-gatherer-collectors throughout what became Mesoamerica. She asserts that an understanding of the cycles of weather and celestial movements became the basis of power for early rulers who could thereby claim control over supernatural cosmic forces. Rice shows how time became materialized, transformed into status objects such as monuments that encoded calendrical or temporal concerns as well as politicized, becoming the foundation for societal order, political legitimization, and wealth. Rice's research also sheds new light on the origins of the *Popol Vuh*, which Rice believes encodes the history of the development of the Mesoamerican calendars. She also explores the connections between the Maya and early Olmec and Izapan cultures in the Isthmian region, who shared with the Maya the cosmovision and ideology incorporated into the calendrical systems.

Heart of Creation Andrea Joyce Stone, 2002. This accessible state of the art review of Mayan hieroglyphics and cosmology also serves as a tribute to one of the field's most noted pioneers. The core of this book focuses on the current study of Mayan hieroglyphics as inspired by the recently deceased Mayanist Linda Schele. As author or coauthor of more than 200 books or articles on the Maya, Schele served as the chief disseminator of knowledge to the general public about this ancient Mesoamerican culture, similar to the way in which Margaret Mead introduced anthropology and the people of Borneo to the English-speaking world. Twenty-five contributors offer scholarly writings on subjects ranging from the ritual function of public space at the Olmec site and the gardens of the Great Goddess at Teotihuacan to the understanding of Jupiter in Maya astronomy and the meaning of the water throne of Quirigua.

Zoomorph P. The workshops on Maya history and writing that Schele conducted in Guatemala and Mexico for the highland people, modern descendants of the Maya civilization, are thoroughly addressed, as is the phenomenon termed Maya mania, the explosive growth of interest in Maya epigraphy, iconography, astronomy, and cosmology that Schele stimulated. An appendix provides a bibliography of Schele's publications and a collection of Schele's written memories of the Rabbit Woman by some of her colleagues and students. Of interest to professionals as well as generalists, this collection will stand as a marker of the state of Mayan studies at the turn of the 21st century and as a tribute to the remarkable personality who guided a large part of that archaeological research for more than two decades.

Reachable Stars George E. Lankford, 2007-08-05. Lankford's volume focuses on the ancient North Americans and the ways they identified, patterned, ordered, and used the stars to light their culture and illuminate their traditions.

The Emerald Moem Richard Leviton, 2004-05-04. Twenty years ago in England, author Richard Leviton discovered the planet. Following quite specific

guidance he began a long process that amounted to an apprenticeship My mentors dispatched me to various specific locations in the Somerset landscape and at all hours of the night and day I sat on hills and valleys and rocks under sunlight moonlight rain snow and fog and had visions I started to see another landscape behind the apparent landscape It was an apparitional landscape with stars planets galaxies angels spirits of Nature mythic deities divinity As time went on he found himself talking with angels visiting celestial cities and following gnomes He came to understand that at one level we are the planet and that both we and it have an intimate relationship with our galaxy I found myself living inside the myths of the world as if they were expert scripts for real life inner adventures I never once thought I was crazy Why should I Quite the opposite I believed I was finally getting grounded in something real But it would take me twenty years to make sense of it That sense is embodied in *The Emerald Modem* The Emerald Modem includes direct correspondences between human chakras and the Earth's energy features and the galactic originalstables listing locations of sacred sites around the planet where you may experience this relationship explanations of world myths which provide clues to this unsuspected visionary world around us This is the first book to synthesize all the fragments of geomantic perception sacred sites energy points vertexes etc into a global interactive model that ties human consciousness directly to it Leviton describes 85 subtle features in the planetary landscape places you can go for mystical experiences They are features of the Earth's energy body almost all invisible to conventional sight But psychic cognition can be trained and you can usefully interact with any of these types of sites today without seeing what you're doing Your intent to interact for the benefit of yourself and the planet is all that's required Just as modems dial us into the Internet so the features of the Earth's energy body described in *The Emerald Modem* help us get online with the galaxy You can learn to visit Grail Castles experience a Mount Olympus or walk through the stars in a landscape zodiac and you can learn enough to become confident that you're not traveling alone [Decoding the Codex Borgia](#) Susan Milbrath, 2024-04-23 This book explores the rich symbolism of the Codex Borgia a masterpiece of Precolumbian art dating to the fifteenth century showing how the manuscript's intricate and colorful imagery conveys complex ideas related to Mesoamerican myths and religion [Exploring Ancient Skies](#) David H. Kelley, Eugene F. Milone, 2011-02-16 *Exploring Ancient Skies* brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean the Far East and the New World particularly Mesoamerica putting the ancient astronomical materials into their archaeological and cultural contexts The authors begin with an overview of the field and proceed to essential aspects of naked eye astronomy followed by an examination of specific cultures The book concludes by taking into account the purposes of ancient astronomy astrology navigation calendar regulation and not least the understanding of our place and role in the universe Skies are recreated to display critical events as they would have appeared to ancient observers events such as the supernova of 1054 A D the lion

horoscope and the Star of Bethlehem Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation It will be useful as a reference for scholars and as a text for students in both astronomy and archaeology and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history
