Teaching Philosophy For Democracy Asian Perspectives:

Teaching Philosophy for Democracy In-suk Cha, 2000 *Asian Perspectives on Education for Sustainable Development* Liz Jackson, 2020-05-21 This book critically considers what various Asian philosophies can contribute to a more substantive discourse on sustainability education and educational philosophy The contributors examine how east and west interact in educational philosophy and practice in Asian contexts As a collection they provide a broad view of Asian sustainability thinking that is not dominated by Confucianism Buddhism Islam and post colonialism but rather which regards these themes and other frameworks for sustainable education as dynamic aspects of Asian contexts both historically and today As such the book invites readers to consider the challenges and opportunities for theorising of sustainability in the philosophy of education while also critically engaging with the way in which Asia and east are typically understood Of interest to those researchers in Asian conceptions of sustainability this book highlights a series of potential insights in relation to the often foregrounded perspectives of Global North and western based frameworks The chapters were originally published in *Educational Philosophy and Theory* *Bioethics: Asian Perspectives* Ren-Zong Qiu, 2013-06-29 *Bioethics Asian Perspectives* A Quest for Moral Diversity is the first volume on bioethics all contributors of which are exclusively non western scholars unfolds a rich and colourful picture addresses thorny bioethical issues from comprehensive Asian perspectives and different from the western paradigm of bioethics covers many topics including the intellectual foundation of Asian bioethics bioethics and Asian culture life and death euthanasia and end of life care in Asia shows in its discussions moral diversity in Asia sheds light on the debate about universal ethics global ethics and moral diversity The book is intended for senior undergraduate and graduate students interested in bioethics as well as for bioethicists philosophers physicians scholars of Asian and culture studies geneticists sinologists medical anthropologists health administrators health officials for relations with Asia foundation officers for health programs in Asia western journalists in Asia and officers of international organizations for Asia

Cultivation of Self in East Asian Philosophy of Education Ruyu Hung, 2020-05-21 This book provides exciting and significant inquiries into the cultivation of self in East Asian philosophy of education The contributors to this volume are from different countries or areas in the world but all share the same interest in exploring what it means to be human and how to cultivate the self In this book self cultivation in classical Chinese philosophies including Confucianism neo Confucianism and Daoism is scrutinised and elaborated upon in order to reveal the significance of ancient wisdom for today s educational issues and to show the meaningful connections between Eastern and Western educational thoughts By addressing many issues of contemporary importance including environmental education equity and justice critical rationalism groundlessness of language and power and governance this book offers fresh views of self cultivation illuminated not merely by East Asian philosophy of education but also by Western insights For those who are interested in comparative philosophies intercultural education and cultural study this book is both thought provoking and inspirational The chapters in this book were originally

published in the Educational Philosophy and Theory journal Bernard Stiegler and the Philosophy of Education Joff P.N. Bradley, David Kennedy, 2021-05-13 This book is the first of its kind to critically examine the philosophy of Bernard Stiegler from the perspective of the philosophy of education The editors of this book firmly believe that in the coming years Stiegler's philosophy will assume increasing importance and influence in both digital studies and the philosophy of education as his thought is a prism through which to understand how we live and work and a means to anticipate what the future may hold for us all in the time of the Anthropocene They are of the view that Stiegler's work will have a permanent impact on the intellectual terrain of the twenty first century as his majestic conceptual architectonic will shape political social and pedagogical debates in the coming decades With this in mind the contributors of this book take up his gauntlet to understand the risks and opportunities of the digital pharmakon and its impact on the educational milieu The chapters in this book were originally published as a special issue of Educational Philosophy and Theory **Asian Perspectives on Education:**

