Stars Beneath the Sea Trevor Norton, 2000 This is the remarkably funny true story of some of the brave brilliant and often barmy men that invented diving It is a story of explosive tempers and exploding teeth of how to juggle live hand grenades and steer a giant rubber octopus A series of vivid portraits reveal the eccentric exploits of these underwater pioneers They include Guy who held a world altitude record when only sixteen wrote a film for Humphrey Bogart invented snorkelling and loved his wife enough to shoot her Roy wore a bucket over his head and stole a coral reef Bill wearied of fishing with dynamite and wrestling deadly snakes so he sealed himself in a metal coffin to dangle half a mile beneath the ocean Cameron testing the bouncing bomb for dam busters made a plastic ear for a dog a false testicle for a stallion and invented a mantrap disguised as a lavatory He ascended from a depth of 200 feet without breathing equipment to see if his lungs would burst then studied the effects of underwater explosions by standing closer and closer until shattered by the blast The book also traces the evolution of underwater exploration from spear fishermen to conversationalists from treasure hunters to archaeologists from photographers to philosophers The sea is a secretive and seductive place and the author describes with incredible humour knowledge and historical accuracy the magic and mystery of being beneath the waves

Stars Beneath the Sea Window Transf Trevor Norton,1999-08-01 A Cultural History of the Sea in the Age of Empire Margaret Cohen,2023-02-09 Across the 19th century maritime globalization expanded at a hitherto unimaginable pace transforming transport and communications over the seas into oceanic networks at a planetary scale These networks shaped culture in its most expansive sense affecting seafaring warfare empire commerce communications passenger travel leisure and science Authors recover the sea experience of people and groups entangled with and yet neglected in an earlier generation of maritime history focused on conquest empire and knowledge Thus across a century when Britannia nominally ruled the waves military control emerges as both opportunistic harboring slavers as well as partial giving agency to mutineers and enslaved crew members including on the Royal Navy s own fleet the wreck of Arctic exploring voyages such as the Erebus and the Terror takes readers to PanInuit exploration over sea ice around the Arctic circle colonial and mercantile transport in the Indian Ocean reveals the role of lascars the seafarers of color who for centuries had practiced these waters on the coasts of industrial nations the professional establishment of marine sciences depends on the pathbreaking contributions of female amateur naturalists As part of its revisionary aim this volume gives voice to the physical environment Thus we discover contrasting perspectives about this environment under threat today of European mariners for whom it was deadly and treacherous and for maritime Aborigines who lived in its shelter Considering literature and art as well as history authors further trace how the paradoxes of sea practice shape some of the most memorable ocean fantasies of the Western tradition fostering both a celebration of work and technology and a preservation of secular magic in a disenchanted world

Coral Empire Ann Elias,2019-04-04 From vividly colored underwater photographs of Australia s Great Barrier Reef to life size dioramas re creating coral reefs and the bounty of life they sustained the work of early twentieth century explorers and photographers fed the public s fascination with reefs In the 1920s John Ernest Williamson in the Bahamas and Frank Hurley in Australia produced mass circulated and often highly staged photographs and films that cast corals as industrious colonizing creatures and the undersea as a virgin unexplored and fantastical territory In Coral Empire Ann Elias traces the visual and social history of Williamson and Hurley and how their modern media spectacles yoked the tropics and coral reefs to colonialism racism and the human domination of nature Using the labor and knowledge of indigenous peoples while exoticizing and racializing them as inferior Others Williamson and Hurley sustained colonial fantasies about people of color and the environment as endless resources to be plundered As Elias demonstrates their reckless treatment of the sea prefigured attitudes that caused the environmental crises that the oceans and reefs now face

Rozwadowski, 2018-10-15 Much of human experience can be distilled to saltwater tears sweat and an enduring connection to the sea In Vast Expanses Helen M Rozwadowski weaves a cultural environmental and geopolitical history of that relationship a journey of tides and titanic forces reaching around the globe and across geological and evolutionary time Our ancient connections with the sea have developed and multiplied through industrialization and globalization a trajectory that runs counter to Western depictions of the ocean as a place remote from and immune to human influence Rozwadowski argues that knowledge about the oceans created through work and play scientific investigation and also through human ambitions for profiting from the sea has played a central role in defining our relationship with this vast trackless and opaque place It has helped us to exploit marine resources control ocean space extend imperial or national power and attempt to refashion the sea into a more tractable arena for human activity But while deepening knowledge of the ocean has animated and strengthened connections between people and the world's seas to understand this history we must address questions of how by whom and why knowledge of the ocean was created and used and how we create and use this knowledge today Only then can we can forge a healthier relationship with our future sea
