Sociology David M. Newman, 2020-01-28 In *Sociology Exploring the Architecture of Everyday Life* David Newman shows students how to see the unfamiliar in the familiar to step back and see organization and predictability in their personal experiences Through his approachable writing style and lively personal anecdotes the author has maintained his goal from the first edition to write a textbook that reads like a real book Many adopters of this book are fans of Peter Berger's classic works which helped introduce the idea of social constructionism to sociology Newman uses the metaphors of architecture and construction to help students understand that society is not something that exists out there independently of themselves it is a human creation that is planned maintained or altered by individuals Using vivid prose current examples and recent data the Thirteenth Edition presents a unique and thought provoking overview of how society is constructed and experienced Instead of surveying every subfield in sociology the more streamlined coverage 14 chapters focuses on the individual and society the construction of self and society and social inequality in the context of social structures Included with this title The password protected Instructor Resource Site formally known as SAGE Edge offers access to all text specific resources including a test bank and editable chapter specific PowerPoint slides