Inclusivity and Diversity Jie Zhang, Natalie Sarrazin, 2025-01-07 The idea of Asia is contested in the literature as a concept in terms of unification in any sense e.g. regionally economically and politically see Duara 1995 2019 Acharya 2010 which makes a book of this nature challenging The use of inclusion and diversity as a lens of discovery is not only synchronically topical but provides an important outlet for unheard voices and marginalized perspectives otherwise silenced or ignored in education and Asian literature The lens by which the book is written combines multiple streams of diversity and inclusion with that of K 12 and higher education in an Asian context and it allows room for individual Asian voices and perspectives both in and outside the classroom Inspired by a panel presented at the 2021 New York Conference on Asian Studies NYCAS on the very topic of inclusivity and diversity in Asian education the book broadened the original focus from the COVID centered to one that allowed the exploration of a wider geographic area and cultural area as well as new subjects Moreover our text includes a focus on individuals with disabilities multicultural education and cross disciplinary efforts across cultures This book covers broader topics regarding inclusivity and diversity in education from multiple Asian perspectives and ranges from various educational levels that is elementary secondary and post secondary institutions different school settings that is public and private schools and a variety of Asian countries and areas that is Bangladesh China India Indonesia Japan Jordan and Taiwan This book gives a well rounded representation of the issues through theoretical focus practical applications and research studies contributed by authors from various international institutions and countries or countries of origin including Bangladesh China Germany India Indonesia Japan Jordan and the United States **The Paradox of Philippine Education and Education Reform**, 2008 **Bildung and Paideia** Marie-Élise Zovko, John M. Dillon, 2021-06-23 Bildung and Paideia examines traditional humanistic ideals in light of philosophical reflection on the need for education of the whole human being The study of what it is to be human is traditionally the task of the humanities In recent years however the humanities have been increasingly subordinated to technological economic and utilitarian aims Do the humanities still have a fundamentally

distinct task to fulfil in education Today s reduction of educational outcomes to measurable competencies and economically exploitable skills is opposed to traditional ideals like that of Greek paideia and the German Romantic concept of Bildung which emphasized formation of the whole human being The present volume takes as its point of departure the conviction that the study of the human experience whether through philosophy literature religion art music history or languages has something specific to offer in the realm of education today The individual contributions examine the specific role of philosophy and the humanities in education from ancient times to the present and explore possibilities for conceiving philosophical models of education The chapters in this book were originally published as a special issue of the journal Educational Philosophy and Theory Competing Frameworks Anatoli Rapoport,2018-11-01 For citizenship education in the 21st century globalization increasingly presents a new challenge and a new opportunity Since the time when nationalism played a critical role in unifying new nations nationality and citizenship have been virtually synonymous terms As a result the constructed symbiosis of citizenship and national identity has influenced state supported citizenship education in the most profound way School curricula particularly in public schools produced and reinforced the dominant version of citizenship which is national citizenship Schools were expected to prepare future loyal citizens who would identify themselves with the nation Due to the changing nature and scope of human interactions the traditional model of citizenship education however appears increasingly outdated and deficient to address many contemporary challenges Thus schools have become a locus of a potential conflict of two citizenship discourses the discourse of national citizenship that for a long time has served as the ultimate purpose of public education and the discourse of global citizenship that is forcefully and continuously seeking for a proper place in school curricula despite the lack of curricular heritage The need for an education for citizenship that has a global scope and is guided by critical and emancipatory approaches becomes more evident At the same time the pressure to globalize and internationalize curriculum actively challenges such concepts as patriotism national identity loyalty to the state or national uniqueness of government and democratic development that have been fundamental for citizenship and civic education for decades In this book a group of international scholars present their research about the dynamic development interplay and interconnectedness of two major discourses in citizenship education namely national and global Case studies and ethnographies from China Cyprus Egypt Hong Kong and Singapore Lebanon Liberia the Netherlands Russia and the United States display a multifaceted but yet comprehensive picture of educators attempts to promote social justice global awareness and multiple loyalties The volume will appeal to several constituencies it will be interesting to teachers and teacher educators whose focus of instruction is citizenship education social studies education and global education it will also be interesting to scholars who conduct research in citizenship and global education *The SAGE Handbook of Research on Teacher Education* D. Jean Clandinin,Jukka Husu,2017-06-14 The SAGE Handbook of Research on Teacher Education offers an ambitious and international overview of the current landscape of teacher education research as well as the imagined

futures The two volumes are divided into sub sections Section One Mapping the Landscape of Teacher Education Section Two Learning Teacher Identity in Teacher Education Section Three Learning Teacher Agency in Teacher Education Section Four Learning Moral Ethical Responsibilities of Teaching in Teacher Education Section Five Learning to Negotiate Social Political and Cultural Responsibilities of Teaching in Teacher Education Section Six Learning through Pedagogies in Teacher Education Section Seven Learning the Contents of Teaching in Teacher Education Section Eight Learning Professional Competencies in Teacher Education and throughout the Career Section Nine Learning with and from Assessments in Teacher Education Section Ten The Education and Learning of Teacher Educators Section Eleven The Evolving Social and Political Contexts of Teacher Education Section Twelve A Reflective Turn This handbook is a landmark collection for all those interested in current research in teacher education and the possibilities for how research can influence future teacher education practices and policies
